CHIEF PRICE CHANGES YESTERDAY (Prices in pence unless otherwise indicated)

Money supply rise may mean higher bank interest rates

BY PETER RIDDELL, ECONOMICS CORRESPONDENT

An early rise in bank interest rates has become more likely with the publication yesterday of new official figures indicating acceleration in the strike rate of growth of the money supply.

All the clearers yesterday While the January rise may even though there are no exwere adopting a wait-and-see have heen artificially boosted by ternal pressures with sterling attitude, but a rise in rates does various exceptional influences. not look far off. There was City speculation last night that Barclays might take the lead.

The pressures bave huilt up after a sharp rise in money market interest rates, which have left both the clearers' base lending rates and the Bank of England's minimum lending rate lagging bebind.

These forces are likely to be reinforced by the new figures, published by the Bank, showing that elegible liabilities rose by 2.2 per cent in the five weeks to

The liabilities are a major component of sterling M3, the hroadly-defined money supply, including cash and bank current and seven-day deposit accounts. • GILTS had marginal falls at the longer end extending to ! and the shorts rescinded small They are only a rough and ready guide to the final money supply figures, but the implicalion is that sterling M3 rose by between 2 and 3 per cent over

the month. This in turn indicates an underlying rate of growth of the money supply above the 8-12 per cent target range for the year to October,

the trend is undoubtedly worry-ing at a time whan the industrial disputes and pay claima have not begun to have an

The figures and the money market pressures have created an acute dilemma for the authorities. Senior economic Ministers including yesterday Mr. Joel Barnett, Chief Secre-tary to the Treasury, have repeatedly stressed their commitment to keeping growth of the money supply within the

Till now the Government has been reluctant to change MLR -121 per cent since early November-while there was uncertainty about both the level of pay rises and their possible impact on public-sector horrowing and the economy generally.

The authorities have wanted,

partly for obvious political reasons, to take stock of overall fiscal and monetary policy later on, rather than take premature, and possibly wasted, action now. This freedom of manoguvre may no longer exist in view of the rise in money market rates,

The main question may be whether the clearers take the lead by altering their rates, or whether they wait for an indication from the Bank on MLR. At present it looks probable that the council of the Building Societies Association will recommend no change in rates

at its meeting on Thursday. The pressure on the clearers arises because three-month inter-bank rates have disen to a level—13 | per cent—where top-quality corporate customers can in theory borrow profitably from the banks, at 13; per cent, though there are few aigns of

this yet. There are so far only isolated cases of companies borrowing more because of the industrial disputes, and indeed in some instances cash flow has lmproved hecause of a reduction in stocks. The main impact on the

demand for loans is expected put performance in 1978. BL management has agreed later this month, or in March. .Continued on Back Page Talbes Page 29 Lex Back Page

Turkey may need aid on far larger scale

BY DAVID TONGE

· WEST MIDLAND lorry INTERNATIONAL aid to the ded. be on a far larger scale than sistence allowance after had previously been believed. hours of talks with Road Hanlage Association. They International hankers now estimate the country's foreign retain their traditional differexchange needs over the next ential over drivers in other five years at a minimum of regions with a £2.50 supplemen-\$10bn (about £5bn) to maintain growth rates. • NEGOTIATIONS In Geneva

Last month at the Gnadeloupe summit, Britain, France, the U.S. and West Germany made a political commitment to assist the Turkish economy. Since then it has become clear that the sums involved are too large for the four. They have now approached the Paris-based Organisation for Economic Cooperation and Development and on Tuesday the announced that it would co-

ordinate a joint aid scheme. developments take place against a background of continuing difficulties between Turkey and the International Monetary Fund. Negotiations for release of the third tranche of the \$450m (£225m) agreement signed between the two last April have been suspen-

Turkish economy will have to In Washington officials say troversial be on a far larger scale than that is because the Turkish deposits in Ministry of Finance officials involved in the negotiations are husy meeting deadlines for presenting the country's budget. But Western bankers believe that the same acrimony has emerged as in previous discussions between the government of Mr. Bulent Ecevit and the

Attention

The Fund has consistently called for austerity. In the latest discussions last month, it pressed for a 30-40 per cent devalution. tax increases and further budgetary restraint. Until now attention has con-

centrated on re-financing nearly half Turkey's total debt of \$13hn (£7.5bn). It has been the biggest such operation ever mounted and is largely complete. But the hanks involved are realising that even when the main items are tied up-converting the \$2.4bn (£1.2hn) out-

standing on the short-term conconvertible deposits into seven-year money could be completed within two months—Turkey will remain desperately short of foreign exchange indefinitely. Balance-of-payments project

tions imply that almost balf of future export earnings will have to go to service the restructured debt. At the moment, however, oil imports alone virtually equal total revenue from exports. Estimates of the external

finance required vary according to the growth targets adopted Turkey'a five-year plan foresees a growth of 5 to 8 per cent annually and the need for \$5bn (£2.5bn) foreign aid over the period. But hankers argue that it is far more likely to require \$2bn and \$3hn hetween annually, unless it cuts its growth rate hard.

They point out, however, that even Turkey'a enviable 7 per cent annual growth rate in the 15 years to 1976 failed to prevent massive unemployment. Editarial Comment Page 20

U.S. bank wins UK tax test case

Health service

pay talks break down

FINANCIAL TIMES REPORTER

HEALTH SERVICE pay talks coliopsed yesterday as the Government showed every intention of trying to keep certain sectors of the public services to single-figure settlements.

Pay negotiations for 33,000 water workers also liroke down early yesterday morning on an offer of 15.88 per cent. Local-The decision marks a drama-authority union negotiators are tic reverse from voting at certain to reject an employers' authority union negotiators are Coventr yplants earlier in the pay offer today if it is no more than the expected 8.8 per cent.

Senior Ministers decided in Downing Street to stand firm on restricting pay settlements to single figures.

Much confusion remained about how far the Government might be prepared to go within single figures to try to settle some of the public-sector disputes. The Prime Minister indicated

in the Commons, however, that although his weekend speech pointed to the possibility of night whether support for action would be forthcoming from the 700 workers at Speke, Liverpool, and the 3.500 employees at Drews Lane, the Birmingham components plant whose strike cent but below 10 per cent. cent but below 10 per cent. Seven pence on e gallon of petrol-(taking it to £1 a gallon), 4p on a pint of beer (to 50p). 2ip on a small glass of spirits (to 52p), 4p on a packet of cigarettes (to more than 40p) would bring in about £50m. However, these rises would be considered stiff by the average Irishman and the consensus is that Mr. Colley could compro-mise by using some of the EMS grant and imposing some excise tax increases.

Lockheed verdict soon in Italy

By Rupert Cornwell in Rome THE 29 judges of Italy's constitutional court, the country's highest legal authority, with-drew yesterday to consider their verdict in the trial concerning the Italian end of the Lockheed payments scandal. Two former Defeoce Ministers are among the defendants in the trial which has been in progress for nine

The judges are expected to make known their decision within a week, thus bringing to a close an affair which contributed to the downfall of Sig. Giovanni eone, the former Italian President, who resigned last summer. The prosecution has asked for heavy prison sentences against the two most prominent accused the ex-Ministers, Sig Maria Tanassi (Social Democrati and Sig Luigi Gui (Christian Democrat). The prosecution has also called for confiscation of the

two men's personal wealth.
The charges which they face are of serious corruption against the state, arising out of reported payments of \$1.6m by the U.S. company to secure the purchase hy the Italian air force of 14 opposition parties allege? C-130 Hercules military trans port planes in 1970.

Both Sig Tanassi and Sig Gui, the first former Cahinet Ministers to go before the Constitutional Court since the fall of alllance and fascism, have denied any improper hehaviour.

The prosecution has asked for a total of 58 years imprisonment gainst nine of the 11 accused. They also include the fugitive former head of the state eogineering company, Finmeccanica, Sig Camillocrocianl. and General Dullio Fanali, a limitation (SALT). That is to "grey zone" disparity, for former air force chief of staff. say, the superpowers are reaches example in the context of a

W. Germany airs defence dilemma

BY JONATHAN CARR IN BONN

WHAT IS Herbert Wehner up to? Many astonished West Germans are asking that, following a hurst of controversial com-ment on defence from the powerful Parliamentary leader of the ruling Social Democratic Party (SPD).

Among other things, Herr Wehner indicated that he he-lieves Soviet armament to be defensive in character, and that the tactics of the Bonn Foreign Ministry are partly re-spoosible for the lack of pro-gress in the Vienna talks be-tween the West and the Warsaw Pact which are included to bring about a reduction of forces in Europe.

Is Herr Wehner leading an SPD left-wing revolt against the nolicies of Chancellor Helmut Schmidt and his Defence Minister Herr Hans Apel? Is he seeking to undermine the position of Herr Hans-Dietrich Genscher, the Foreign Minister and leader of the SPD's junior coalition partner, the Free Democratic Party (FDP)? Is he even ready to compromise Western security interests to bning further detente with Moscow-as somein the Bonn

The truth seems to be that Herr Wehner is (most success fully) stirring public discussion of a defeoce dilemma which involves the whole Western especially West Germany. The dilemma, involving the appropriate response to the hulld-up of Soviet mediumrange nuclear rocket forces, has long been recognised but is The U.S. and the Soviet Union

appear close to a second accord

in their talks on strategic arms

in the SALT and MBFR talks there are medium-range nuclear rockets, an area where the Soviet Union bas a big and apparently increasing advan-tage. With a range of up to 4.000 km, these weapons could hit all European countries presenting Europe, if not the U.S.,

with a strategic problem. The question now facing Europeans is whether to try to negotiate away this existing never will have — nuclear "grey zone" disparity, for weapons.

third round of SALT talks, or to be boost their own arsenal with medium-range nuclear weapons and bergain from a stronger

The first option raises the question of what concessions Moscow would seek from Europeans who had little to offer on medinm-range rocketry. The second option is open only if the U.S. would be willing to

Herr Herbert Wehner (letf), powerful parliamentary leader of the SPD, is stirring public. discussion of a dilemma facing the whole Western alliance, namely the appropriate response to the build-up of Soviet medium range nuclear rocket forces. The problem has long been recognised and is growing more urgent.

supply medium-range missiles to Europe and the Europeans would he ready to have them stationed on their territory. West Germany is in a particularly difficult position. It has a long common horder with Warsaw Pact countries. It has never had stationed on its territory nuclear weapons which could directly hit Soviet soll. It has not had-and insists it

It recognises that there would

be serious political con-sequences in East and West if it even conveyed the impression that it wished to have nuclear arms. Not least, its detente policy would be endangered. With it hopes could disappear of further improvement in relations with East Germany,

Herr Wehner has for many years played a powerful role-often behind the scenes—on behalf of West German detente with the East. It is, therefor, not surprising that he should now be in the forefront of those pointing to the dangers of a new nuclear twist in the arms

The one point that is certain is that Bonn will not allow itself to be put into a position where it alone has such U.S. supplied weapons stationed on its territory. It is convinced also that the U.S. must first offer to supply the weapons so that the

whole alliance can debate the Meanwhile, Herr Wehner ad-vocates intensified efforts for progress on MBFR by raising the talks from expert to higher political level. And he suggests an East-West summit meeting on disarmament, perhaps in the context of the follow-up conference on European security aod co-operation.

France has already made a similar suggestion, subsequently supported by Herr Schmidt. But such a conference would take time to organise - and the very number of participants would appear to exclude speedy agreement on so detailed and complex an issue as the grey zone. The current German dehate has thus not settled a dilemma, merely emphasised that ao increasingly serious one

Romanians fail to heal Soviet rift

THE TALKS between Mr. Foreign Minister, and Soviet leaders last week ended with a small though significant Romanian concession on the need for "continued consul-tations" with the other countries of the Warsaw

Pact.
The Romanians incurred in November at Soviet anger in November at the Muscow summit of the Warsaw Pact when they refused to increase their defence budget or allow the closer integration of their forces into the alliance's

armed forces. East European informants here said that during Mr. Andrel's meetings with Mr. Alexel Kosygin, the Soviet Premier, and Mr. Andred Gromyko, the Soviet Fureign Williams weither side words Minister, neither side made any major concessions on the foreign policy differences which divide them.

It was taken as significant, however, that in the joint statement published in Pravda, the Soviet party newspaper, on Sunday, the Romanians agreed that it was necessary that consultations should continue between Warsaw Pact countries on questions involving security and the strengthening of

detente. The East European infor-mant said that talks reduced some of the tension in relations between the countries

To manage money matters for a forest products giant like Weyerhaeuser, a man must be as growth-minded as his company. His banker must be the same.

Jean-François Noël, Chemical banker. Photographed with Weyerhaeuser purpose-huilt forest products vessel, Antwerp.

As a recognized leader in modern forest management, Weyerhaeuser has rightfully earned its reputation as the "tree-growing company," and in the process has grown into an international organization with decided financial strengths.

One of those strengths, internationally, is Chemical Bank and Chemical bankers

Chemical bankers. For instance, to service Weyer-haeuser customers in Europe and the Middle East, Weyerhaeuser's European Treasurer's Department and Chemical Bank Brussels have built up an international collection program. It has the flexibility needed to accommodate a wide range of

customer requests. Weyerhaeuser Director Treasurer's Department-Europe, Edmond van Wijngaarden and Chemical banker, Jean-François Noël, Improve on this

tailor-made system continuously.
Every day, a variety of forest products leaves the West Coast of the USA and Canada for delivery anywhere from Antwerp to Alexandria. And Noel helps smooth the way for the Weyerhaeuser customers' everchanging multi-million dollar credit arrangements. Noel is only part of the customer-

banker relationship. Another part is William H. Adams, head of Chemical Bank's San Francisco regional headquarters. As a main link with Weyerhaeuser's Treasurer William C. Stivers, Adams coordinates all groups in the bank as they relate to

the company and has helped Stivers with foreign exchange, domestic and international collection, importing and financing arrangements; he has helped establish on-line communication through ChemLink, Chemical's financial management system, as well as computer-to-computer transmission of lock box information.

Whether the team is Stivers and Adams in the United States or year

Adams in the United States, or van Wingaarden and Noël in Europe, they'll tell you that mutual understanding and respect are what make the relationship prosper. That's what usually happens when corporate officers get together with Chemical bankers. And what results is bottom line benefits for both the company

Uphill battle for the Labor Party

BY JAMES FORTH IN SYDNEY

THE Australian Labor Party, matic figure in Mr. Whitlam's per cent of the workforce was battered at the polts just over mould, he has gone about the unemployed. This will rise 12 months ago, would win an jub in a low-key manner, further next month as more election held now, according to the public opinion polls. Voting intentions are not necessarily the same as actual

returns but the opinion polts are indicative of an increasing dissatisfaction with the Government and its policies and must be of concern to the Administration.
fndependent polls have pru-

duced almost the same conclusions: more than 50 per cent of the electors asked say they would now support Labor, Backing for the Covernment is down to around 40 per cent, which would put the Government out of office. Labor is ahead in every state

except Queensland. Its support is highest in New South Wales and Victoria, where the existing state government is under a cloud following a series of scundais.

It is only three oronths since Mr. Neville Wran, the New South Wales Labor premier, Smith Wales Lahor premier, scored a stunning election victory which decimated the ranks of the Liberals and resulted in the defrat of Mr. Perer Coleman, the state opposition of the coleman and resulted in the defrat of Mr. Senetarly regarded as innocuous, particularly by Government there has in funds

That victory is generally conceded to have been as outch an endorsement of Mr. Wran as a vote for the state Labor Government—whose entire cam-paign was huilt around the slogan "Wran's our man."

State results cannut be taken automatically as guides to the feocral sphere, but the npinion polls also suggest that the popularity of Mr. Malcolin Fraser, the Prime Minister, is continuing to decline and that approval for Mr. William Haydrn, the opposition leader, is increasing.
Mr. Hayden is a leader still
on trial, having inherited from Mr. Gough Whitlam, the former

Labur Prime Minister, a divided and tattered party. Not a charis-

restoring unity to the Labor

Mr. Fraser began 1978 with confidence, having called an election 12 months ahead of time, and 'sweeping back into Government despite a scandal during the campaign over the

Despite a revival of business confidence in Australia, support for the ruling Labour Party appears to be

particularly by Government backbenchers. Restiveness among bockhenchers rebounded on Mr. Frascr after the 1978-79 budget had heen tabled, and the Government was furred by opposition within its own ranks reverse some budget

decisions. Despile disenchantment with Mr. Fraser within the Government, there is no likelihood of closer to fruition and 1979 a challeoge to his leadership, should see a start on some of But, the obvious disharmony within the Government has three new aluminium smelters can bope for is modest econoharmed its public image, while and a petrochemical complex. the continuing economic alump. A decision on whether the accompanied by record and \$A2bu-\$A3hn north-west shelf steadily rising unemployment liquefied natural gas venture has added to its unpopularity.

The farming Robinson, the Finance Minister, industry is enjoying a strong on the risc. The farming under industry is enjoying a strong interest revival, which will take much of the pressure off the halance of payments, and have flow-on effects in the domestic

Over the past few months there has been a strong gain in funds sought by companies. largely for working capital needs, but there is also an increase of capital spending. After a lengthy hiatus, more that A\$350m (£199m) bas been

raised in the industrial debenture market alone. Several large capital intensive projects, largely in the resources and energy sector, have moved these ventures. They ioclude \$A2bu-\$A3bn north-west shelf the unemployment front. That liquefied natural gas venture leaves Mr. Fraser with only will proceed is expected late in 1980 to regain favour with the electorate

All this has combined to engeoder a revival of confi-dence within the business school leavers register.

There are some eccouraging signs for the Government. The hight-inflation first policies bave cut inflation from 13 ner can be seen whether the Government can huild on this mood. In the past week the Government can have the formula or the past week the ment was dealt a major hlow hy the news that the cost of living has risen much more sharply than expected in the fourth quarter.

Moreover, the cause was to be found in the budget, mainly higher excise on alcohol, robacco and petrol. The Government aimed to offset these increases by changes to the health service system, but got

its figures wrong.
The result was that the consumer price index rose 2.3 per cent, an annual rate of 9.2 per cent, which makes ir unlikely that the Government can mee its target of an inflation rate of around 5 per cent by mid-

1979. The Government is now under pressure to increase interest rates. That would be a reversal of a policy which has seen official rates steadily reduced over the past 15 months — most recently in November.

An interest rate revival with the seasonal tax liquidity run-down approaching almost cer-tainly would result in a tight credit squeeze in the second quarter. But the Government still needs to sell its bonds to the non-bank sector if it is to fund the budget deficit without resorting to the printing press, and to bave any success it probably would have to increase

interest rates. The Government has two years to run before an election must be held. The hest that it mic growth over the next 12 months, with little beadway on

STEWART FLEMING looks at the New York property scene

Room for recovery in midtown Manhattan

WHEREVER YOU turn in the better-heeled sections of mid-town Manhattan these days. yon never seem to be very far from a big construction pro-

Encouraged in some cases y substantial new tax International Business Machines, American Tele-phone and Telegraph and Philip Morris are in the throes of huilding office accommodation. For the first time for several years there are plans to huild hotels in New York and refurbish existing hulldings.

It would be all too easy to cooclude that these superficial aigns of prosperity mean that business in New York bas sbaken off its hangover from the fiscal crisis of 1975. New York newspapers are

increasingly reporting that middle class families are returning to residential areas. Often young professional people, frequently without children, they are said to be ready to accept smaller apartments, dirty streets and the dangers of crime in order to live close to their work and eojoy the cultural services of

the city.

These young people are also causing the "gentrification" of rundown districts, huying up old properties and recovating them in much the same way that has been seen in Loodon.

Geotrification henomenon restricted to a few neighbourhoods and. while some suggest that the trend could lead to a renaissance of New York City as a service industry-based economy, there are formidable obstacles. The New York City school system and the cost of private education are

Property boom . . .

The commercial real estate market's revival also needs to be put in perspective. A recent article in the New York Times tabulated the office completions in the city since 1947.

In the seven years between 1957 and 1964, completions average between 5m and 7m sq ft of rentable space a year. As the U.S. property market hit boom cooditions at the beginning of this decade. New York became frenetic, with close to 31m so ft of rentable completed in 1971 and 1972. As the economy went into a slump in 1974 and hanks took hillions of dollars of real estate loan losses, the New York property market collapsed. Speculative buildings were left empty, rents plunged and in 1973 only owt new office buildings were completed comprising 349,000 square feet. One was in Chinatown, and the largest,

on Fifth Avenne, totalling 300,000 feet, was built for the Pahlevi foundation. This year the new space to be completed is not much greater. By 1980, however, over 2m square feet is due to yesterday. be completed, including the first new office huilding to be built in the Wall Street financial district for several years, an office for Continental Insurance,

Tower blocks

By 1981 the pace is expected By 1981 the pace is expected to quicken again, however, with 30- and 40-storey tower blocks due to be finished for IBM and A T & T near Madison Avenue and 57th Street and several other developments including the first truly speculative project. first truly speculative project, an office tower with no tenants

lined up in advance.

Behind this mounting activity lies the absorption of THE Argentinian Supreme powerless to act, to probe dis-Court has reiterated its concern appearances. Most habaas about the number of people corpus writs currently go the surplus accommodation which overhang the market after excess building at the beginning of the decade. Last year was the first since 1969 who have disappeared in the country over the last three Human Rights, which has now years. It has called on the compiled a list of 4,381 docu-Videla regime, in a ruling made public yesterday to restore individual liherties. The ruling away by heavily armed men when employment in the city rose, particularly in service industries such as banking, was in response to a petition claiming to be membera of the real estate, law, medicine and tourism. There were some increases in manufactring jobs, for example printing.

As the surplus was absorbed, filed by 1,221 people on behalf security forces, said that the of 1,542 missing relatives, Supreme Court decision will which asked the Government 10 encourage the relatives of misstake steps to allow judges, now ing people.

rents hegan to rise. According to estimates prepared, by Bankers' Trust of New York, rents have risen in prime midtown locations from around \$11 and \$12 a square foot to nearer \$20 with one or twn sites fetching figures close to \$40 where there is a shortage. Tenants are also being

asked to meet tougher lease terms. While it would be easy to argue that these trends could point to another boom in the New York property market it would probably be unwise to make that predic-Even the rent increases,

when account is taken of infiation, generally only take rents back to the levels of the heginning of the 1970s.
Still, it seems fair to say that the real estate market in the city is much healthier than even a year ago, and that some companies and many foreigners see the city as a moch more attractive place in which to live and do business

than formerly.

Inquiry into NYC finances lifts threat to ex-mayor

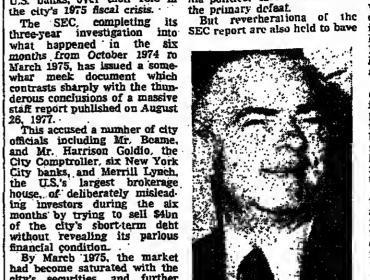

THE Securities and Exchange of the 1977 report, which was been a factor in Mr. Harrison's Commission (SEC) has lifted published a mere 13 days before the threat of disciplinary protectedings against Mr. Abraham decide the party's candidate for the former Mayor of the Mayor of t Beame, the former Mayor of the November mayorsl election.
New York City, a number of the attacked the SEC for doing other officials, and some leading "a political hatchet joh," and

staff report published on August 26. 1977.

This accused a number of city officials including Mr. Beame, and Mr. Harrison Goldio, the City Comptroller, six New York City banks, and Merrill Lynch, the U.S.'s largest brokerage house, of deliberately misleading investors during the aix months by trying to sell \$4bn of the city's sbort-term deht without revealing its parlous financial condition.

By March 1975, the market had become saturated with the city's securities, and further sales became impossible. By November of that year, New York started to default. Mr. Beame was the most immediate and obvious victim

U.S. banks, over their role in the city's 1975 fiscal crists.

Since the report's publication, the banks bave also vehemently denied its allegations that they misled investors and that they were reducing their holdings of city notes while marketing new issues. Those named were Chase Manhattan, Citibank, Chemical Bank, Morgan Guaranty Trust, Manufacturers Hanover Trust

and Bankers Trust. In the SEC's final statement on the matter, it sidesteps the issue of individual and corporate htame, and argues that the public interest would best be served by legislation to remedy the current lack of regulations governing the issue and marketing of municipal securi-

Austria cuts trade deficit

AUSTRIA'S VISIBLE trade deficit last year was reduced by 24.4 per cent to Sch 55.8bn (£2.06bn). The nnexpectedly large fall was primarily due to tha 45.5 per cent drop in car imports. In this area alone the import bill fell by Seh 9bn.

In all, exports rose by 8.8 per cent to Sch 176.1hn while imports were down by 1.6 per cent o Sch 231.9bn.

However, if one excludes the easonal factor of sharply reduced car imports as a result of the steep increase of Value Added Tax on consumer durables as from 1978, the import bill minus cars would neverthe less bave shown a rise of 2.4 per cent. And if one deduct cars from the beading of machinery and transport equip-ment, the figures would show instead of a drop of 10.1 per cent, an iocrease of imports by

For fuel and energy, the overall import bill was np 2.7 per cent to Scb 24.9bn. While imports of crude oil were up by 5.2 per cent and natural gas by 33 per cent, sales of solid fuels dropped by 7.3 per cent compared to the year before. In terms of regional distribu-

tion, the statistics reveal that the European Community accounted for 65 per cent of total imports and was a market for 52 per cent of Austrian

HK rail contracts blow to Japanese

APAN'S THREE major heavy nouncement) that all of these lectrical companies. Mitsubishi Electric, Hitachi and Toshiba, are nursing their disappointment today at being passed over for the second time running in the placing of contracts for the Hong Kong mass transit railway project.

The Japanese claim that their hids in the 1978 round of tenders were once again "highly competitive" whether British companies competing for the same contracts have enjoyed "political advan-

It is further claimed that the "UK opposition" knew the prices being quoted by Japan but that the Japanese side did not manage to discover the British prices.

The three Japanese companies involved formed the HMT (Hitachi, Nitsubishi, Toshiba) consortium in order to place blds for HK\$500m (£52.7m) worth of rolling stock for phase two of the Hong Kong project.

They also submitted tenders for HK\$75m worth of power supply equipment. HK\$50m worth of escalators, HK\$100m worth of environmental cootrol equipment and HK\$9m worth of radio equipment.

The industry was informed late on Monday night (a few bours before the public an-

contracts had been placed with European suppliers, with the exception of the environmental control contract which has yet

This repeats Japan's experience in the summer of 1976 wben a series of wbat were claimed to be highly competitive Japanese bids were passed over in favour of tenders from the UK and Europe.

The HMT consortium appears to have focused its main effort during tha final two months of last year on securing the HK\$500m rolling stock contract which was not only by far the largest of those on offer but would also have provided work for a larger number of Japanese

companies than the others. Because of the importance attached to the rolling stock order, the HMT consortium offered the Hong Kong Government a package deal which made the prices quoted for the four smaller contracts conditional on whether or not Japan secured the rolling stock cootract.

A spokesman for the consor-tium suggested to the Financial Times last night that Japan could probably bave secured one or more of the smaller contracts quite easily if the Japanese offer bad not been packaged in

A FINANCIAL TIMES SURVEY

CONTROL **ENGINEERING MARCH 28 1979**

The Financial Times proposes to publish a Survey on Control Engineering. The provisional editorial synopsis is set out below.

Introduction: The use of microprocessors is likely to have a major impact on the control engineering industry. The impact of UK Government policies, and efforts to stimulate the awareness of customers.

The Majnr Markets: The US is the largest single market, in an industry which is becoming more and more international.

The Main Industrial Sectors: Trends and examples of control engineering in particular

Manpower and Social Implications: Requirements for skilled engineers in the industry and the relationship between automation and The Microprocessor: Its relationship to

analogue sensors. Implications for distributed control and the interaction with larger mini or mainframe computers.

The Future: The fully automated factory, implications of telecontrol and lessons from advanced avionic techniques.

have to be drained in the in-terest of safety, MPs bave been

The canal network is slowly grinding to a balt, no new materials or fuel have been ordered since December and staff were leaving in daspair and depression, Mr. Donald McCance. the British Waterways Board general manager told the House of Commons sub-committee of the Select Committee on the Nationalised Industries.

The board had been allocated £10m by the Environment De-partment in November 1977 for urgent repairs. Half of the money was to bave been spent in 1978-79 and balf in 1979-80 but the board had been refused permission to spend the money on extra staff needed for the repair programme. The Gov-ernment bad also refused to allow the board to raise super-visors' salaries in line with the

repair programme. The supervisors failed to win substantial rises in the first year of Government pay policy and as a result, were now paid £700 less than tha men they super-vised Mr. McCance said.

The supervisors earned up to 70 per cent less than their opposite numbers in comparable

Most of the men subsequently Board.

SOME OF Britain's canals may bad refused to work normally, have to be drained in the in- The repair programme had not started and a number of canal

structures were closed last week in the interests of safety. The stoppages will not affect use of the 1,100 miles of commercial waterway, but some canal sections had been closed. "This is an absolute tragedy, and it will take us years to get

over the damage,"
Mr. Russell Kerr, MP, the
committee chairman said that
there had been a long catalogue of complaints about Government handling of the board.

The board bad a statutory duty under the 1968 Transport Act to maintain the waterways. But after more than seven years of indecision by the Environment Department the board still did not bave the money needed to carry out its duties.

Mr. Kerr called for the board to consider alternative methods of publicising its case. But Mr. McCance said that too much adverse publicity could stop people hooking canal boliday. Many small boat hire companies on the canals could be rained if people cancelled holidays this year, he sald.

He agreed with Mr. Kerr that there should be a debate in the House of Commoos over the Government's bandling of the

Marathon rescue talks hit snags

BY RAY PERMAN, SCOTTISH CORRESPONDENT

AN ATTEMPT, sponsored by the Government, to save the U.S.-owned Marathon nil rig yard at Clydebank is in difficulties following a disagreement over terms. The Scottish Office announced

efore Christmas that it was to set up a joint company with the British National Oil Corporation and British Gas to order a rig from Marathon and so preserve

employment.

However, three weeks of negotiations between Marathon and the oil corporation, which is acting for the State consortium, bas resulted in an impasse. Mr. Ian Clark, a BNOC distance and a terror of the state of the director, said yesterday a firm offer bad been made and the company had been given until the middle of next week to reply. The two Marathon-executives involved in the talks have. flewn back to Houston to consult their principals.

Mr. Clark said negotiations had been tough, although the atmosphere was friendly. "We mentioned prices which they cknowledged as reasonable, but they bave their own particular difficulties and indicated to us that ou prices would not induce them to accept an order."

The offer taken back to Houston is understood to have been slightly increased by BNOC, but it may still not be sufficient to ensure an agree-Government bas been

pressure from trade unions to keep the yard open and shop stewards are to see Mr. Bruca Millan, the Scottish Secretary, in London today. Work on a rig for the Penrod so far to intervene. Drilling Company is virtually complete and the yard has been unable to find other :work. About 150 of the 1,100 workforce are taking It in turns to

. . negotiations tough."

BNOC wants to order a Le Tourneau 116 jack-up rig from Marathon for use in shallow waters around Britain and this could cost about £15m, although as much as £4m would be accounted for by equipment supplied by the purchaser. The exact price will depend on specifications and the availability and cost of steel and other raw materials.

BNOC has insisted on a tough line in the bargaining and the Government, which faces criticism in a Parliamentary question later this week over its rescue of Marathon two years, ago, bas shown no inclination

Mr. Clark said: "The Corporation has instructions from Parliament to act on a commercial basis. If anyone wants us to go beyond that, we would

Brae Field oil operators open pipeline talks

BY KEYIN DONE, ENERGY CORRESPONDENT

MARATHON OIL bas opened negotiations with the Occi-dental consortium and British Petroleum over using the Piper or Forties Field pipelines to bring ashore crude oil from its prospective Brae Field develop-

The field, in block 16/7, east of the Orkney Islands and near the Norwegian sector, has been one of the most difficult North Sea discoveries to assess.

Development has been held up for many months because of

up for many months because of disagreement among the partners about bow the field should be exploited. It appears that most outstanding differences have been resolved and the Brae consortium is expected to apply to the Department of Energy for development approval by early summer. approval by early summer.

The project is expected to cost between £600m and £700m

and will be based on a singla conventional fixed steel plat-

At least three separate struc-tures have been discovered in the block, but the initial devel-opment scheme will concentrate only on the South Brae Field, believed to bave recoverabla reserves of 225m to 300m bar-rels of crude oil. Peak produc-tion will be about 100.000 barrels a day.

The closest connection would The closest connection would be the Piper and Claymore Fields, about 50 miles away, linked by pipeline to a terminal at Flotta, in the Orkneys. Occidental recently signed a deal with Texaco for transporting crude oil through that line from the Texaco Fleid. the Tartan Fleid.

BP's Forties Field, 90 miles from Brae is linked by pipeline to Cruden Bay, north of Aber-deen, and by land pipeline to the Firth of Forth.

The Brae Field bas a high ratio of gas to oil, but, initially at least the consortium plans to re-inject the gas. Gas recovery is complicated because the gas contains a significant proportion of carbon diaxide

and hydrogen sulphide, which might cause corrosion.

Sufficient methane (natural gas) is present, bowever, for the Department of Energy to insist that natural gas should not be flared into the atmosphere.

sphere.
The department has tried to pursue a policy of pressing for the maximum recovery of all hydrocarbons, including natural gas and natural gas liquids, before approving recent

Surprisingly, it relaxed that policy recently in allow for early development of Phillips Petroleum's Maureen Field, to provide more work for the hard-pressed offshore supplies industry.

That approval has closed some options, such as pipeline links between Brae and Maureen and some other prospective North Sea developments. But a gas gathering plpeline between fields such as Brze, Toni/Thelma and even the Slelpner Field, in eventually prove possible.

The partners in the Brae Field are Marathon (nperator), British National Oil Corporation, Bow Valley, Kerr McGee, Ash-land, Ashland Canada, Slebens, Saga and Louisiana Land and

Poor year for UK plastics industry

By Sue Cameron, Chemicals' Correspondent

UK PLASTICS consumption rose by 4.5 per cent last year but much of the growth was in imported materials, according to The survey published yesterday.
The survey in the latest edition of European Plastic News, is based on official figures. and estimates. It says that although the 4.5 per cent growth figure was "relatively satisfactory in consumption terms." it was "too often" imported materials that achieved the extra tournage levels.

UK plastics producers, it says,

had lower production levels for both bome and export sales in 1978 than in 1977. The lot of the UK manufacturer was there fore "not a happy one."

1978 was the year when prices of commedity plastics plummeted down from already unsatisfactory levels to rock bottom figures, probably thought even 12 months ago to be indi-crous when viewed against the UK's steady inflation.

Additionally, the offiake increase was mainly achieved by the bulk polymers with the bigher value engineering plastics basically stagnant."

Aggravated

The survey says that the plastics price war in Western Europe was aggravated by cheap polymer imports from Eastern

"The volume of these materials was not massive in tonnage terms and, in fact, generally, it was rather small when taken in the context of the overall market. Yet the turbulence created in the mar-ketplace by small lots of very cheap material can be likened to a stone dropping in the centre of a pool of water, the ripples created spread across the pool completely, and a cheap spot

price was soon talked of as the going rate."

The outlonk for the UK plastics industry in 1979 saya the survey is "not particularly promising but there is undubtedly promising but there is undubtedly soone for imprisement even scope for improvement even allowing for the relatively flat economic situation throughout

Cocoa rally halted

By Richard Mooney THE SHARP rally in London

cocoa futures prices ran out of steam yesterday afternoon but only after continued speculative buying bad pushed the May position up a furner £40 to £1,792.5 a tonne during the day. May cocoa subsequently slipped to £1,766.5 a tonne at the close, only £13.75 higher on balance, in response to renewed. beavy selling from the Ivory Coast. Dealers said sales of Ghanaian cocca products and rumoured offerings of Ghanaian beans also encouraged the fall. In Boca Raton, Florida, mean-while, an Ivory Coast official said his country was concerned about low cocos and coffee

Mr. Rene Amany, general director of the Ivorian Stabilisation Fund, who is attending the Internation Coffee Convention, said farmers might begin to abandon these cash crops nuless prices improve. "Coffee is becoming less and less interesting for the Ivory Coast as prices

fall," he stated. Mr. Amany estimated the Ivory Coast 1978-79 cocoa crop at 250,000 tonnes, down from 296,000 tonnes in 1977-78. But he thought the coffee crop 196,000 tonnes last season.

Appearances mean as much to us as they do to you.

For someone in your position, appearances count. And the car you appear in is just as important to us as it is to you.

We have a tradition of producing outstanding cars of quality and distinction. And we believe that no luxury car has quite the same combination of style, performance and comfort as the Lancia Gamma. For a start, if you like unashamed luxury and refinement you will appreciate the obvious care we have taken.

The interior is roomy; thick pile carpet is fitted door to door and the roof is beautifully quilted. The seats, which are contoured and thickly padded,

have adjustable head-rests and are covered in an elegant and luxurious cloth fabric.

The steering wheel is adjustable, the windows are electrically operated and, in the case of the Berlina, the drivers seat is adjustable for both height and tilt. In terms of performance, the Gamma is a thoroughbred Lancia. The powerful 2.5 litre boxer engine gives outstanding acceleration, through a smooth 5-speed gearbox, and a top speed of over 120mph.

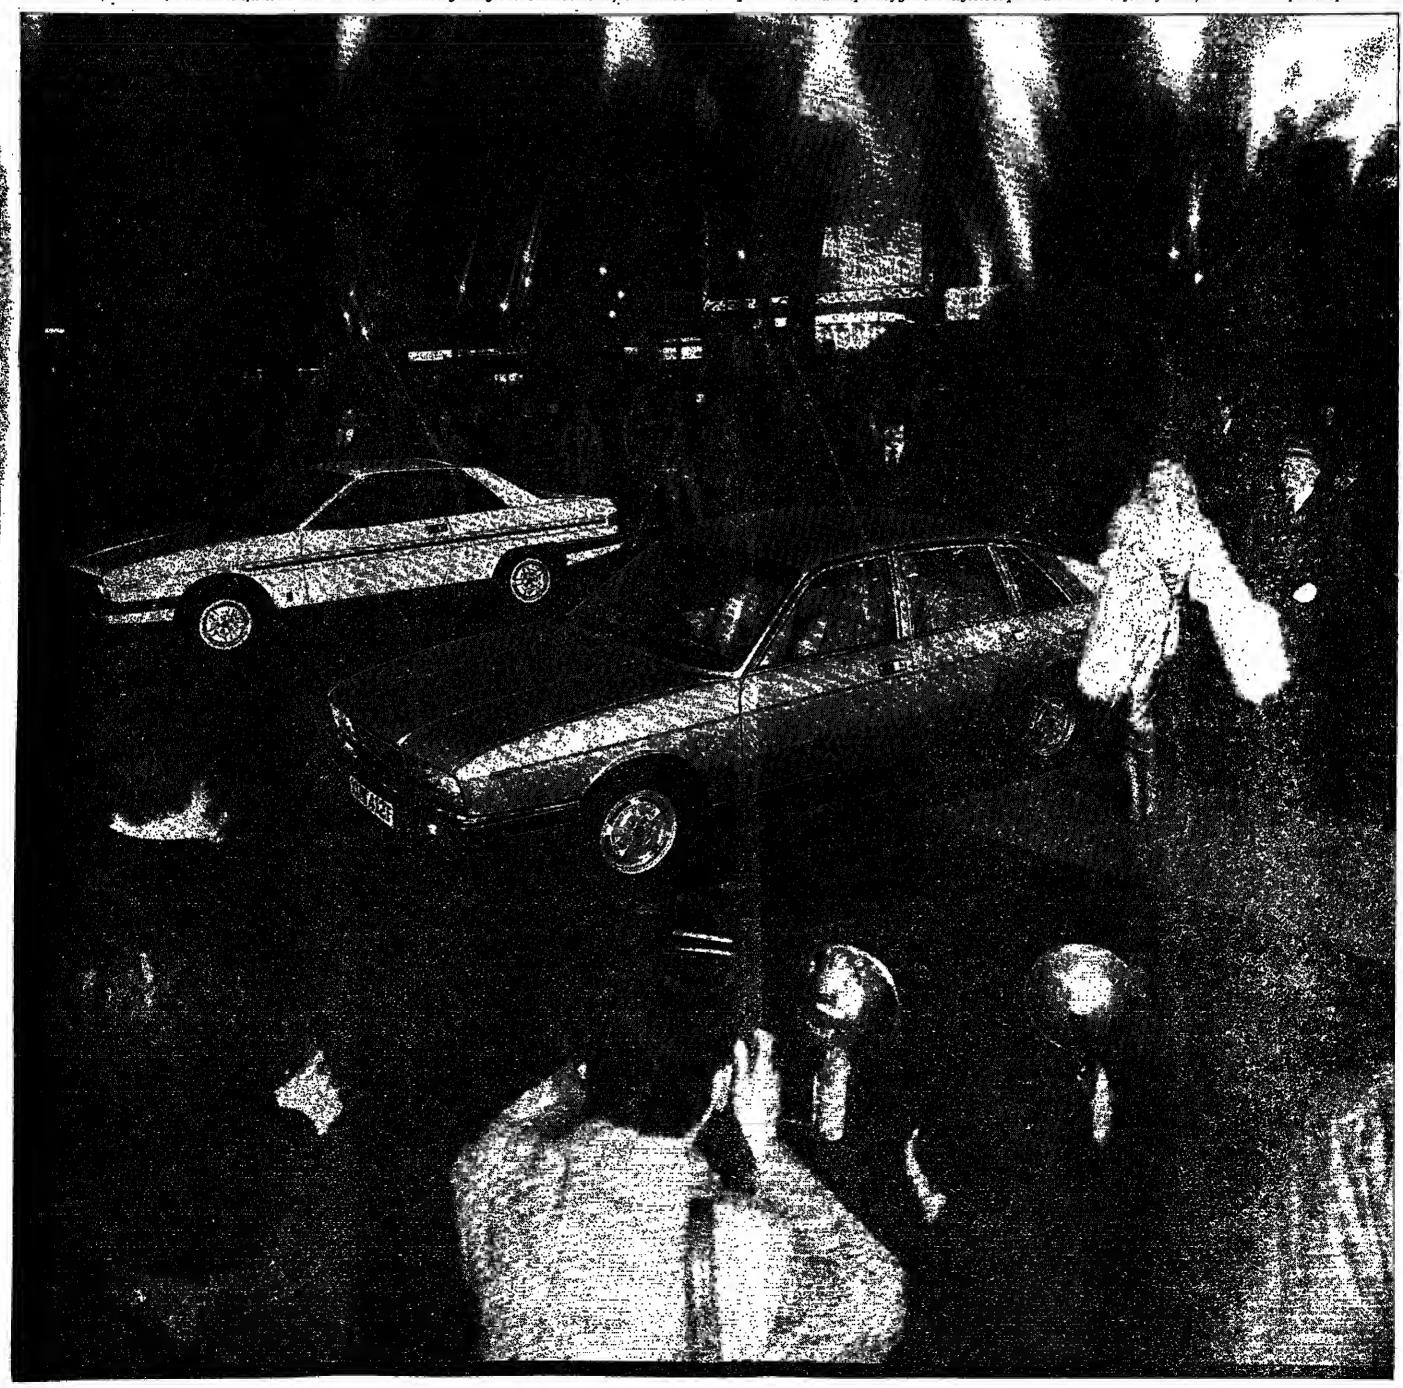

Like every Lancia, the Gamma has front-wheel drive for impeccable handling and roadholding. Steering is power assisted and dual system brakes provide exceptional stopping power. Which means that the Gamma handles like a car half its size. The result is a luxury car that performs as well as it looks. Whether you want to drive or to be driven. If you would like to test either the spacious Gamma Berlina or the stylish Gran Turismo, talk to your Lancia dealer. He will demonstrate that the Lancia Gamma is everything it appears to be.

LANCIA. The most Italian car.

Lancia (England) Ltd., Alperton, Middlesex. Tel: 01-998 5355 (24 hour sales enquiry service).

The Gamma Range: Gran Turismo 2500-£9,185.67. Berlina 2500-£7,135.83.

Prices include VAT at 8% and car tax, inertia reel seat belts and delivery charges on UK mainland, but exclude number plates. Personal Export: If you are eligible to purchase a Lancia free of taxes, contact our Export Department.

£300m scheme to improve UK coal preparation

THE NATIONAL Coal Board will spend £300m over the next marketing, announced yester-

In a statement read on his behalf by the Association of Mining. Electrical and Mechani cal Engineers' symposium on coal preparation, Mr. Davies said the NCB was intant on improving coal quality and consistency.

The prospect of further imports of coking coal by the British Steel Corporation, parlicularly for the new Redcar plant, had led the two indus-

Familiar dilemma that faces Edwardes VOLUNTARY redundancies are

welcome enough at Brinsh Ley-land: the men are only too pleased to take the money. The difficulty facing Mr. Michael Edwardes, BL chalrman, in the latest crisis, is to gel the em-ployees who remain to achieve the same level of output. That ia a dilemma that has

confronted many past manage. December's two-to-one vote by

100,000 manual workers at BL Cars in favour of the company's package, which would have increased earnings by up to 16 per cent. was regarded in many quarters as a triumph.

The company offered a threepart deal. There was a "nn

trings " 5 per cenl increase, in itself a gesture of good will considering that the Govern-ment was insisting that that was the maximum under pay policy. The other clements depended upon improved output to he selffinancing. BL agreed to meet from this month the overtime and shift awards negntiated nationally with the Engineering Employers' Federation.

Breakthrough

The Government and the federation made clear that such payments, worth £4 a week on average to many of the 20,000 workers at Longbridge, should be set against the 5 per cent. BL's decision to make the caused a stir in Parliament at hanlage strike, 5.1. the time and were considered an

important breakthrough by the maintains that in fund payments the unions call for a total strike. The isue that baa provoked the strike threat is the programme towards parity — the same wage for the same job, regardless of plant-by Novem-Management for years has seen the reform as the way to

settled the BL's industrial relatinns and to prevent leapfrogging pay claims.

According to management, performance to instify such payments, worth up to £10 a week for employees at lower-paid plants such as Longhridge and

Cowley, is measured against output in 1977. That year, when the company suffered the month-long toolmakers' strike, an eight-week dispute at the Lucas components company and disruption at Speke, saw an average ontput of 5.77 cars a man.

Advertisements Management maintains that parity payments might be

awarded this month, but back-dated to November 1 last year, required and agreed 7,000 volunprovided that output of 6.16 cars tary redundancies. were achieved in the period to April this year, 6.34 cars to agreement upon which the ballot October; and 6.52 cars from of the workforce was conducted November onwards. In reality, BL argues that insists that negotiators were stocks of BL cars, particularly output in November last year, surprised at management's in the volume Austin-Morris because of the strike at tha announcement that parity paymodels. However, as Mr. Ray Drews Lane component plant, ments had not been earned. Horrocks, the Austin-Morris fell to 3.5 cars. In December payments a supplement, pro- it was 5.2, and in January, vided they were self-inanced, partly because of the road On that hasis, management Coventry on Monday to endorse mers.

back to November would require a level of 7.3 cars this month and next. It considers that In full-page advertisements in the local and national Press, BL

Advertising controls under study

By Maurice Samuelson

A WORKING party to discuss the need for more statutory powers to control advertising "deficiencles" has been set up by Mr. Roy Hattersley, the Prices Secretary.

In a written parliamentary answer, he said that he hoped the working party, including representatives of the advertising industry and Covernment, would meet in about two weeks and produce proposals hy the summer.

The Advertising Association said it "welcomed" the inquiry but had not yet decided who Mr. Hattersley told Mr. Mike while self-regulatory control was the best way to respond to public opinion, "certain identi-fied deficiencies in the existing

system might best he remedied by the addition of some new statutory powers." The working party had been suggested by advertising industry representatives at a meeting last week with the Prices Department. Both sides had been in broad agreement on the principles which should govern effective regulation of advertise-

Dismissal of MP from union 'illegal'

MR. EDWARD MILNE, the former Labour MP, was never legally dismissed from the Parliamentary panel of the Union of Sbop, Distributive and Allied Workers, a QC claimed in the High Court yesterday.

Any decision to dismiss him was a nullity because he had not been given a chance to appeal to a union delegate meeting, as was his right under union rules, Mr. John Macdonald, QC, tuld Mr. Inclea Foster

Justice Foster.
Mr. Milne, 62, a former
USDAW area organiser, is challenging the union's right to deny blm office. He elaims salary arrears—estimated by Mr. Macdonald at about £14.000—or damages for loss of office.

He is also seeking a declaration that, since entering
Parliament in 1960, he bas
been retained in the union's
service, and that after February 10, 1974, when Blyth
constituency Labour Party
decided not to readopt him,
he had been entitled to a post
by USDAW not less than area
organiser.

organiser.
Mr. Milne clashed with the union after he stood as an independent Labour candidate for Blyth against the official candidate, Mr. Ivor Richard in the February,

1974, election. USDAW, who bad sponsored him as an MP, dismissed him from their Parliamentary panel.

Mr. Milne, giving evidence, said that since leaving Parliament his only income bad come from lecturing, writing and television work. He bad accepted a lump sum from USDAW in respect of bis superannuation entitlement because Parliament paid only three months' "redundancy to MPs who left the House. The hearing continues.

Basic rises of 33% demanded for 2.5m engineering staff

of Engineering Workers, yesterbehalf of 2.5m engineering workers, which calls for in-creases of 33 per cent in basic

Mr. Boyd said that every engineering employer had to recognise that the claim was reasonable. The basic rates claim, for an increase from £60 to £80, appeared larger than it really was since company- and plant-level agreements, on top of the national minimum, meant that a £20 increase in basic rates would not necessarily amount

to £20 new money.

Writing in his union's journal,
Mr. Boyd said be boped the Engineering Employers' Federation would reply to the claim "in an equally sensible responsible fashion, without the necessity of long drawn-out de-

Consumer Council suggests that 76 per cent of people want an Independent council set up to recommend national pay guide-The poll was conducted last

week. It shows approval of the idea of a pay council by sup-porters of the three main political parties as well as trade unionists and non-unionists.

Of those in favour, 67 per cent said the council should recommend the level of increases the country could afford; 62 per cent wanted it to decide which groups of workers deserved special treatmant; and 60 per cent thought it should resolve hav different it should resolve pay differentials.

Fifty-seven per cent wanted it to decide which productivity agreements were genuine and natinnal minimum wage, while 49 per cent thought it should set a ceiling to increases.

The poll was carried out by MORI (Market and Opinion Research International) and 1,038 people aged 18 and over in 52 narliamentary constituen-

Industry faces crucial months

By Paul Betts

THE NEXT months are likely to be crucial ones for the future of the Italian engineering industry—one of the back-bones of the country's industrial structure which has played a dominating role in the rapid industrialisation of Italy during the past three decades.

After the difficulties of the

post-oil-crisis years, serious efforts have been under way in the past few months to attempt to tackle those fundamental distortions and struc-tural defects that continue to tbreaten the overall development of the economy and, in particular, of the engineering industry. But these efforts are now jeopardised by Italy's fixed investments has dropped undertain political outlook from 20.6 per cent to 16.9 per following the fall of the cent. minority Christian Democrat Government of Sig. Giulio Andreotti last week, and the threat of an early general

Uncertainty

In a climate of growing political uncertainty, serious efforts are nonetheless underway to attempt to tackle those fundamental structural defects that continue to threaten the overall development of the economy and, in particular, of the engineering sector.

During the past two years, the engineering industry has been badly hit by the restrictive monetary policies introduced at the time of the last lira crisis, limiting the annual rate of economic growth to barely 2 per cent: While inflation has been redoced from the excessive levels, some 12 months ago, of more than 20 per cent to just nuder 12 per cent, it still remains well over the European

Italian Engineering

A Government crisis threatens the overall development of Italy's economy and, in particular, the hard-hit engineering industry, which is also faced with a combination of low profitability, inadequate cash flow and high credit costs. This has meant cutbacks in capital investment by the engineering sector, one of the mainstays of Italy's industrial structure.

annual increase of labour costs has lept to 18.65 per cent. In turn, the nominal growth of

Interest rates, though lower than a year ago, still remain high, and since the stock market continues to play a marginal role in the economy, the industry has been forced to turn to expensive short-term borrowing when it

bas needed cash. Dwindling output and cash-flow problems have had many nasty effects. It has meant, at times, lay-offs and plant closures. Even an Industrial giant such as Fiat recently had to lay-off temporarily for a month its 12,000 workers employed in its commercial vehicles division as demand in this sector dropped by more than 20 per cent in Italy last

In the face of these difficulties, unemployment has con-tinued to grow. There are now some 1.6m people unemployed in Italy, representing about 7.5 per cent of the official labour

But these figures disguise the extent of the problem. More Community average.

Labour costs have continued ployed are young, and the to increase. Between 1966 and official figures do not take into 1968 they rose by an average account the large number of annual rate of 8.46 per cent. But people who are (or have been)

State subsidised salaries.

For the engineering industry, ability, inadequate cash flow and high credit costs has meant cutting back capital investments during the past two years.

time as forcing companies to turn increasingly towards new foreign markets. In a sense, left mainly to their own devices, many private companies have been able, so far, to weather the recession. In large measure, this has been the result of increased and aggressive export performance, but it bas also implied a halt in development.

Production

However, the outlook for the industry has greatly improved. Production is picking up again, although the immediate effect is unlikely to prompt a major recovery in private investments, but rather to bring back plant productivity to normal levels.

The monetary policies of the past two years have resulted in a spectacular improvement in the balance of payments, with a "record surplus of nearly L7,000bn last year.

account-thanks in part to the decline of the dollar which has balanced off the negative effects of rising labour costs on export competitivity—is also expected

to show a surplua last year.

market has seriously reduced plan has now also been drawn plant productivity at the same up to lay the basis for t growth in coming years. The plan aims to reduce inflation from 12 per cent thia year to 9 per cent in 1980 and 7.5 per cent in 1981,

Growth is to increase by an annual average of 4 per cent during the three-year period. Investments in the depressed south of the country are to be stimulated, and, as a token of goodwill, proposals bave already been approved to exempt from taxation (for 10 years) company profits re-invested in the south.

The Bank of Italy has also begun to relax significantly its restrictions by raising the ceiling on bank loans to industry and increasing the rate of credit expansion. This will make an additional L1,000bn available to industry over the next two

tee Department has been set up. Annual lending ceilings for

roll-over basis.

At the same time the gradual phasing out of the so-called "Italian risk" has meant that Italian concerns, including leading engineering groups such as Olivetti and Fiat, are now able to raise funds at highly favourable rates on the international

But the success of the ambitious recovery programme hinges on three fundamental issues. In many respects, they are inter-related. They involve the introduction of an incomes policy to prevent any real increase in wages during the next three years, the reduction of the country's ever-expanding public sector borrowing requirement to release funds for productive in-vestments, and above all, a climate of relative political stability.

For the engineering sector, the incomes policy is perhaps of immediate Negotiations bave now already started for the renewal of the three-year National Labour Contract of members of the Italian Engineering and Metalworkers' Although labour leaders bave

To promote exports, the Although labour leaders bave Italian Export Credits Guaran-recently indicated their willingness to moderate new wage claims and accept the principle 7,000bn last year. medium-term credits have been of labour mobility in exchange For the first time, too, since raised to L3,500bn and, on short- for new job-creating invest-

per cent increase in labour the engineering and metalworkers' demands, according to the industry, are well above the Indeed, employers fear that the so-called "good intentions" of the union leaders are being guidelines spelt out in the economic plan.

Wages

The union is effectively asking for wage increases averaging some L30,000 a month, for the next three years, a shorter working week and greater say in the future investment policies of individual companies.

They bave also made it clear that the union would on no account accept any further modifications in Italy's highly inflationary automatic system of wage indexation, which now covers as much as 85 per cent of eroding effects of inflation on the salaries of workers employed in industry. And in the absence of any thorough revision of the present system, the new monthly wage increases would have to be contained below the L10,000 mark if there were to be no real rise in wages. According to the State-sector Employers' Association, Inter-sind, the demands of the Engineering and Metalworkers

undermined by a more intran-sigent labour rank-and-file, as well as the disruptive influence of the highly militant members

of non-aligned trade union However, in an attempt to reduce the burden of labour costs on industry, there has been a partial transfer of the social welfare charges paid by companies for their employees to the State, Indeed, to promote Investments in the south, the

State bas now agreed to pay all the social welfare charges of workers employed by companies in the Mezzogiorno. While the renewal of the Engineering and Metalworkers' National Labour Contract affects both State sector and private sector companies in the engineering industry, the big State groups represent peculiar problems for the private concerns. The large State groups have,

in recent years, been increasingly polluted by politics with the political appointment of top managements. Although the managements. Although the operating subsidiaries of the Union could raise labour costs by 42.8 per cent by 1981, while large State conglomerates such the National Private Employers' Association, Confindustria, as IRI or ENI, are, in the Association, Confindustria, as IRI or ENI, are, in the industry could estimates that the union engineering field at least, techt he other way.

nologically highly advanced, the use of these groups as vehicles of political patronage, and a long list of scandals, have not helped the "good image of the industry as a whole-

In general, bowever, the image of the Italian engineering industry has not suffered ton much. The intricate network of small and medium-sized companies is considered as, perhaps, the healthiest aspect of the Italian economy.

As many as 90 per cent of Italian engineering companies employ fewer than 200 people, giving them considerable clasticity. At the same time, the larger groups employing more than 1,000 people account for about two-thirds of total production. And among these, both in the State sector and in private industry, there are companies that have built up solid international reputations as world leaders in their apecific fields.

Costs

But the industry stands to lose a great deal in coming years if country's long-awaited economic recovery programme is not implemented in the near between 1976 and 1978, the temporarily made redundant on World War Two, the trade term credits, to L5,000bn on a ments, particularly in the south, demands would result in a 52 future and if the rise in labour

costs is not cut back.
With the latest Government crisis—Italy's 40th since the fall of Fascism-and a fresh out-burst of political violence-the situation is extremely uncertain

again. The Government crisis which formally opened last week stems from the decision of Italy's powerful Communist Party to withdraw its support of the minority Christian Democrat Administration and renew their demands for direct Communist participation in any new government. But the Christian Democrats have flatly rejected this. and unless a compromise is found in the next few weeks, the outcome of this latest crisis will inevitably be an early electoral confrontation.

In such a political climate, there is a serious threat that the painfully worked out economic recovery programme will not only suffer further delays but could collapse completely. Already, some leading international banking institutions are forecasting contained annual growth in Italy this year of about 3 per cent and an annual inflation rate of between 13 per cent and 14 per cent.

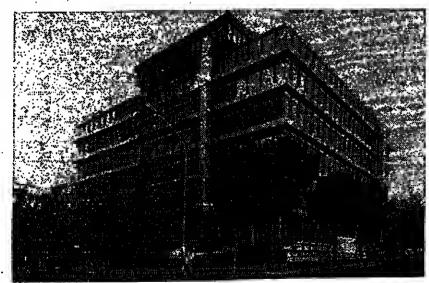

Against this background, the improved outlook of the past few months for the engineering industry could quickly swing

CTIP: **DIVERSIFIED ENGINEERING**

Industrial plants of over U.S. \$2.7 billion engineered and constructed by CTIP in the past ten years. A company in the forefront of its field, with its advanced technology and diversification in many operating

Design and construction of plant for the petroleum. chemical, petrochemical, biochemical, and pharmaceutical industries, and now for the thermoelectric, nuclear, solar, food, cement production and other industrial sectors.

New large-scale projects in Colombia, Turkey, Algeria, Nigeria, Yugoslavia, and recently also in China.

CTIP is an international organisation with branch in Milan and affiliates in Siracusa, London, Paris, Brussels. New York, Coiro and Bogota. The head office is in the EUR business district in Rome. Its offices, there more than a thousand employees—including graduate engineers, technicians, draughtsmen and specialists—work, have all the latest equipment, including full model-shop and latest latest equipment, including full model-shop facilities and a large computer centre.

THE OIL INDUSTRY

Modern refineries are highly integrated complexes based on total automation, consisting of several process units served by general units, designed for optimum safety and efficiency. The most skilled and effective organisation is needed in Planning, designing and brilding a refinery to today'a

CTIP has the resources and abilities required in carrying through projects on any scale anywhere in the world. CTIP offers the whole range of its services, organised in such a way as to ensure that every need that arises with every project can be met.
Of special signficance is the belp that CTIP can provide in the project planning and development phase.

With its wide-ranging experience in this specific phase, CTIP can belp to achieve substantial savings in the investment outlay, greater flexibility in operations and a reduction in running and maintenance costs.

THE CHEMICAL AND PETROCHEMICAL INDUSTRY

Rapid progress in the technological sector has generated a whole series of products obtained by the synthesis of raw materials derived from nature. As the list of these products has lengthened, the number and type of production processes have multiplied, particularly in the petrochemical and chemical industry, where there has been a rapid development of ultrasophisticated and antomated industrial

in the design and construction of petroleum, chemical, petrochemical, biochemical, pharmaceutical, food, cement production, solar, electro-nnclear and thermo-electric plant. Over a period of more than 40 years, CTIP has played a prominent part in the development of Italy's oil industry and has also diversified its range of activities to cover every sector of the economy, building complete industrial expellence for installability and has also diversified the context of the economy and the economy of the economy. complexes for virtually all the leading multi-national companies throughout the world. CTIP does not restrict its work to the technical activity of building plant; it helps to originate every process in the advance of industrial technology. Through its Process and Development Department, CTIP has been responsible for many "grass roots" projects, introducing new ideas with great potential that have subsequently been taken up hy industry. It has established close links with all the leading licensors and

ADVERTISEMENT

CTIP is an engineering company of the BASTOGI GROUP specialising

international research bodies.

complexes.

The technological complexity of the plant involved makes it essential to call on highly qualified engineers who can guarantee maximum efficiency and reliability in operation and at the same time keep investment costs as low CTIP has taken an active part in the

development of the world chemical and petrochemical industry, introducing advanced production processes in eo-operation with many international companies and process licensors. THE BIOCHEMICAL AND PHARMACEUTICAL INDUSTRY

CTIP is one of the most forwardlooking companies in the biochemical

Its engineers have conducted systematic research on biological systems and materials of biological origin and have made direct contributions to developments in fermentation processes, enzyme conversion and the biological treatment of effinent for the pharmaceutical and food industries. The experience that CTIP bas accumulated in the hiological field embraces kinetic research, process evaluation, projection of results obtained in pilot installations on an Industrial scale, optimisation of fermenting agents, enzyme systems and recovery and aeparation opera-tions. CTIP has designed and con-structed the largest biochemical complex in existence today. CTIP ia aware of the fact that future technological developments will be far more wide-ranging than is conceived today and that a leading role in future industrial development will be played by engineering applied to bio-

chemistry CTIP is already committed to a basic and applied research programme, in co-operation with an international body specialising in this field.

THERMO-ELECTRIC AND NUCLEAR POWER

Stone & Webster Engineering and CTIP S.p.A. of Rome bave established a new company, Ensen-Energy Systems Engineering, with bead-quarters in Rome to provide marketing services for the corporations. Ensen is owned 60 per cent by CTIP and 40 per cent by Stone & Webster. In 1976 CTIP and Stone signed two agreements for co-operation in the design and construction of electric power stations in Italy and other countries where Italian financing is available.

SOLAR ENERGY PLANTS For over two years now CTIP has been operating in the field of solar and other alternative energies, through its affiliate CTIP Solar S.P.A.
CTIP Solar S.P.A. was, in fact,

specifically incorporated as a company to specialise in the design and engineering of systems to exploit alternative energy sources. with particular emphasis heing placed on solar energy and energy cooservation. CTIP Solar S.P.A. has a co-operation agreement with SED (Solar Energy Developments) of London for the exchange of information, technology and data relating to the use of solar

Although it has only been established for just over two years. CTIP Solar has already become a fully operational unit with the award to it of several important projects and technical studies by Italian companies and state institutions as well as by clients from other countries.

CEMENT PRODUCTION
ITALCEMENTI and CTIP have recently signed an agreement on co-operation.
The agreement covers co-operation on

feasibility studies, pre-project studies, execution for industrial plants to produce a wide range of cemeots. Under the terms of the agreement ITALCEMENTI, which with 34 placts

-IBM 370/138-and its own staff of specialists in computer sciences, is able to supply clients with information aystems (software) that can help solve problems which arise in the field of information processing.

A good example of the kind of concrete assistance that CTIP cao give its clients is the computerised information system now being realised oo bebalf of the Turkish petrochemical firm, PETKIM, for its complex at Aliaga. This particular information system

consists of the following: -Identification and codification of all materials needed for construction and maintenance: checking of all procurement activi-ties whether performed directly by PETKIM or by its engineering

studies and scientific analysis on new

deposits of raw materials.
Under the new agreement CTIP will

provide the detailed engineering and procurement services and it will also

carry out sales and promotion activities

to acquire new cootracts and financing for construction and-when necessary

CTIP, with its own in-house computer

-act as the Main Contractor.

SUPPLY OF INFORMATION

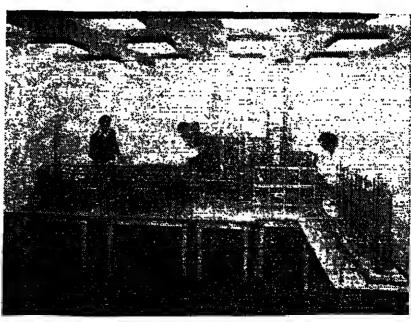

SYSTEMS (SOFTWARE)

control of warehouses for materials used during the construction phase and later for maintenance;

-cootrol of investment costs;
-automatic collection of all data regarding the activities of personnel, checking of personnel attendance

and the planning of shifts;
-planning and control of production. It is worth ootiog that such services are also being supplied to manufacturing companies.

NEW CONTRACTS
CTIP is cogaged in important projects in Colombia, Algeria, Turkey, Nigeria, Yngoslavia and China. In Colombia. Policolaa has commissioned CTIP to design and build an industrial complex for the maoufacture of ethylene. This

Scale model of the complex for ethylene production being built by CTIP for POLICOLSA at Barrancabermeja in Colombia.

In production is Italy's largest cement manufacturer, will supply technical assistance for the design, construction and start-up of new projects, proposals preparation and project ITALCEMENTI, will also provide, when requested, the geological

complex, at Barrancabermeia, will have a production capacity of 100,000 tons per year of ethylene and 60,000 tona per year of polyethylene, supplying ethylene for the production of poly-ethylene to be used by the Colombian plastics industry.

This production will satisfy Colombia's needs for low density polyethylene. This contract will benefit the Italian economy as a whole since it involves substantial services and the purchase of much of the equipment required in the plant on the Italian market In Turkey, PETKIM-Petrokimya AS

has awarded CTIP contracts for the building of a unit with an annual production of 120,000 tons of vinyl chloride and a unit with an annual output of 100,000 PVC. The plant, whose investment costs will

be about \$50 million, is to be designed and constructed by CTIP to a SOLVIC licence and will be located at Aliaga

In Algeria, CTIP is currently working on the complete design and construc-tion of an industrial complex manufacturiog antiblotics and pharmaceu-ticals, now being built near Algiers at Medea, for SNIC (Societe Nationale des Industries Chimiques).

CTIP will avail itself of the co-opera-tion of IBI Istituto Biochimico Italiano, which is to supply much of the required technology. For other installations in the same complex, CTIP uses technologies supplied by SQUIBB & Sons. Inc.

The award of this new project to CTIP represents an outstanding success for Italian industry, for this is the first industrial complex of its type with integrated structure to be huilt in the continent of Africa. Another project on which CTIP is currently engaged is the expansion of

the INA Refinery at Lendava in Yugo-slavia. This includes the construction of the atmospheric distillation, catalytic reforming, catalytic de-sulphurisation units and all general services pertaining to the complex.

The project is especially significant on account of the fact that it is being undertaken in collaboration with the Polish POLIMEX CEROP organisation of Warsaw. CTIP has already collaborated with the Polish Government in developing countries and the present project will consolidate cooperating with this important country. CTIP is also collaborating with

MONTUBI on construction of an oil pipeline network in Nigeria. Recently CTIP has been awarded an important contract in China for the supply of 11 natural gas treating plants to the CHINA NATIONAL TECH-NICAL IMPORT CORPORATION. The plant will be huilt in the province of Daqing in Manchuria.

The contract for the project was recently signed in Peking and it constitutes a notable success for CTIP, which bas been among the first to establish a working relationship with Chinese iodustry.

The contract calla for the aupply of advanced technology, engineering materials, construction superviaion and start-up aervices for all the installations. Investment cost for this complex is estimated at U.S.\$ 30m to be used in the purchase of materials to be procured in the ltalian market.

CTIP has had a delegation of representatives at Peking for some time and negotiations are in course for other important projects. CTIP is currenly negotiating major contracts for plant inside and outside

The company's bigb technology and the outstanding qualifications of its engineers are the ballmark of its work and the reasons why for years it has been in the forefront of every new development in industry.

The name you know

-is everywhere

From the London Area, from Milan, Paris, Madrid, São Paulo New York, we offer you our recowned technology and these comprehensive services-

* Avant-garde process know-how and techniques in LNG, petrochemicals, fertilisers, plastics, fibres, petroleum refining and in agroiodustry - to keep you ahead of world competition.

* Engineering skills, backed by sophisticated, computerised systems - to optimise process plant design parameters.

* World-wide procurement expertise - to purchase modern, efficient equipment with maximum economy.

* Proven construction capability and reliable on-site supervision world-wide - to maintain the critical path up to commissioning.

* Short and long term feasibility studies - to assist your forward planning and protect your capital investments.

* Multi-national export credit arrangements - to facilitate project finaoce and ease currency problems. With Sales Executive Offices in London and Engineering Offices in Busingstoke - Snamprogetti is here to design and build

the plants of tomorrow for you today. Find out more by contacting David J. Coates, Marketing Director, at Stanhope House, 47 Park Lane, London, W.I. Tel: 01-4997177,

STABILIMENTI MECCANICI VM S.p.A.

44042 CENTO (Italy) Via Ferrarese, 29

INTER-COOP

Rome, Italy, via val d'ala 188

Telex: 611145 Intcop

Forty-five million dollars: this is the value of the contract signad a few weeks ago by INTERCOOP and Algeria for the building of two pasta-fectories on a turn-key basis. Thus INTERCOOP, the company for international trade of the Italian Co-operatives League.

Thus INTERCOOP, the company for international trade of the Italian Co-operatives League, marked new and significant progress in its already firm co-operation with the most extensive end populous country of the Magbreb. In fact the two pasts factories (a large number of Co-operative Enterprises and small- and medium-sized private Italian companies will be contributing to their completion) have been preceded by the construction of other notable plants. Three high-capacity mills which will be delivered to the customer within the year and a tinned-foods factory built in the desert and in the most difficult environmental conditions, in the Regione oasis. In the field of agricultural industrialisation INTERCOOP has few rivals in Algeria and has won a commandium notice of the following markets.

in Algeria and has won a commanding position among the European companies working

There is a "secret" explanation for all these successes: INTERCOOP operates with its foreign customers according to a formula of technical co-operation, the only one capable

of guaranteering e constructive and permanent co-operation between industralised and emergent countries and which aim at developing the key sectors of their economy, such as industralisation of agriculture, building and civil infrastructures. Tachnical co-operation signifies staff

training, assistance, start-up of production; and it means above all the opportunity for

collaborating with full confidence, in the programming of economic development through feasibility studies, market research, urban and industrial projects, in close contact with the responsible Algerian authorities. The export thus is not an occasional event, but becomes a long-term relationship between Italian know-how and the Algerian development programmes, a precious experience that has permitted INTERCOOP extend the fields of its co-operation and the Algerian appropriate that has permitted INTERCOOP and Agriculture of the Moramblute, for

end antor new markets, particularly in Arab and African countries. In Mozamblque, for example, INTERCOOP made extensive feasibility studies in the fields of agriculture and the

industrialisation of plant; similar co-operation has been started with Angola. In a number of the Middle East oil-producing countries INTERCOOP will be concluding Important contracts. Thus INTERCOOP presents a panorama of activities and work that represent an active and interesting contribution to the export sales of Italian technology.

To build diesels is not an easy job, but for Stabili-menti Meccanici VM SpA., a company of the Finnanciantica Group with works in Conto in the Province of Farrare, and in Treate, it is a tradition

The effort that in 1978 was rewarded by two prestigrees results: three wend records broken in speed resis on weld and the Consequent title of the "Olesel Engine of the Year" assigned by the lechnical pross to this champron result of mess-production. Thirry years of experience in marine motors es well as in motors for agricultural and industrial epphications, to which should be added the electrical anardy genuieror sets and the renge of hydrosistic transmissions from 30 to 300 hp. have determined those results, thes increasingly attract-

in 1977 the new range of HR-A gil-siz cooled motors In 1977 the new range of RM-A off-size codied motors (VMASYSTEM—Potents No. 28(85A/5—No. 246)?A /77) representing a tree technical revolution in the direct fresh was faunched. A logical segned to this first member of the HR family is the HR-H precombustion chamber series, which, with water cooling, represents a lundamental stage in the evolution of the hight turbo-compressor diesel magnets.

The morket response has been immediate and lialtering. SNAW Maine Concluded an egreement with VM for the supply, during the noxt live years, of ne fewor than 7,000 ents which, complete a ni ne lewer than 7,000 enits which, compled to a linear drive empirical by BMW will constitute an injoid hoser drange of exceptional performance. A co-operation agreement is also belief defined with Alla Ronreo, while ether cor menelacturers have confirmed their particular interest. This is e response that comes as no surprise to a company ground in all world matikets and is more then justified by the leaturus of the PR lamily: mealman perfermance science, high-speed revolutions, ideal power/weight failin, reduced specific consumption in respect of the traditional diosels, minimum exhaust ups emission and above oil one of the first world applications of justifier-emplesses on diesel engines oil the aeromotive indestry.

Such, in brief, sin the losinies of the HR motors which are copulie of satisfying a wide range of applications. from the finditional VM production to pirasure craft and automobiles.

pirasure craft and automobiles.

Membors of this prestinious landly are the HR-A thier injection of old cooled motors up to 3 000 revolutions, and the sours HR-H: Indirect injection, water-cooled motors up to 4 600 revolutions. In particular the HR-H series consists of three basic memors of 4-5-6 cylinders designed to perform with an osnatus surbn-compressor micreasing the power to not 45 per cent. In this way the power of a two-time motor reaches 84 hp. while a 6-cylinder motor of 3 6 lines reaches 150 lp.

In dealgning this diesel lamily the VM company.

on a turn-key basis.

sidered a separate eccessory but a standard part of the project which parmits increasing specific power to 42 hb/hrte while the weight/power ratio remains a mere 1.9 kg/hp, thue very near to that of a point angle.

or a point, angme.

'The HR sales utilizes a tennel base and eligible heads for every cylinder. The driving ehaft rasks on aleminium discs house in large holes made in the sides of the bloc. This particular structure besides allowing for additional strength and competents, reduces both the noise and vibration typical at drozels.

typical et drosels.

These are the first eutomobila diesel engines equipped with a lurbo-compressor as a standard per of the mass-produced models, a system with a ourselecture as it is capable of supplying higher power to lever expired paperly cers. In motor-car applications the terbo-compressor permits, specifically, a power increase up to the lever's of pelrol motors without increasing weight and dimansions, reduction of cost per horsapower and reduction of each per horsapower accepted by the most strict European and American regulations.

The VM turbo edopted the well-known German KKK turbo-cumpressors of the K 36 series capable of regionorating about 70 per cent of resident exhaust

entry.

VM didsel angines can, therefore, match the perlormance of petrol meters; already the 84 hp of a
4-cylinder turbo are capable of making a mediamsized Europoan saleon car ren at a seedy 160 hm/h,
with acceleration compareble to that all about 100 hp
internal combustion motor. Tangible proof at all
this are the three recent world records mentioned
above, set by the VM HR 632 HT motor; a 3,590 cc
6-cylinder angine mounted on a 5m 3 point hell,
driven by Ing. Suzzir, the builder, during texts on
Lake Sobaudis.

The sverege speed obtained on the timed kilometre was 165.588 km. in (previous record 140.6 km/h); on the 24 miles long distance test on everege speed of 128.684 km/h was obtained (previous record 76.59 km/h); while 128.184 km (previous record 76.59 km) were covered in an hour dening the long distance

tosi.

Another estimenting isature of this sevenced family of diesel angines is their returbility: the VM engines were designed to operate in any conditions and the HR-H scrips were best to ledestrial critarie.

ITALIAN ENGINEERING II

Moves to boost tractor exports

A STRIKING difference between Italy and the UK in the agricultural and construction equipment industries concerns the strength of foreign-owned companies. The British tractor market is dominated by four North American companies
—Massey-Ferguson, Ford, International Harvester and Tenneco-Case—all of which have established or acquired manufacturing facilities in the UK. In Italy, by contrast, the two biggest tractor manufacturers are Italian-owned-Fiat, with about 40 per cent of the domestic market and SAME-Lamberghini with a combined share of about 23 per cent. In third place comes the only substantial foreign-owned producer. Landini, which was acquired by Massey-Ferguson in 1959. The combined Massey-Ferguson-Landini share of the Italian

is about 14 per cent. In most branches of engineering a strong position at bome is the essential base on which to mount an attack on world markets. But the great difficulty which European makers of agricultural and construction equipment face is the entrenched position of the North American companies, notably Caterpillar, in most major markets. These companies, operating from a secure home base, are not only very large, but they can usually offer a broad line of complementary equipment and so tend to attract the best dealers.

other Massey-Ferguson plants)

Strategy

Flat Trattori, which under the new de-centralised Fiat management. structure . has much greater autonomy than in the past, has been evelving a new strategy to overcome this disadvantage. For a number of years Fiat has been a major tractor manufacturer, ranking fifth in the world leagus behind Massey-Ferguson, John Deere, Ford and International Harvester. (Flat is easily the largest producer in the world of agricultural crawler tractors. but these account for a tiny proportion of the total market compared with wheeled

In 1977 Fiat produced 74,100 not exclude international tractors in Italy (including partnerships as one means of knock-down kits) of which achieving its objectives. about 22,000 were sold in the bome market. The company accounts for about 13 per cent of EEC tractor sales and just under 10 per cent of the world market.

To increase its penetration Flat has evolved a three-prenged strategy—to move towards / becoming a full-line plete as possible, especially at the higher end of the horse-power range, and to invest beavily in aftor-sales service.

Within Italy there are a number of farm machinery companies which are now controlled by or associated with Fiat These include SAIMM (balers) Gherardi (tillage equipment), Toselli Agrifull (special tractors) and Laverda (combine harvesters). Laverda bas about 40 per cent of the Italian combine-harvester market and about 7 per cent of the Euro-pean market, where it is compet-ing both against the North

*Excluding knock-down kits. † In Turkey, Romania and Jugoslavia.

companies American-owned such as Massey-Ferguson, Deere and Clayson (New Holland) and against locallyowned producers such as Claas and Fahr of Germany. Thus Fiat already has the

makings of a broad line of agricultural equipment. In 1977 the company made a significant move in the U.S. by acquiring Hesston, a well-known maker market (including imports from of bay and forage barvesting machinery. This manufacturing presence in the U.S. could be a first step towards a direct attack on the North American companies on their own bome

ground. Flat is already selling several thousand Italian-made tractors a year to Allis-Chalmers and White in the U.S. for sale under their brand names, but in the longer term the Italian company presumably will wish to establish itself in the U.S. with its own line of tractors and farm machinery and its own dealer network. But it is unlikely to take the plunge until it is com-pletely satisfied both with the product range and distribution

arrangements. Whether this will involve an association with one of the major American tractor makers remains to be seen. According to the 1977 annual report Flat Trattori considers its penetra-"acceptable though still insufficient; its ambition is growth, not excluding international mergers in order to acquire a dimension of absolute security and to be able to compete against the American giants." Seven years ago Fiat announced plans for pooling its agricultural and construction equipment interests with those of

John Deere, but the two com-panies were mable to agree terms; it seems bighly unlikely that such a proposal could be revived, but Fiat clearly does

Opportunities

In the meantime Fiat has plenty of opportunities to develop its existing products and improve their distribution: it is looking particularly hard at economies of scale and an inter-Spain and other Mediterranean countries where farming condirather low penetration in the UK and West Germany. Fiat's share of the tractor market in these two countries in 1977 was 2.4 per cent and 3 per cent respectively, compared with over 10 per cent in France.

Fiat's main Italian rival in the tractor business, SAME, bas followed the different policy of specialising in tractors—although it is also a major European producer of air-cooled diesol engines for use in its own machines and for outside sale. SAME produces about 21,000

tractors a year of which about

half are exported; its subsidiary Lamborghini makes a further 8,000 tractors a year,

19,800

manufacturer. can bold its own against larger

An interesting move in line with this policy was the pur-chase of a 35 per cent interest in Hurlimann, the leading Swiss tractor producer. This com-pany has a high-quality image and one of the other attractions for SAME was that it uses a different technology—the watercooled engine.

The general objective is to produce a range of high-quality tractors within the SAME group, sold under several different hrand names in Europe and North America and nsing a high degree of common components. With a 15 per cent increase in sales in 1978 the management believes that it is on the right track.

national sales network. supplier of farm machinery, to tions make Fiat's range particustration in the construction make the tractor line as come larly attractive. It is also equipment group which Fiat plete as possible, especially at determined to improve its formed with Allis-Chalmers of the U.S. in 1974. The logic of this deal was that it extended claim to be one of the most credible international challengers to the leader in the

SAME does have a marketing company, Ager SPA, which supplies tractor implements and other agricultural equipment, but the group has no intention of becoming a full-line equipmanagement feels that by pro-ducing a high-quality product that is clearly identified in the market—it has made a speciality of four-wheel-drive tractors—it

Objective

There are a number of smaller producers of tractors and farm machinery which have shown a consistent ability to maintain their share of the market. It has often been predicted, both in the agricultural and in the construction equipment sectors, that the smaller European companies would gradually wither away or be absorbed into the larger groups. But this process of rationalisation is an extremely gradual ope. In Italy, particularly, small firms with reliable products and loyal local customers have proved difficult for the big companies to dislodge. Yet those companies which have ambitions to com-pete in the world league may bave to consider partnerships with other European or American companies if they are to achieve the necessary

Fiat's range into the beavier end of the earth-moving equipment business and that it provided access to a dealer network in the U.S. In the last five years there has been considerable rationalisation of its products and distribution channels, and Fist-Allis can now reasonably

AMN is the leading company in the plant engineering sector of the IRI-Finmeccanica Group and operaces in the domestic and international markets for the design and supply of complete systems and/or sub-systems for both conventional and nuclear power plants. AMN is also now obtaining very satisfying results in the nuclear engineering field due to the considerable experience acquired through the construction of conventional power plants both in Italy and abroad totalling 27,000 MWe of installed capacity. AMN has been working in this field since 1963, i.e. since its considerable contribution to the construction of the Garigliano BWR power plant. AMN subsequently developed its organisation and capabilities and was the prime contractor for the Caorso nuclear plant, the largest power plant bullt in Italy to date. Following the completion of Caorso, AMN is now engaged in the construction of the two Montalto di Castro units, which utilise the latest BWR reactor design and which will generate up to 1,000 MWe nach. AMN is developing its nuclear activities both on its own account and jointly with other organisations and industries, both in Italy and abroad. Research efforts have enabled AMN to develop a 600 MWe reactor design, which is particularly suitable for countries which, on account of their modest power requirements, are confined to medium and small size units. Other Finmeccanitz companies under the leadership of Ansaldo spa support and supplement AMN's capabilities.

INTRODUCING AVERY RARE ITALIAN COMPANY.

Agrowing company, part of an economic system in Italy that's growing.

C.M.C. of Ravenna, general construction company, is an integral part of that imposing association of companies that together form the Italian cooperative movement.

This movement has a social strength of over 5 million cooperators, accounting for 7% of Italy's GNP.

The cooperative mode of production has proved to be the most effective in facing and over-coming the difficulties of what is now, in Italy, a general crisis.

The cooperative movement is a wealth of human and material resources and its objectives are not only production oriented, but This is the natural consequence

of the cooperative mode of production, which is historically ba-sed on the principle of self-management where the workers participate directly in the running of the company. CMC founded in 1901, is a

member of the National League of Cooperatives. The League between 1978 and 1980 (three-year plan) forecests an investment of approximately 2.5 Billion U.S. Dollars.

This is in net contrast to the private construction sector which is in a permanent crisis.

A company whose economic choices are also social ones.

One of the primary objectives of CMC is to maintain and increase occupational levels.

This is one of the fundamental principles of the cooperative moConstructing together.

From 3150 workers and employees in 1977, CMC increased to approximately 4000 by the end

of 1978, 27% more jobs. While private industry manifests the exact opposite tendency.

A company that produces a very rare product. New jobs.

CMC is basically a general construction company, but has developed diversifying its activities. It uses ever increasing human and technological resources in the continual industrialization of construction techniques. Not forgetting its expansion into complementary sectors.

The CMC group has the following structures:

CMC - Divisione Sistemi Costruttivi (Cesena, Rimini, Italy), precast and steel works. CMC. - MONOCERAM (Faen-

za, Italy), ceramic tile factory. FINER - C.M.C.'s own financing company, through which the

Busy construction industry

talex 530685 REG TIMI-1

ITALY'S thriving construction and civil engineering industry offers a microcosm of the atrengths and weaknesses of the national economy. At home, this sector is bog-

ged down amid the failings of the country's enormous bureaucratic superstructure and tha sluggish state of the economy.

Abroad, it has made its name as arguably the world's leader in the field, and provides price-less support for the halance of payments and a rich source of employment for workers from a cauntry where unemployment is officially put at 1.6m but in practice may be somewhat higher.

 The reasons for this concentration on the overseas sector are manifold: a mixture of history, tradition and necessity. In Italy itself, the engineering and construction companies come up year after year against the same difficulties.

Forced therefore to look abroad for its survival, the industry has found that it possesses a number of very strong cards. The very fact that Italy itself is part-developed as well as a nart-developed. well as a part-developing country means that its companies often have a far clearer idea of the difficulties that await them overseas than their foreign competitors.

Italian workers, long accus-tomed to the need to emigrate, can adjust relatively easily to a substantial period away from home. Steeled to the intricacies and intrigues of bureaucracy at home, the companies are less surprised by what they find

The companies themselves, quite apart from the expertise quite apart from the experuse they possess, have won a valuable reputation for their skill and willingness to train local staff. Sig. Ricardo Becchis, managing director of Fiat's Engineering Division, is typical in drawing a sharp distinction between the design and engineering package. design and engineering package, tha province of the contracting company, and construction work itself, which can most often be carried out by local workers.

Moreover, the unweildy conglomerate structure of the groups involved, so frequently criticised at home for in-efficiency, can prove a hiessing for such plant orders abroad.

Fiat Engineering, Italimpianti (part of the IRI Group), Techni-mont (part of Montedison), and Snamprogetti of the ENI energy concern, are only some of the companies which, in their tenders and handling of orders, can call upon specialist techni-cal skills to he found elsewhere in their groups.

Heated debate on nuclear power

SIG. FRANCESCO Corbellini for years; when a higher level little more than a catalogue of energy, wind power, even is hardly a man-to be envied, of internal economic activity good intentions. Twin stations geothermal energy (in which The vagaries of Italian politics rapidly sucks in greater permitting, he shortly will be quantities of imported energy confirmed as president of with grave consequences for ENEL, the state agency in inflation and the balance of charge of the supply and pro- payments, and se for the level duction of electricity—one piece. at which the economy itself is in the elaborate mosaic of pub-lic sector appointments designed Al lic sector appointments designed at the heart of this dilemma to keep happy as many of the is the argument of to what political parties as possible.

But at the same time he will be stepping into one of the most awkward jobs in Italian industry, and certainly one of the most important. For ENEL is both a vital factor in the fnture of the economy (as al-most the only supplier of power on which it depends) and for the wellbeing of large areas of the beavy electrical industry for which it lnevitably is the prime source of new orders. Sig. Corbellini, therefore, has become wittingly or unwittingly a central actor in the drama being played out over Italy's energy. This winter learned arguments over how the country should safeguard its future power requirements have given way to the unseemly reality of the blackout.

Importer

Fate and history have decreed that Italy—the world's seventh largest industrial power—should be a major importer of primary energy. Blessed with little coal and less oil, the country has been forced to look abroad. Purchases of oil, pro-viding over 70 per cent of domestic energy, cost L7,400bn (\$8.8bn) in 1977. And if the bill showed little increase last year, the feat was thanks less economising as 'to 'the lire's against the dollar, the yardstick would have overall responsibicurrency for oil prices.

settled on a phased 15 per cent price rise by the end of this year. The indications are that 24.5 per cent and 4 per cent aims to force a referendum on Italy could be faced again respectively. The issue later this year, shortly by the same problem Beyond this, bowever, the Despite the fact that the that has bedevilled its economy Government's programme is longer-term alternatives—solar

nuclear. The blackonts in a number of cities this winter, including Rome, and reports of including Rome, and reports of ENEL rationing supplies of power to a number of mannfacturing industries in the north have shown just bow precarious is Italy's energy situation. ENEL now operates on a knife-edge where, as recent events have shown, an excessively cold snap coupled with the failure of one or two key power stations in the national grid, can lead to wholesale supply cuts.

Politicians and spekesman for the industry have argued that should the government fail to press ahead with even the trimmed energy programme which has been approved, the risk of blackouts, and the country's vulnerability to upheavals in the oil-producing

countries, can only worsen.
It is anvisaged that the Molise plants, and almost certainly the Lombardy and Piedmont ones, will be built under Westingbouse's PWR licence by a con-sortinm linking another IRI group member, Breda Termomeccanica, with Fiat from the private sector, These plans bave been underpinned by ratification of an agreement Alas for the planners, how-between IRI and the other ever, the intense European state-controlled energy group debate on the wisdom of ENI (Ente Nazionale Idro-nuclear energy as a long-term lity for nuclear fuel supplies. This state of affairs is AGIP Nucleare will have a 71 unlikely to continue now that per cent stake in Goren, the the OPEC countries have company processing nuclear fuel

early stage. A similar project, ing its case vigorously.

Molise I and II, near Campo. At present only three behind schedule owing to a protracted political wrangle over its precise location.

Saving

Further in the future lie two more twin projects, one in Lombardy and another in Pied-mont, but again, where no sites have been agreed yet. In the unlikely event that all these stations are operating by 1985, the Government will have realised its current scaled-down aim of 8,000 MW of extra nuclear power in service by that year with an estimated foreign exchange saving, in of oil that otherwise would be purchased, of about \$1bn.

Perbaps the most encouraging element for the authorities in what is otherwise a pretty cheerless picture is the know-ledge that when they finally overcome the political and environmental hurdles, there is waiting an industry well equipped to handle a substantial programme. Caorso was constructed by AMN, a subsidiary of the Finmeccanica (part of the state-owned conglomerate IRI) under the U.S. company's BWR technique, and the same combination will carry out the Montalto di Castro

as 'to 'the lire's carburi), whereby the latter's choice has arrived belatedly exchange rate subsidiary, AGIP. Nucleare Spa, but no less vehemently in Italy. Spurred on by the gains of environmentalist parties in recent regional elections, the Socialists for one have started to question the Government's for PWR reactors, in which energy strategy, while the tiny Flat's and Breda's shares will be but disruptive Radical Party

are planned at Montalto di Italy is comparatively rich)-Castro near Viterbo in Central are anything but cast iron bets, Italy, but site work is at an the anti-nuclear lobby is press-

At present only three small basso in the south has slipped demonstration nuclear power stations are operating, offering just 650 MW of power out of the country's total installed capacity of well over 30,000 MW. Another and larger station at Caorso, near Piacenza, employ-ing General Electric's boiling water technology to generate 850 MW, is still at the testing stage, although it is claimed that its temporary connection blackout struck at the end of November averted even more

widespread power shortages. In the meantime, the signs are that King Coal will be making up the gaps between supply and projected peak winter demand until the mid-1980s. Five oil-burning stations are to be switched to coal, while a new 600MW coal unit is to be installed at ill-fated Giola Tauro, the Calabrian coastal site once chosen for Italy's fifth integrated steel plant. Since the country is notably short of coal also, Poland looks the most likely source of future imports, and a slurry pipeline is planned

In the long run, however, environmentalists notwithstanding, there appears to be little realistic choice for the country but to go nuclear—and this is explicitly recognised in the economic plan just released by the Government for 1979-81. In words uncommonly blunt for a pregramme designed to mend divisions, it speaks in one part "propaganda campaigns against nuclear power, organised for ends which have nothing to do with preventing the possibly dangerous effects

of the stations." Every extra delay in this programme was unacceptable, the document warns. So, probably, it is, but the fate of the nuclear programme, and of the plan in general, remains to be seen.

SEAC, ICFA AND IAE: THE ITALIAN INTEGRATED PRESENCE IN AIRPORT ENGINEERING

The SEAC-Airport Engineering Company has become the core around which almost all Italian manufacturers—in the field of technologically advanced airport systems and equipment—have gathered. It is a question of the supply of Italian technology and know-how that is increasingly appreciated abroadas has been proved by recent contracts obtained in Somalia and Libya

Italian engineering is asserting itself in the highly qualified field of the realisation of airport systems on a turn key." basis. SEAC-Airport Engineering is carrying out systematic work in this direction. This Milan-based company is now enlarging its sphere of activity throughout Italy and a number of foreign countries from Africa to Asia and Latin America. America. It has also founded two consortia specialising in airport construction and equipment: ICFA (Italian Consortium for Airports) and IAE (Italian Airport Equipment).

At present SEAC-Airport Engineering is the only Italian company in this sector that can boast of the construction or the planning of 32 airports in Italy and abroad. Among these the planning of 32 amports in Italy and abroad. Among these is the projected new international airport of Milan Malpensa with an expected traffic of 12 million passengers and one million toos of goods per year. Between 1977 and 1978, SEAC completed design plans for Trieste, Taranto and Brindisi airports without neglecting its commitments to Napoli-Capodichino, Reggio Calabria, Pisa, Catania and Trapani

In Italy, SEAC has been commissioned to draw up the feasibility study and the general airport development plan for the new international airport of Napori-Lago Patria. Abroad SEAC's achievements include the Entebbe passenger terminal in Uganda, the Alitalia, Varig and Airlift cargo terminal at J. F. Kennedy International Airport in New York, the Zigninchor international airport project in Senegal and the cargo centre project for Tocumen international airport in

Panama. Over the past few months SEAC has completed the design for Catumbela airport in Angola and recently has signed a contract for the preliminary and final design for Mogadiscio new international airport in Somalia as well as for the feasibility study for the Yaounde new international airport in Cameroun. In Africa—more precisely in Libya— SEAC is carrying out the detailed engineering for the desert airport of Sarir, south of Bengazi. Constant promotional activities have enabled SEAC to establish other important activities have enabled state to establish other important contacts—apart from existing ones—not only in Africa but also in Latin America and the Middle East. It is to be noted that in the Middle East SEAC bas been included by ICAO in an international tender short list for the planning of Taiz airport

The increasing success of SEAC in the international field is illustrated by the fact that in meeting the new requirements of airport infrastructures nothing is left to improvisation, brilliant though it may be, of individual technicians. The "airport problem" must be considered in the light of the requirements of a constant increase in passengers and goods traffic and must be tackled by an organised team of qualified experts, according to circumstances, as every airport is a special case requiring its own solution. SEAC has such a team and nothing to worry about.

The origins of the Italian company can be found in SEA: the Società Esercizi Aeroportuali formed in 1955 to give Milan and Lombardy a domestic/international airport system. Linate and Malpensa are the two airports constituting this system. The first, only eight kilometres away from the centre of Milan, is a domestic as well as an international airport. The second, about 40 kilometres away from the centre of the town, is an inter-continental airport.

In order to adjust the Milan-Malpensa airport to the increasing traffic requirements, the SEA Consulting Company, later called SEAC, was formed a few years ago. The new company was charged with perfecting the "Great Malpensa" project. As a matter of fact this airport is destined to absorb

both its increased inter-continental traffic and the traffic that Linate will be unable to cope with up to the year 2000 and beyond. However, the new company was not created as a mere technical expression of the parent company. It must be considered as an operational organisation able to use fully the enormous accumulated experience of airport planning, construction and management in other parts of Italy and

Another reason for SEACs success can be found to the "package formula" it offers. In fact SEAC supplies planning, integral project, management consulting, supervision during construction of airport systems and staff training. It co-operates in setting up airport location studies and in carrying out final testing of the finished structures. In addition, SEAC provides its customers with economic and financia assistance for the project, by co-operating—at the customer's request—in obtaining the necessary funding for the work. In registered capital, SEAC changed from a Milanese-sized company into a national-sized company. At present its parcel of sbares is divided into equal parts between SEA, Fiat Engineering, the Bassetti industrial group and the two companies belonging to IRI (Institute for the Reconstruction of Industry): Aeritalia and Selenia.

Now, SEAC's global offer is integrated and completed by the ICFA and IAE consortia. The first, formed in Milan in October. 1976, was officially first presented abroad in September, 1977, at the Vienna Exhibition of airport construction and equipment. It has an overall registered capital exceeding 230 million dollars, provides work for 170,000 employees and has a turnover in excess of 3,000 million dollars.

The Italian Consortium for Airports is the first Italian organisation concerned at international level in this sector and able to-compete with other similar European bodies. The ICFA members—two engineering companies, eleven building contractors and twelve industries—boast of solid background experience in their own field and almost all of them have already acquired particular experience, in the specific field of airport construction, all over the world.

In a programme of promotional activity, the consortium has presented definite proposals for airports in Ecuador (Quito, Guayaquil and Cuenca). Senegal (Ziguincbor), Cameroun (Kribil and Colombia (Bogota). Companies like Cogefar, Grola, Impresit, Lodigiani Aeritalia, CGE, Pirelli, Olivetti, Selenia and Solari are only a few names among the most prestigious technique industriae toliving the first conscribing most prestigious Italian industries joining the first consortium of airport construction and equipment

During a seminar, beld recently in Peking with the co-operation of the Government of the People's Republic of China, the activities of ICFA members in the air traffic control and flight assistance sector were shown to a group of qualified Chinese technicians, among whom were representatives of the Civil Aviation Administration of China. A request made by the Chinese technicians for another similar meeting proves that the ICFA seminar has been followed with

Following the example of ICFA and promoted by SEAC, Italian Airport Equipment (IAE) was formed in Milan in May, 1978, with the participation of Italian manufacturers of auxiliary airport equipment for air transport and able to supply any kind of airport equipment. At present this Group is engaged in trade transactions in Guinea, Nigeria and Tunisia for the supply of complete equipment packages to the airport authorities of those countries.

Today SEAC, ICFA and IAE form a group which together provide almost all that Italy has to offer in the field of integrated airport systems design, construction and equipment.

SEAC — ICFA — LAE. 37, via Conca del Naviglio, 20123 Milan - Italy. Tel: 02-8325851. Telex: 320595 SEAC I.

Home appliances market improves

ITALIAN appliences industry, which was one of the spectacular successes one of the spectacular successes of the 1960s, suffered a severe sustain the same level the battering in the recession which following year with L20.9bn followed the 1974 oil crisis, profit. (\$24.9m) on e turnover during which some of the of L725bn (\$862m). That means weaker companies went under a net margin of less than 3 per or were rescued only by absorpcent on sales, although turnover or were rescued only by absorption into their larger competition into their larger competitions.

increased 22 per cent on the previous year's total. The compressions year's total.

The problems which suddenly faced the industry during the down-turn of consumer demand came as a shock to many observers, who bed come to believe the Italian combination of sound engineering, high volume and aggressive cost-cutting was unbeatable—at least, in the lower end middle ranges of the market.

But the edvantages of high volume production clearly become penalties if the market cannot sustain production at an economic level to justify the high overheads. The slackening of consumer demand througbout Europa also sharpened the marketing edge of domestic appliance manufacturers in many countries where the Italians were eccustomed to export. Since exports accounted for 65 per cent of the industry's production in 1974, the fierce bettle for market abares was bound to beve an edverse effect on many Italien companies.

Upheaval

For the largest companies, Zanussi, Ignis (now IRE), Merloni, Indesit and Candy, the period brought severe retrencbments, re-organisation, and in some cases, substantial losses. In 1975, for example, Zanussi

-the largest domestic appliance manufacturer in Italy and in Europe — recorded a loss of L1.6bn (\$1.9m). However, in the last two years, demand has to make bulk sales to retail gradually started to increase, and although there is still a considerable over-capacity throughout Europe, a shake-out among some of the smaller and weaker firms has allowed the larger sure has been put on electricity

domestic 1976 (calendar year) with a which was modest profit of L19.5bn successes (\$23.2m), and it managed to pany's performence in 1978 is expected to show a definite but not a spectacular improvement. partly because of its policy of diversifying out of the domestic appliances field into consumer electronics, catefing equipment and bousebold fitments.

The Italian domestic eppliance industry's beavy dependence on exports seems likely to condemn it to live with low margins, at least for the foreseeable future, as it meets increasing opposition from manufacturers and government strategies in its main markets.

Manufacturers also bave to reckon with the fect that markets for refrigerators and washing machines are nearing saturation, although dishwash-ing machines could still provide growth opportunities.

In the UK, one of the main, explicit objectives of the National Development Organisation sector working party in the last two years has been to beat back Italian competition, par-ticularly in the markets for refrigerators end automatic washing machines.

merely to increase the efficiency of the British manufacturers, but to discourage the practice of "vendor branding." This practice had for many years pro-vided an easy entre for the Italian manufacturers, particularly Zanussi, which were able chains or to UK rivals who would put their own brand name on an Italian-made product and still make an adequate margin on resale. Strong pres-

the General Electric Company (GEC) subsidiary, has discon-tinued its purchase from Zanussi of refrigerators and washing mechines for resale under the Hotpoint brand name.

In Germany, a similar trend In Germany, a similar trend mey be beginning, although German manufacturers bave been much more successful than the British in defending their corners of the market, by concentrating on very solid, high value machines value machines.

The decision by AEG (Allgemeine Elektricitäts Gesellshaft) mene Electrication of the self-its 20 per cent share in Zanussi, may prove to be a long term sign of a more nationalist. protectionist approach. But tha change of sbareholding does not appear to bave bad any immediate edverse effect on Zanussi. Its agreements to supply washing machinas to AEG atill con-

Strategy

Indeed, the highly interna-tionel character of the market and the complications of vendor branding are illustrated by the fact that one of AEG's washing machines which sells in Britain mainly on the reputation for solid German workmanship, is, in fact, made in Italy.

Faced with the general tightening of overseas markets and the political uncertainties at home, the leading Italian domestic appliance companies beve generally adopted the This policy bas aimed not strategy of stepping-up marketing pressure to emphasise cor-porate identifies and the relia-bility of their products.

One of the most conspicuous changes has been on the part of Zanussi in Britain. Faced with the ending of its agreement with Hotpoint, the com-pany has leunched a £900,000 advertising campaign to give the Zanussi name credibility with UK consumers. This was necessary because most consumers do not know about Zanussi, groups to move back into profit. boards to buy from UK-based even if they use one of its Zanussi turned the corner in manufacturers, while Hotpoint, machines. Zanussi has been try-

ing to combat the idea that the cheapness of Italian machines is related to inferior quality with, for example, explicit com-parisons between its dishwasher and a rival German-made

For the other major Italian domestic appliance manufac-turers, the maintenance of a brand image has been less of an immediate problem IRE, the Philips subsidiary benefits from the presence which Philips has carefully cultivated throughout Europe. Indesit, the fourth largest manufacturer, has for many years had a policy of selling under its own name, to such en extent indeed, that its name was largely synonymous with Italian white goods in the minds of U.K. consumers for several

Candy, similarly emphasises its own name, and has been conducting an aggressive policy of low price selling, but will prob-ably attempt to move up mar-ket and aim for higher margins in the next year or two.

In 1977, total Italian exports of white goods were estimated at Li,300bn (\$1.6bn), which represented about 63 per cent of national production. In the same year, total Italian production of refrigerators showed a 6 per cent increase by value, compared with the previous year. Allowing for inflation this was e slight decline in volume

Increase

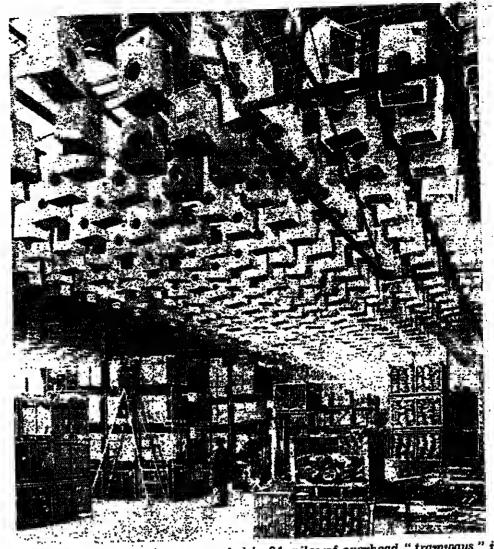

The value of freezer produc-tion was up by 11 per cent; of washing machines by 46 per cent; and for dishwashers (the growth), the increase was 26.5

For hoth refrigerators and washing machines, the Italian companies can claim about half of the European Economic Community market. This market is running at about 7.5m units for refrigerators and about 8m washing machines.

By 1980, the total European market for appliances is expected to reach the following levels: for refrigerators, 8.5m units; for deep freezers, 4.8m units; and for washing machines 7.05m units. Sales of dish-washers are expected to climb

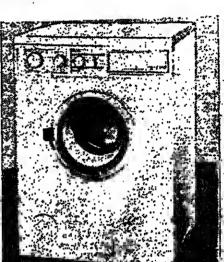

to 1.85m units by then. The general ontlook for the major Italian manufacturers is consequently rather mixed. On the one hand, saturation of the markats and increasing netional pressures to preserve jobs will work against them, margins are likely to remain low and com-petition intense. On the other hand, continued progress in technology has enabled the Itelians to improve quality while maintaining competitive prices. Their high volumes of production will also give them an advantage in innoveting designs. Thus, although most observers feel that a further shake-ont in Europe will be necessary, the larger Italian firms are now in e relatively good position to survive it.

Before the deal was an-nounced few in the takeover game had given much thought to moves in Washington by the Justice Department and by Senator Edward Kennedy to suggest that they bought some tighten up anti-trust laws in 15 per cent of McGraw-Hill's order to hlock such giant equity, for over \$100m.

tighten up anti-trust laws in order to hlock such giant conglomerate bids. Many on Wall Street now fear that in the

There are predictions that

American. Express

the role of directors in such

Hitherto few of the issues that such transactions raise have been seriously debated. There has been growing concern about cash investment in productive assets and criticism of bankers

But perhaps because so many of the big deals have been largely in cash, shareholders bave not worried about the quality of the management taking over their companies or its ability to operate an unrelated husiness. There has been a ready acceptance of the assump-tion (rightly or wrongly) that large hlue chip aggressive cor-porations are now competent to diversify successfully into virtually any field.
Thus whether or not Kenne-

cott Copper's less than sparkling management should take over Carborundum (a company with a aolid growth record) ultimately proved to be of more concern to Kennecott's snat-holders than it did to Car-borundum's. There is also a issues have been raised most growing debate, which has visibly by the American express hid. It has to be said society irrespective of their Express acquiring McGraw-Hill commercial ability to manage and the potential conflicts of

Because McGraw-Hill is seen to occupy a position of public trust as the publisher of a leading business magazine, Business Week, as well as the owner of

Stewart Fleming on the imbroglio of American Express's possibly doomed bid for McGraw-Hill

James D. Robinson, chairman and chief executive officer of American Express: his company's bid for McGraw-Hill has heightened the debate about conglomerate bids, their impact on the economy and erate bids, their impact on the economy and society and the role of directors in such situations.

Washington, ahout the impact however that the debate about of giant conglomerates on the propriety of American and the potential conflicts of interest in the deal owes more perhaps to the tactics which McGraw-Hill adopted to defend itself than to the sensibilities of the business community to the

an intriguing insight into the takeover game in the U.S. The approach was simple. McGraw-Hill set out to threaten the public image of American Express and to give this tactic time to work to the up American Express in protracted lawsuits in the bope of ultimately forcing

it to retire from the field.

Because of McGraw-Hill's husinesses involving the public interest it was clearly in the company's interests to suggest that American Express lacked the "integrity" to run them.

tion with major financial businesses providing most of its profits, was particularly vulnerable to this sort of attack. Its public image as a company of high corporate morality is vital

to its profitability and growth.
In practice as well as propaganda the McGraw-Hill defence seemed shrewdly designed. Its ownership of four television stations provided it with a potential roadblock in the shape of the Federal Communications Commission which has to approve the transfer of broadcasting licences, taking into

account the public interest.
In addition American Express provided McGraw-Hill with a potentially vital issue—which it could take to court. Mr. Roger Morley, president of American Express and a man intimately involved in its acquisitions programme had been a member of the McGraw-Hill board some time hefore American Express first tentatively broached the possibility of a merger in the aoring of last year.

He did not resign until the hid had been launched nn January 9 when he handed Mr.

Harold McGraw Junior, the McGraw-Hill chairman, au undated letter of resignation.

McGraw-Hill filed a suit against Mr. Morley and American Express charging that he had improperly used confidential information given him as a director of McGraw-Hill in a director of mactraw-fill in launching the hid. American Express has denied the charge, saving that the information had not been used—not that it had not been received. It is already being suggested that the issues raised by Mr. Morley's dual role

information concerning those

considering takeover fiels to scurry round to check whether there are possible overlapping directorates with target companies, and wondering if and when resignations bave to be considered to avoid charges of conflict of interest.

other issues to litigation it was also able to embark on the discovery process provided for by U.S. law. This allows lillgants. before the conclusion of the case, to demand and eventually place on the public file confidential information from each

mine this source of information. But according to a letter the McGraw Hill Board received from its lawyers, Wachtell Lipton Rosen and Katz (interestingly later released to the Pressi before it got very far, on Monday, January 29, American Express withdrew its first formal offer of \$34 a share. According to the letter, American Express thus ended litigation and the discovery process moments hefore McGraw-Hill's lawyers were to negin prohing hegin questions as to whether American Express had heen guilty of illegal compliance with the Arab hoycott of Israel." American Express has denied allegations and

McGraw-Hill's suggestion that there are legal barriers which would prevent a bid through even if the McGraw-Hill Board approved it.

vided McGraw-Hill's Board did not actively oppose il or f<u>o</u>rce il into further litigation. This it into further litigation. It will he the effect on this offer if McGraw-Hill seeks to invulve American Express in the actions brought by the McGraw-Hill sbareholders against their own

Inevitably perhaps in the cut and thrust of the battle both companies have come under closer public scrutiny-and this has not been in American

Express's interests. While analysis were well aware of the threat to American Once McGraw-Hill was able Express's highly profitable to get Mr. Morley's role and travellers' cheque and credit card business from mounting competition from commercial bonks and the new electronic funds transfer technology, the risks American Express been prepared in run to iry to acquire McGraw-Hill indicales how anxious it is to secure a major diversification.

The company had already McGraw-Hill began to try and signalled its strategy through unsuccessful approaches in three other cumpanies: Wait Disney Productions, Phila-detphia Life and Book of line Month Club.

The company's credibility as a takeover bidder has been damaged, leaving Wall Street to ask why it signed up as advisors Lazard Freres, the investment banking firm which has the reputation of being one of the est streetfighters in a contested hid, if it was not prepared to

get its nose bloodied. Finally, Washington's attention has been drawn to the special exclusion which American Express enjoys from the 1970 Bank Holding Company Act, an exclusion which McGraw-Hill's lawyers have hinted may no lunger be valid. The act prevents banks from

diversifying out of bank-related business. American Express. however, must hape that it will It retreated, however, to the however, must hape that it will position of leaving the \$40 a continue to enjoy its special sbare offer on the table pro- status.

Lifting the veil on the major source of investment funds

BY ERIC SHORT

The Wilson Committee has the NAPF is effectively a trade hrought the role of pension association and membership is funds in investment very much to the fore. One question being major pension schemes, and many of the minor, belong to

ONE OF the most curious ing growth targets are, of casualties of five years of course, strongly disputed by Labour Government has been wide sections of the Labour the sbandonment of any Party, nn both right and left specific economic growth or wings, who helieve that the pur-unemployment targets—high-suit of growth is a correct objec-

not represent any sudden con- cuptiness at the heart of version to the undesirability of Government economic policy as growth on evological grounds, emerges clearly from the expenof which the first sigo will pre- diture White Paper and the comments on it of both monetarist and noo-monetarist economists. This is the essence of what my coileague Samuel Brittan has called unbelieving monetarism—accepting mone-tary disciplines but only because they are imposed by the markets, and without consistent

supporting policies.

There are, for example, the criticisms of Mr. Terry Ward, the specialist adviser to the general sub-committee of the Expenditure Committee. He has attacked the failure of the Government to give any indication of what it believes to be the desirable rate of output growth, let alone of policies necessary to achieve this. "Instead, the impression is conveyed that the rate of economic expansion is largely outside the Government's control and that budgetary policy, of which public expenditura is part, has been accorded the role of ensur-ing, so far as possible, the achievement of the over-riding objectives of further reducing inflation and repaying foreign debt. . . . This leaves little scope for the pursuit of any independent growth or employment

Inconsistent

On the other side, the abandonment of growth targets has productivity which, it is hoped, been welcomed. The monetarist will bave the incidental— attack is that the government's fiscal and monetary policies are incompatible and that the level Oo the Tory side, there seems of public spending and borrowinflation.

Both sides essentially agree priorities of the markets and the non-monetarist and public spending preferences of its supporters has failed. Mr. Healey's qualities of intellecpractical response to immediate tual flexibility and resilience may have had much to commend lectual conversioo, even if the them in the difficult days of policy priorities—reducing the 1974-76 but in the end it is not possible to pleasa all the people

Winter's sharp frost selects

to project the less hardy stock. February, we have been told, will be almost as barsh. So far, the frasts have taken the oddest turnings. They have thrown up strange results among plants which I picture as maquis,

Clatus, thase days, is a popu-

lar shrub. Perhaps it is a memory which we all bring back from Mediterranean holidays. The resinous scent of the cistus-leaf is a quick abort-cut for the mind, back to warm weather and those hours after lunch when not even the goats know where to put themselves. As the pound bas dropped, my number of cistuses bas risen, a substitute for days by the sea. But I could not advise you before this year which varieties are tougher than others. There are two hardened veterans, laurifolius and the prettier obtusifolius. That much we aiready know. But the past month, with me, has reversed the pld order. Much, for ex-ample, was once said about the toughness of a slow and smallflowered new hybrid called silver pink. I fell for this on sight. Yet it has now had its

they are a straight up-and-down bout, I was not a cistus-watcher. magenta. That is nothing to be This tall and gum-scented ever-

Cistus sunset is more spectracular. Its flowers are sold quite untouched. This is good as "deep rose." To be honest, news. In 1963, the last cold

GARDENS TODAY

shy about. I like some strong green had always looked to be magenta. One year, I mixed it fragile. Roughly, the more a with the fine autumn convolvucistus smells of sunshine and lus called mattretanicus, the tame sort which runs to pale slate-blue flowers. For a warm garden or a European sun-spot, I recommend this match. Sun-set flowers on into early autumn. Slate-blue and magenta are a fine pair. But the con-volvulus will not stand my win-ters. I have had to replace it with sky-blue flax, another fine plant but too slender for the job. Now, sunset has gona down for the last time. The frosts bave wiped out its woolly greygreen leaves. The stems are all brown inside if you scratch third set-back in five winters them low down on the plant, a and has lost my favour. It is reliable test for the dead or the

sends up bold evergreen leaves, the more one mistrusts its stamina, Cyprius goes up quickly to a beight of five feet. It carries several flowers on ona stalk and wears that heavenly centre of its wide white flowers. It is as good as the less obliging hibiscus in a British garden-Pernaps you have a dry and summy alope, beside steps or a poor or the edge of a front drive. If you can picture it with tall and loosely-spreading shruls at intervals among it, then this cistus is the plant to risk. Its leaves shine and go grey-green later in the season.

THIS WEEK, gardeners are it is not now the best, though also a surprise as it was once imagined. It excels the Eurocounting the casualities. At it once won an award of Garden classed as "comparatively pean form, cadanifer, which and decent burial. Deceived by finwers are small, the shape too told, grows profusely in North latter is certainly less hardy. A long-range forecast for lowly and the colour is unlanusry, I made too few moves to project the less hardy steel. There is no denying its pretti-ness, the boldness of its flower and the shaping on its leaves. But I have despaired of it in high winds, which break its topgrowth. Now it has gone in the frost which has killed it right

> What about two others whose leaves are especially sticky? Anybody would fall for old purpureus. It has those lovely rose-coloured flowers with the darer hlotch. It glows all over its papery petals when full in flower. Against the south wall of a house it might be sefe almost anywhere in usual winters. But if wide flowers will be passing me by this year. I like it enough at the manageable height of two feet for it to be worth another try. But it cannot rank bigh in the lists for toughness. Every year, an open-ground plant has shown signs of winter wear. So this is no judgment on one month's bad luck. At first glance, its flowers are the most seductive. But all round, it is not the equal of cyprius.

Comparisons in botanic gardens inclines me to think that the hybrid nuce known as loretii is the most strongly scented of all in its leaf. Nottoo slow-growing to recover itself. Late this autumn, it was on offer all over my local garden-centres. In my opinion,

Cistus laurifolius: a hardened veteran

likes a well-drained, warm and and safety.

Rough but revealing, a cold fertile soil. Technically, it should now he called lusitanicus spell sorts things out. These decumbens. I regrat this, but observations are anecdotal, of decumbens. I regrat this, but as it sells under either name, you should be warned. It is such: a useful plant, in principle. It spreads more than mist and knits together pretilly. You see it sometimes on well-gardened slopes in southern France, like our less handsome Rose of Sbaron. The flowers are anecdotal, of course. They are made on a light alkaline soil some 3 miles north of London on a slope, however, which catches the cold wind. Further north, the results might be worse. But for lucky Gulf Stream gardens or south European commuters, the point is rather different. County your blessings and buy all those

Likely team for Fontwell

FRED WINTER, who has been Christmas Tree Novices Chase useful though not over-talented more careful than most about a week later, risking his charges on the often

RACING BY DOMINIC WIGAN

gelding, Shannon Bridge, a close-season recruit

The neck conqueror at level weights of My Buck in the two-mile Woodborough novices chase at Nottingham on December II in which the 6-4 favourite, Master Melody, was eight lengths back in third stiffer opposition against Silver the runners for the afternoon's Buck in a division of Leicester's long distance novices chase. A

Prominent, going well in the

The champlon trainers best prospect, in my opinion, is Barry Brazier's Raise You Ten Shannon Bridge, a good-looking recruit to Uplands, showed that his mishap on the Midlands his confidence with a respectable second-place effort behind the fast improving Tragus in a similar event at Fontwell.

With the form of that event gaining a useful boost through Tragus's two subsequent victories on the same course, I find it impossible to look beyond Shannon Bridge for the opener, the 2½ mile Climping Opportunity Chase won a year ago by stablemate, Linsky. Another likely winner for place, Shannon Bridge met Uplands is Mauritius, among

gelding who obliged over the minor obstacles at Cheltenham of the last few weeks, sends only threat to the Dlekinson Mauritius faded out of contena likely looking team to Fontwell today. finishers behind Tragus and Gale Forecast at the last meeting here.

In the helief that the boglike conditions were largely responsible for his poor show ing, I give the Carnival Night gelding another chance to show that a modest event such as the 31 miles Selsey Chase is within

THE ARTS

Television

Floreat Edwardiana by CHRIS DUNKLEY

to the centre of things. It now seems, however, that that was ning of Flombards, the continant the energy and innocence little more than a saunter; the Gadarene rush had scarcely started. Admittedly the highest quality piece of Edwardian material to reach our screens so far was last autumn's Lost Boys, and the third written and set in 1911, the growth of egalitarianism, and it is hard to imagine it around 1909.

One bad thought that British quickly being surpassed in Edward bimself came so close to wait for 1979. In the last of science, the unquestioned to the centre of things. It now week we have had the begin- power of the British Empire,

Or is it just that horses and biolanes (vroom vroom) look absolutely stunning bopping over hedges on colour telly? No doubt both factors play a part. Yet, as we shall see different dramas do actually have quite different attractions even though they heppen to have been set within this one hrief period.

to a glorious past?

The most amazing fact to discover about David Cunliffe's production of Flambards for Yorkshire Television is that despite its appearance of having been assembled by TV-computer to exploit the country house and settings of Hodleigh, the horsey attractions of International Show Jumping, the early zeroplanes of Wings-vroom vroom-end the family/servant relationships of Upstairs Downstairs, it is actually adapted from a trilogy of books written by Kathleen Peyton which began publication 12 years ago.

Furthermore a glance through the first chapter of the first book, recently re-issued by Puffin to acompany this 12-part book, recently re-issued by of TV houses with upper floors. Puffin to acompany this 12-part seemingly eight times the size of ground floors, and lends a Plater's adaptation is quite unusually faithful. (Though the unusually faithful. (Though the sum yiewer who has learned that a treatment of the sum of the picion that e trendy and, there-fore, fake-sounding reference by the maid to the uselessuess of men was, indeed, not in Miss Peyton's work.)

The result is superb escapist room. entertainment, even if the plot scarcely burns with originality: orphaned beiress Christina goes to live with Uncle Russell who is confined to a wheelchair by a hunting accident. He is a

increased tendency to turn back aeroplane (vroom vroom) and

> (played by a new and very impressive young actress named Christina McKenna) has a bit of a pash for him.

> Those of us who found childhood made more bearable by the fantasy of The Secret Garden, Jane Eyre and Wuthering Heights will indulge in Flambards with enormous pleasure, and our delight in the narrative flights and the cantering dialogue (assuming we can hear it through the foreground music) will be enhanced by the pictures of the aeroplanes, wroom wroom, and of the hunt. One other point about the

pictures: unless my eyes deceive me, it is not only the exteriors bnt the house interiors which have been shot on location. This avoids the frequent absurdity wbat real interiors and people in those interiors look like from years of documentaries. Studio sets always allow cameras unrealistic amounts of

London Weekend's Thomas from Upstairs Downstairs which. been pressing for: his character. Thomas the chauffeur, and thet solicitors to another is positively of his wife Pauline Collins gripping. (Sarah the parlourmaid) are found bere independent of the Bellsmy household and becoming involved in all sorts of adven-

Very clearly the formula is the JICTAR ratings, Moreover one should not underestimate the significance of a paragraph possibility of dollar-earning which dramatists seem bothered to ask any more, finally, Thomas and Sarah consider emigrating. Their arrival in the land of the free could, with American television companies chipping in, extend the series for many profitable years."

Its commercial success is in little doubt. Yet its strength and weaknesses are almost the reverse of those in Upstairs Downsteirs; by baving Thomas set up in a garage and Sarab living as a lady's companion, the new series bas broken out into the wide world and is busy exploiting the fact. Thomas bas already been tempted to switch his allegience from cars to the development of aeroplanes.

Vroom vroom. Much of the strength of clearly not played out yet.

One bad thought that British quickly being surpassed in Could it be that the popute the growing dread of nuclear port-swilling tartar who lives Upstairs Downstairs came from television's scramble into terms of writing, acting or larity of Edwardian drama, and technological developments, through his hard-hunting, bard-the discipline of remaining reflecting those rigid social Britain's ahrinking interswearing, bousemaid-fondling inside the single household. But for sheer quantity we had divisions, the public flaunting national infinence, and the son Mark who cannot grasp alge. Fresb characters could intrude the divisions, the public flaunting national infinence, and the son Mark who cannot grasp alge. Fresb characters could not wealth, belief in the benefits increasing lethagy and cyniincreasing lethargy and cyni-cism of the present age for this younger son William who sides to set the time—and occasional with the fox, studies aeronantics, sorties could be made outside. joins secretly in building an But the muscle of the series, the regular characters, developed feels servants are degraded. through constant use, and Paragon of all the virtues is admiration for the series sprang the upstanding, animal-loving, mainly from the consistent self-respecting young groom, credibility with which they better horseman than even the Young Mayster hisself. Christina incredible, and Episode 2 more incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 2 more consistent and sarah looked somewhat incredible, and Episode 3 more consistent and sarah looked somewhat incredible, and Episode 3 more consistent and sarah looked somewhat incredible, and Episode 3 more consistent and sarah looked somewhat incredible, and Episode 3 more consistent and sarah looked somewhat incredible, and Episode 3 more consistent and sarah looked somewhat incredible, and Episode 3 more consistent and sarah looked somewhat incredible, and Episode 3 more consistent and sarah looked somewhat incredible, and Episode 3 more consistent and sarah looked somewhat incredible, and Episode 3 more consistent and sarah looked somewhat incredible and so. The series will no doubt entertain and continue to win ratings. But not, I think the critical accolades collected by UD. The primary attraction of Thomas And Sarah, as of Flambards, is escapism.

In complete contrast the main Voysey Inheritance was its startling relevance to our pre-sent day lives and society. This is not to suggest that David Jones' farewell Play Of The Month production failed to entertain. On the contrary, seeing the play for the first time was an eye-widening experience aince it proved-under Robert Knights' directions—that as a journeyman dramatist Harley Granville Berker could leave Bernard Shaw whittling in corner.

Where Shaw's characters are so nften ciphers representing of film so filten ciphers representing moral attitudes and virtually carned empty in living character, becopie look qualities. Admittedly some of those in Voysey get very close to caricatures, and Jeremy into of Child's bullying Booth Voysey actually dived gloriously over the edge. However the play London Weekend's Thomas the edge. However, the play and Sarah is the development does work wonderfully well as narrative drama: the story of it seems, John Alderton has long professional corruption handed on from one generation of

gripping.
The most interesting point, bowever, is that although Barker was writing about the Edwardian world, the problems be considered—concerning the morality of business methods, popular: Episodes 1, 2 and 3 for example, in which one man reached places 10, 14 and 5 in uses another's capital to make uses another's capital to make money for himself and his other clients (isn't thet precisely what banks and building societies in a TV Times article intro-ducing the series: "Another as they were in 1909. Yet they continuing fascination is the are not the sort of questions

> who ara interested at all in merals are more concerned with such vague conundrams as Look Back in Anger. Let turns out that Barker even went into all that In 1909, too; his condemnation in Voysey of the condemnation of the effete middle was not as good as she was the extravagance state of marriage and the stand-lng of women within it pre-dates Osborne by nearly 50 years. After seeing The Voysey In-

heritance it is difficult to understand what all the fuss was about in 1956. Edwardiana is

Margaret Rawlings

Empress Eugénie

by B. A. YOUNG

When the Empress Eugénie chandeliers burst into light! was 93, she travelled by public transport, alone, to the Château de Compiègne. Once she hed lived there, wife of the Emperor Napoleon III of France and possessor of a dozen Spanish titles of her own. Now she joined the line of tourists, paid recalling more prosperous days. This is where we see ber.

The long solo by Margaret
Rawlings is a remarkable feat

simply as an echievement of memory by an actress who makes no secret of her age, which Is 72. But it is much more than that. It is a truly lovely performance, full of sudden changes of mood, subtile replacement to the full subtile replacement of the sudden changes of mood, subtile replacement of the sudden changes of mood, subtile replacement of the subtile replacement o

visit? They set the fashion, herself in the lead. Of course but oh, what fun to see the by Vernon Dohtcheff.

She seems always to have heen playing a game, and no doubt this accounted for her responsibility (which she admits) for the tragedy of Maximilian and Charlotte in Mexico. Perbaps even by encouraging the regal panache ber admission fee and began to around her bushand she helped follow the guide with the to push him into war with others. In her old bedroom, she Prussia in 1870, though in this made an excuse and set alone, she edmits nothing.

The second helf of the even ing deals mostly with the derker things in her life. She gives a hreathtaking account of her escape from the mobthreetened Tuileries, through the Louvre, to take refuge with her dentist. She tells with great pathos of the death of "Whither the middle classes?" sudden changes of mood, and "What about women?" subtiy varied pace, truthful assumptions of regal dignity who remembered with with starting it all in 1956 with alternating with quick darts of the Suez Canal and climbing of the Suez Canal and climbing Vesuvius at the age of 80 and Miss Rawlings'a interpretation making her first aeroplane flight on her 85th birthday.

This most enjoyable performlikeable. Her extravagance ance plays only until Saturday, was astonishing. Why shouldn't In June Miss Rawlings will give the ladies of her court hring two performances at Farn-10 to 15 trunks for a two-day horough Hill, Eugénie's last visit? They set the fashion, home. The director is Marianne MacNaghten, and a it was wasteful to hurn 300,000 delightful introduction, with all candles a night at the Tuileries, the Spanish titles in it, is given the Spanish titles in it, is given

ABRIDGED PARTICULARS

Nottingham University

Dvorak's Dimitrij by Nicholas Kenyon

sity presented the British pre- peasant. miere of Dvorak's sixth opera, The resolution of this situa-Dimitrij. It was a massive tion provided Dvorak with many undertaking ("God is not dead," difficulties. In his original said one of the graffiti in the version (which Nottingham University phone booth I used wanted to revive, but could not before Saturday's performance, because the end of the first "be just abandons us during full score is inaccessible) Kenia, the opera"), but any suspicion is killed by hired assassing that the Opera Group had over-treached themselves was soon premiere on October 8, 1882. dispelled by a splendidly con-fident and enthusiastic expesi-less slaughter; Dvorak per-tion of what turns out to be a suaded his librettist to rework

very nne opera maeea. to a libretto by the Czech writer and love for Dimitry, and Marie Cervinkova-Riegrova Un resolves to enter a jounnery. der the influence of pro-Russian feeling following the liberation of the Balkans from Turkish rule in 1877, she drew together from the writings of the Czech dramatist Mikovec, from dramatist Schiller's fragment Demetrius and from Russian historical sources the tempestuous story of the Czarist succession after tha death of Boris Godunov. The claims of Boris' children "Xenia and Fyodor (pressed by Shuisky, chief minister of the old regime) are ignored in favour of those of Dimitrij, who claims to be the son of Ivan the Terrible. Dimitrij becomes Czar with his Polish wife Marina but, encountering the persecuted Xenia in the vaults of Uspensky Cathedral, he falls impassioned recitatives. There in love with ber and protects are some highly dramatic her. At Xenia's insistence be scenes: in the Cathedral vaults, resulted the control of the control

Flambards: all " vroom vroom and canter

Dimitrij was written in 1881-82 between loyalty to her family Dimitrij, and in the violent final scene Shuisky kills the impostor. This was the version seen in Prague on November 28, 1885, and substantially was that presented in Nottingham. Later revisions of 1894 and 1906, which gave the opera a supposedly more Wagnerian feel by eliminating word-repetitions and set-piece numbers, were fortunately ignored in this perform-

Dvorak seized to the full the opportunities for grandinse spectacle provided by the stary. The first act is a real snorter, with rival claims fought out in the Kremin Square with massive double choruses and revnkes the death sentence on Shuisky, alerting Marina to bis love for Kenia. Merina's only defense to this characteristics of Dimitrij (who is concealed defence to this abandonment is there) booms out, ghost-like; in to reveal that Dimitrij is not the the last act Marfa. Ivan the

Last week Nottingham Univers son of Ivan, but a simple Terrible's widow, is unable to of its final dramatic direction, sity presented the British pre-peasant. swear on the cross that Dimitrij does Dimitrij fall short of is her son; and in the third act, greatness. Dimitrij and his wife have a fine duet of constantly floctuating mistrust and dying love.

An effective sub-plot is provided by the conflict between Marina's Polish entourage and the Russian court, led by tha Patriarch, which erupts in the second act as nationalistic musical taunts are thrown in the form of a rival mazurka and polonaise. One curious feature is his enthusiasm for dancerhythms and other bouncing ostinatos even whan they are quite inappropriate to the narra. tive. The orchestral writing is characteristically excellent: plenty of atmospheric scoring for wind instruments in the trehle register, several superbly managed transitions from scene to scene, and a distinctively slavonic feel to the idiom which never becomes cliched or cloy-The use of charactermotifs, while not over-rigorous or especially subtle, provides the score with a binding force.

What then limits the piece in the end? It may seem a foolist thing to say of the composer of the "New World" or the Cello Concerto, but Dvorak's gift for memorable melody is restricted: the most lyrical sections of the opera (the music for Xenia and Dimitrii) are heantiful, coloured with barmonic shifts and changing orchestral timbres, but the vocal melodies simply do not lodge themselves in the mind. Only By the end of Nottingham's

run of performances on Satur-day, it was clear that the strain of Dimittly's huge part was beginning to tell on Graeme Matheson-Bruce, though he still dominated the stage with a fine range and flerce projection whose occasionally forced passlon seemed entirely in charac-ter. Elizabeth Brice made a touching, willowy Xenia, slow to react to the revelation of her lover's identity, but clear and intense in her anguished music. Helen Lawrence as Marina acted better than either of these, and added a nobly rounded voice which failed nuly to make audible John Tyrrell's new translation. Christopbar Blades was an outstanding distinct and well-

On the tiny stage of Notting-ham's Great Hall, Pamela Marre designed a mini-St. Petersburg steps for the opening scene and a fine beraldic drop curtain which rose outwards over the pit and audience. Producer Michael Rennison did his best with the cramped conditions, though his chorus was understandably more involved with its demanding singing than in moving convincingly. Russell Keable secured some really idlomatic playing from his large orchestra: tuning was rough, hut ensemble was good, and the spirit of the piece was well cap-tured. Now perhaps, a Mackerras melodies simply do not lodge recording — nr a production at themselves in the mind. Only in this, and in the uncertainty sky's Boris?

Festival Hall

The Concertgebouw

by MAX LOPPERT

Monday the first concert of their British tour. When allowance has been made for the extra effort that tends to be subscribed on such occasions, the concert must still be balled as an evening of music-making of a kind rarely encountered on the South Bank. Tha playing of the Amsterdam orchestra was not just clear and balanced at every level, with a deep glow to the strings (the viola section makes a wonderfully full, "central" sound) and a rounded but never featureless blend of hrass and wind. It bad personality in every note, of a kind that comes about when the rapport between players and conductor is of longstanding, and when the conditions in which they normally make music together are not subject to the pressures, physieal and commercial, which so undermine London orchestral

Debussy, and Beethoven, a programme mixed so as to repre-Symptony in C was played with remarkable evenness of flow. It was a reading to emphasise the sheerly musical strengths of the plece, not just its youthful tion of the Mediterranean colour and Stella Tanner are the cast.

Bernard Haitink and the Con- sunburnt lucidity. But the singcertgebouw Orchestra gava on ing eloquence of the oboe solo in the Adagio was a reminder that. Bizet's youthful gifts included depth of feeling as well as trenchant wit of utterance. Jeux was given in the same between his myriad little cells of invention was as unobtru-sively well graded as e master symphonic conductor can make them. Here, though, the orchestral colour was always apposite as well as beautiful-Dehussy, a suggestion of veils and mists of tone, of subatance underlying the finely inflected surface, is of ioestimable benefit. Beethoven's A major Symphony, after the interval. may bave been considered the bome ground of an orchestra with so long and noble a sym-phonic tradition. Yet the performance, grounded and huilt with craggy power and strength, was no abstract monument, but a fiery dramatic expression; for everything was directed with undeterred urgency towards the final Allegro, which the con-ductor reveals as both a Dionysiac dance and the cope-stone of the whole structure.

Comedy opening Comedy-actor, Leslie Randall's first stage play, a comedy called 40 Love will open at the Comedy Theatre on Wednesday February 2I. Bernard Cribbins, Joyce Blair, Norman Rossington in the music, of its gaiety and and Val May is the director.

Mid Southern Water Company

OFFER FOR SALE BY TENDER OF £5,000,000

8 per cent. Redeemable Preference Stock, 1984 (which will mature for redemption at par on 15th March, 1984)

Minimum Price of Issue—£98 per £100 Stock

yielding at that price, together with the associated tax credit at the current rate, £12.18 per cent. This Stock is an investment authorised by Section 1 of the Trustee Investments Act, 1961 and by paragraph 10 (as amended in its application to the Company) of Part II of the First Schedule thareto. Under that paragraph, the required rate of dividend on the Ordinary Capital of the Company was 4 per cent. but, by the Trustee Investments (Water Companies) Order 1973, such rate was reduced to 2.5 per cent. in relation to dividends paid during any year after 1972.

The preferential dividends on thie Stock will be at the rate of 8 per cent, per annum without deduction of tax. Under the Imputation tax system, the associated tax credit at the current rate of Advanca Corporation Tax (33/67ths of the dietribution) is equal to a rate of 3 63/67 per cent. per annum.

Tenders for the Stock must be made on the Form of Tender supplied with the Prospectus and must be eccompanied by a deposit of £10 per £100 nominal emount of Stock applied for end sent in a sealed anvelope to Deloitta Haskins & Sells, New Jaques Dapartment, P.O. Box 207, 128, Queen Victoria Street, London EC4P 4JX marked "Tender for Mid Southern Water Stock", so as to be received not later than 11 a.m. on Tuesday, 13th February, 1979. The balance of the purchase money ie to be paid on or before 15th Merch, 1979.

STATUTORY AND GENERAL INFORMATION

The Company was incorporated by special Act of Parliement in 1893, and now supplies water in an erea of epproximately 580 squere milas in parts of Berkehire, Hampshire, Surrey and Sussex to a population of approximately 615,000. In addition, lerge supplies of weter are afforded under egreements to various Government Establishments. The length of trunk and eervica mains is some 2,375 miles and the average deily quantity of water supplied by the Company is 39 million gellons.

The present issue le being made to provide funds for capital expenditure incurred or to be incurred on new works, trunk mains and extensions of mains, necessary to meet the eteadily increasing damand for water and to repay the overdraft with the Company's Benkers created by the redemption, on 31st December, 1978, of the £250,000 3.15 per cent. (formerly 4.5 par cent.) Radaamable Prefarence Stock, 1978 and tha £1,500,000 9 per cent. Redeemabla Preferenca Stock, 1978. Tha Compeny's programme of capital expanditure is a continuing one, and further capital will be raised as and when required.

Copies of the Prospectue, on the terms of which alone Tenders will be considered, and Forme of Tender may be obtained from:-

Seymour, Pierce & Co., 10, Old Jawry, London, EC2R 8EA. Barclays Bank Limited. 65, High Street, Camberley, Surrey GU15 3RQ.

or from the Offices of the Company et Frimley Green, Camberley, Surrey GU16 6HZ.

Turkey needs the money

IT HAS TAKEN a long time for the West to wake up to the enormity of Turkey's debts. All last year's appeals for support by the Turkish Prime Minister, Mr. Bulent Ecevit, proved so many knocks on the door of the deaf. Until, that is, Real Politik intervened and simpdistic application of the domino theory led NATO to fear that, after Afghanistan and Iran, Turkey would next come under threat.

It was this fear which led to the question of "politically motivated aid" being discussed at Guadeloupe; adding extra urgency to the whole question was the Christmas week-end's rioting in South Eastern Turkey which cost 100 lives and caused the Government to introduce martial law in 13 of the

Inescapable

In the month since then an American envoy has visited Ankara, representatives of the four have met in Bonn, and the OECD has been brought into the act. The inescapable fact they have had to face is that if Turkey is not to grind into economic collapse and political chaos it will need between \$5bn and \$15bn of fresh aid in the next five years — all of which will have to be in addition to the debt restructuring now takin gplace.

of over \$5bo and is thus the largest restructuring ever to bave been seen. It has been a largely responsible for the difficult and extremely complicated task. The mismanagement of the economy in the years before Mr. Ecevit took over at the end of 1977 meant that even precise details of some debts have still to be collected. His own administration has moved slowly, negotiating every

last part of each deal.

But slowly progress has heen made. of iron and steel prodoction, the loading of major plants, and the prospects for employment in the industry, will depend upon how much they can export. The marginal husioess that can he picked up hy aggressive selling in international markets—added to traditional export busi-

ness-will represent the difference between profit and loss to number of steel companies in the West. It is not a situation that the hig steelmakers like. But they accept that they must learn to live with it.

A world-wide view of the iron and steel industry does not give a picture of an industry in receasion. On the contrary, world steel production in 1978 stood at some 712m tonnes and was both an all-time record and an improvement of more than 6 per cent upon the previous

But there are glaring disparities in the way the higger cake is being shared. The member nations of the European Econo-Community collectively achieved a 5 per cent improve-ment in steel production during last year. However, the 132m tonnes of steel made in the Mine was still 15 per cent below the production levels enjoyed In Europe pre-1974.

And in Britain steel production in 1978 was actually 0.5 per cent below the 1977 figure. The state-owned British Steel Corporation experieoced a fall in production of some 3 per cent to 16.7m tonnes for the year. It was the smallest quantity of steel made by the corporation lo any year since the greater part of the British steel indus. Iron and Steel Institute, and try was nationalised ten years prohably rose hy something

The private sector companies In British ateelmaking increased production slightly during the year to 3.6m tonnes. But, overall, Britain lost ground in the world steel-making league, even faster than the remainder of the Community.

In the U.S. steelmakers fared better. Helped by a relatively insulated home market, and stronger protection against the future.
steel imports during a period In Latin America, Asia, Africa

Output in China is estimated to have recovered strongly, after set-backs in recent years, to a record level of 31m tonnes. One has to turn to the developing countries, bowever, to find examples of really outstanding growth in iron and steelmaking during the past 12 months and good prospects for

On average the steel industries of the developing nations expanded production by more than 10 per cent. They will do as well, if not better, this year. And it can be confidently pre-dicted that, by the end of 1979,

Steel Production in the Western Nations

1975

they will be producing at a rate of more than 50m tonnes a year. Among the higgest producers is Brazil, already achieving more than 12m tonnes a year output and with plans to expand steelmaking to more than 30m tonnes a year by the late 1980s; India having achieved a 30 per cent increase in four years; and Mexico with nearly 7m tonnes production and new works being huilt or planned to raise that to

This year the steel producers have an opportunity to break free from the traumas that bave heset them since the mid-1970s. and to prepare their strategies for the 1980s.

18m tonnes a year.

The probable future consumption of steel is at the heart of world, the matter. As an industrial But material it is still riding high. Inroads from other materials such as aluminium and plastics may be encouraging their manufacturers. Bu: so far they are gadflies attacking the basic business beld by iron and steel. After the world record steel

consumption of 712m tonnes make short-term gains.

last year, the steelmakers can Japanese steel prolook forward to a further increase in world demand during 1979 of more than 20m tonnes. That will be equal to the total annual output of the British steel industry.
Who will cream off the addi-

tional husiness? The picture for 1979 is beginning to look like this. European steelmakers do not expect more than marginal growth in consumption in their ing table of 1979 European consumption forecasts shows that the entire EEC market plus Spain and Sweden-the other hig west European steel-usersare oot likely to use more than an extra 3m-5m tonnes of ateel this year. Therefore, hopes of substantially hrisker activity hy European steel mills must be based upon additional sales outside Europe. The salesmen will hava to be both aggressive and - is contemplating increasing out-

persuasive. The U.S. companies are not

1979 EUROPEAN CONSUMPTION **FORECASTS**

1976

FOUR-MONTH MOVING AVERAGES

Britain: Probably little or no change upon the 1978 figure of 21m Possibility of a small increase in consumption from 20.8m tonnes in 1978 to 21.1m tonnes.

Germany: Economic recovery is expected to be modest but enough to add about Im tonnes to the 1978 steel consumption

Government measures are expected to revive the

tonnes improvement upon 1978. d: A small decline in steel consumpt with 4.6m tonnes in 1978 is forecast. m-Luxembourg: Steel consumption is expected

with production now running at nearly 10m tonnes a year, after Denmark: A small steel user, Denmark is expected to tion marginally to 1.6m tonnes in 1979. Because of tough economic policies, to be static at about 9.5m tonnes.

m: Industrial recovery is forecast sufficient to raise steel consumption from 3.9m tonnes (1978) to 4.3m tonnes in 1979. Based upon industry forecasts.

much interested in export busi- much of that steel will find its ness. They are far more concerned with protecting their 124m tonnea home market from incursions from the rest of the

But the Japanese companies are beginning to chafe against their self-imposed export restraints, and with reason. They led the movement during 1978 for world-wide moderation in steel marketing only to see a number of European and developing world producers

Japanese steel producers have indicated they will be re-entering world steel markets this year. If they came back in their old, aggressive style it would be a serious threat to all other producers. Japan's production capacity is immense. But so far the signs are that their new export drive will be carefully managed and limited in extent. It will not encomagain, the total Japanese steel-

making capacity. As for the 1980s the most potent factors in everyone's calculations are the dynamic growth of steelmaking in the developing nations, and the incalculable impact of China. Already Chinese steel production is more than 30m tonnes a year —all of which is being used in the home market. But China put by another 30m tonnes during the next decade. How

way onto world markets?

The extent of the contribution likely to be made to the world steelmaking scene by developing nations during the next ten years is assessed in new forecasts prepared by the United Nations Industrial Development Organisation (UNIDO).

The United Nations body fore-sees the developing nations seizing a market share in world iron and steelmaking by the late 1980s at least equal to the ahares now beld by the Europeans, the Americans, and the Japanese.

In short, a new force in world steelmaking is being created, very rapidly. It is, of course, being helped into being by the eager involvement of the Europeans, Americans, and Japanese in the building of new steelworks and ore recovery plants in the developing nations and in

A United Nations report sees the technical capacity of the iron and steel Industries of the industrialised countries as their trump " card and comments:

"It is this card that the American, European, and parti-cularly the Jajanese companies, must play to their hest by offering package deals which include feasibility studies, licensing agreements, technical supervision, tachnical assistance etc. for the construction and com-

The year of the salesman nissioning of new iron an ateel, units.

BY ROY HODSON

Manwhile, the growth of iron and steelmaking in the developing countries is likely to continue at between 10 per cent and 20 per cent a year on average during the next decade The export-minded European

and Lapanese steelmakers will find it hard to reconcile the growing output of those nations with their own aspirations to setl surplus iron and steel are duction to the same countries;

UNIDO sums up the dilemma a progress report: "The shift in the pressure for the develop ment of the steel industries the different parts of the world presents the developing com-tries with an exceptional opportunity. They are able to pursue their own development schemes provided they are sound, with technical assistance and deliveries of equipment more readly available from developed countries than at any time during the past ten years. The developing countries will thus be able (1) to make rapid progress with their steel industries. (2) to reduce their dependence on imports and improve their balance of payments, and (3) to create a sound basis for their engineering industries and further industrialisation."

The opportunities afforded in world steelmaking for the developing countries in the next ten years can equally be read as the problems facing the traditional world steelmakers.

Attempts will be made this year to reconcile the differing interests of the new steelmakers; and the old. .

But little can be done in the long run to preserve the world-markets of Europe, the U.S., and Japan against the new producers. Mr. Tony Solomon, United States Treasury Under-Secretary, recently admitted this. He said that the products of the new steelmakers should'

be allowed into the U.S. as long as they were on fair terms. The OECD steel committee. under its chairman, Mr. Alas Wolff, the U.S. deputy special trade representative, faces the months of drawing up the guide lines for restructuring from and steelmaking and marketing of a truly international scale to with renewed confidence into

Iranian labours of Hercules

Ladies and gentlemet, welcome aboard this Hercules 436 Arctic Rescue Squadron from Trenton, Ontario. It's a little short on luxury but the price is right." This unlikely greeting is becoming familiar to expatriates fleeing Iran. The Canadian Air Force Herculesa little like a flying boller room with a makeshift latrine at one end—is not the ideal form of transport, but it is the cheapest.

It is also the best when com-pared with the alternative of facing a main terminal jammed fellow-expatriates senophohic troops, and bribing one's way onto one of the few. commercial flights still prepared to risk landing in Teberan.

The Western expatriate population, which numbered 100,000 in Iran before the present turmoll, is now down to 6,000, of whom 3,000 are American and 1,500 Britisb. With 75 per cent of industry at a standstill, the oilfields silent, and more trouble brewing, that number is likely to drop to almost nothing.

Yesterday's batch of evacuces included employees of the Bell helicopter company, part of whose major contracts with the armed forces has heen cancelled and the prospect for other foreigners looks similarly bleak. Even if they are allowed back io the same numbers, which looks unlikely, the good life they enjoyed under the shah will perhaps he no more than memories.

Action postponed Some followers of the Kagan fortunes may bave found the subject of unemployment and bealth a fascinating substitute for the well-publicised interview with the runaway raincoat. manufacturer, due to have been screened on Monday night. Others may have been disappointed, and a little puzzled. But a senior executive of Granada Television assures me

that the decision not to show

"purely editorial." Moreover, he aays, "in no way whatsoever bave we been subjected to any pressure from untoward outside

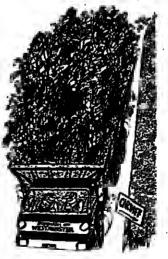

It is, bowever, admitted that editing the film proved trickier than was thought, since the Kagan affair is a legal mine field. Granada proposes to bold back the interview, ahot in Tel Aviv. until next week. Meanwbile, all the World in Action team will reveal is that Kagan, 63, offers "a number of different answers" to the question of wbether he will return to face charges of tax and currency

Untangled snake

With a sure instinct for what interests the man on the Berlin omnibus, the East German government bas taken the daunting step of explaining the European Mooetary System to its citizens. The Marxist version is presented through th usual ploy of a letter to the editor of the Berliner Zeitung, com-posed by a thoroughly briefed citizen purporting to be troubled by the Snake. Albert Hoffmann asks what is the logic of "the evr more bectic currency negotiations by the West European industrial states."

The answer, as presented by an East German economist, gets straight to the point without clouding the issue with snakes and such-like. The West Germans, he explains, are trying to dominate Western Europe in order to compete with the U.S. and Japan: "One way to achieve this is through stable currency rates...

Taking the bus passenger patiently by the elbow, the economist gives an example. 'Let'a assume," he writes, "a West German company delivers goods worth DM 1m to France and gets 2m francs for it. These are exchanged in the federal republic into DM. Let's further assume the French importer has

Get ready Bert, we're in Callaghan conntry!"

chang rate changes 5 per cent in favour of the DM, then 2.10 francs are needed to buy DM 1. The company doesn't get DM 1m, only DM 952,380." Did Helmut Schmidt and Giscard d'Estaing know this when they agreed on the EMS?

Audley's prize

Bernard Audley is a prodigal son of the smartest type: he brings his own fatted calf home with him. Last year AGB, the research - publishing - computers group that he has pushed into the top ten of all the profitahility tables, took over Hultons -where Audley was once assistant general manager—and now has spent £850,000 buying out Bedford Attwood, another ex-Audley employer.

The latest acquisition is particularly piquant. Audley, along with fellow directors, Dick Gapper and Douglas Brown (bence AGB) walked out on Attwood after failing to convince him that he should share control of the research company Sticking together with them. they formed their own research firm. Six years later, in 1968, two weeks to pay. If the ex- they had their first sweet re-

venge by taking the key TV audience research project away from Attwood. On the basis of this, Andley

and Brown (Gapper sadly died in harness) have steered AGB into the only publicly quoted research company, and the most profitable: turnover in this inancial year should top £20m and profits are likely to he For many years Audley and Attwood did not speak—just

competed furiously for research contracts. Now Attwood has topped 70 and wants more time to devote to his passion for inventions. There was an American bidder in the market for his company, but in the end it was the Andley offer that won. There is not too much of Attwood's British operation left now, but its Dutch husiness is thriving, giving AGB aoughtafter expansion there.

Andley is now 54; be aims to develop AGB as a publisher, a research company, and an information and marketing services supplier. A £50m turnover in two years time is his target A ceaseless conversationalist, with a disconcerting tendency to lapse into German for the right word, Audley has roared through the business world at an accelerating pace: but then the only time be keeps still is when his Ferrari is stalled in a traffic jam.

Pedal power

With the Kampala air full of rumours and gunfire, there is intense speculation on the Gulf about an advertisement which appeared in two Saudi newspapers last week. Placed curiously hy Uganda Motors, it invites tenders for 5,000 blackenamelled men'a bicycles. There are 15 specifications, including the size of saddle and a 3 in bell, auggesting a military mind at work. The Tanzanians should look out for surprise tactics on the border.

The biggest of the other plants is near Moscow. It makes such a scheme.

around 200.000 Moskvich cars around 200.000 Moskvich cars at Togliatti, taking its outout-of-town use. There is an associated plant at the town of Izbevesk which makes a fastback version of the Moskvich called the IZH. It has an annual capacity of 120,000.

have taken place with Fiat about calls that the 150,000-a-year was not a: theoretical capacity but that the factory was designed to produce at that pace. It will also make 220,000 diesel engines a year—comparable with Ford's worldwida cutput in 1976.

According to Mr. Igor Rouharev, vice president of according to Mr. Anatoli Zhitcapacity of 120,000.

The plant in the Ukraine which makes Russia's version of a mini-car, the Zaporozhets, also has a capacity of 120,000 a year. At Gorki there is a factory turning out around 80,000 ears a year. Most of them look rather materials will flow towards the year. Most of them look rather like the larger models in the Vauxhall range. They are called the Volga and are used as taxis.

It is at Gorki that the Chaika
is also made. It is said
that about 16 of the hand-made Zils are produced at what is: primarily a truck factory.

The Soviet Government seems to bave decided that for the time being the Industry is-big enough. Should it decide otherwise, Togliatti could be expanded substantially et reletively low cost by adding another assembly line. Discussions planning of the truck plant re-

according to Mr. Anatoli Zhit-kov, director-general of the organisation responsible for the plant, bss been shelved at least until the end of the next five-Kama River where at Neberezhnyje Chelney, a town near the geographical centre of the

Daimler-Benz (Mercedes) and Fiat technology has been used at the enormous Kame works which consists of an amalgamation of seven different plants and is supposed to be capable of producing 150,000 trucks a year to be callad Kamaz.

Soviet Union, there is another

massive motor industry develop-

According to Mr. Igor Konharev, vice president of Avtoexport the organisation which will be responsible for export sales of the Kamaz, pro-duction will reach 5,000 this year and will build up to the 150,000 trucks and 220,000 diesel engines by 1982.

The Soviet Union has very faw service stations at present bot those that do exist are usually very larga indeed. One estimate is that there are only 350 to serve the whole of the beavily populated western region of the couotry. There are only 16 to service Moscow's Im cars. Motorists are encouraged to do-it-themselves and Russian cars are designed with this in mind. The Lada comes with a 21-piece tool kit in the

will appear next year on tha

but incorporate certain mechanical refinements, a more comfortable interior and modified versions of the current engine, perhaps including a two-litre

Togliatti's designers bave developed a four-wheel-drive, on- absorbed in the sales networks off road vehicle which looks of the western manufacturer like a small Land-Rover and is concerned.

called the Niva. Production has With an up-dated range of started. It is intended to export perhaps 600 to Britain in 1979, hand-drive models.

The Togliatti design team has been stretched because Russia's new mini car was also developed at the plant. This vebicle, which should be on Russian roads by 1981, will be made at the Zapo-rozhats plant. It will be a frontwheel-drive, transverse-engice, three-door hatchback which looks remarkably like the Ford Fiesta according to those who bave cangot sight of pre-production

Tha Soviet Union is also in a burry to get a new family-sized saloon into production as quickly as possible. For that project it bas turned once again

According to Mr. Kouharev, of Antoexport, the idea origin-ated with Citroen of France three years ago when it was in financial trouble and before It was merged with Peugeot. The concept is that the same car should be built both in the

Soviet Union and in the West.
Ford, General Motors, which
makes Opel cars in West
Germany and Vauxhall veblcles
in the UK, and Renault have all been lovolved in the more recent discussions with the Soviet industry. The Russians insist that they are seriously interested.

But there are no real signs of enthusiasm among western car makers even though, unlike Fiat, they would not fece the prospect of having models similar to their own but at A revemped range of Ladas cut-prices competing in some

cars in payment for reequipping the Moskvich plant territories — the UK, the U.S.,

exported. Six out of 10 Russian cars exported go to other Eastern bloc countries to help pay for the off-road construction trucks (8,000 a year) and (10,000 annually) the Soviet Union burs from the Comecon area,

Hard currency

That leaves about 115,000 cars for export to the West, not a large number but a useful supplier of bard currency for the Soviet Union. Britain provides the birect of the western vides the biggest of the western export markets for the Soviet industry. It takes between 15,000 and 17,000 Soviet cars a year. France takes between 10,000 and 12,000; Belgium between 9,000 and 11,000; West Germany between 10,000 and 12,000; Finland around 10,000, and Holland 6,000 to 8,000.

The franchise for sales in the UK and West Germany Is held by Satra Motors, a subsidiary of the Satra Corporation, a U.S. group set up in the 1950s by Mr. Ara Oztemel who started by importing chrome ore from the Soviet Union. Satra has just signed its 1979 contract with Avto export to take up to 36,000 cars next year and bopes to sell 25,000 in Britain.

Satra also bas the franchise being tested by the authorities ably not take place before the before marketing begins "in a end of the 1980s.

arrangement would modest way." mainly in the New are that they will bave the same involve the western manufectengland area. Satra reckons it body shell as the existing range turer taking some Russian-built can be salling some I adae a

> ambitions, and these could be be believes the Soviet industry's plans for the future are ambltious — "including making model changes every year." The potential for the Soviet Union cars to offer, the Soviet industry to become as big a car maker would be protecting its export as the U.S., with its output of business. Around 30 per cent around 110m cars a year, is of its passenger car output is certainly there if the will to develop the motor industry existed.

> > The question Satra is most frequently asked is: Why do Lada cars cost so much more in the Soviet Unioo than they do In Western markets?

The answer is that pricing structures in the Soviet Union reflect the priority given to various products or simply the Soviet Government's need for

more cash. Mr. Loogley denies ony suggestion that Soviet cars are being "dumped" on Western markets. "We have dooe enough work on this to believe that the real cost of the cars is well below the price Satra has to pay for them. We fix our

retail prices by reference to what the competition is doing. "The cost of manufacture is much lower in the Soviet Union than anywhere in western Europe. And the rate of inflation is minimal, much lower than that in the UK for example. The difference is so great that it would be possible for us to undercut BL (British Leyland) by 20 per cent in just

two years. That is ooe reason why western car makers must be thankful that expansion of the Soviet motor industry --- and the lncrease in exports that for the U.S. and bas six Ladas would accompany it-will prob-

Letters to the Editor

Russian policy

From Elizabeth Young Sir-Your East European correspondent, Anthony Robin-son—"Russia warns West against joining anti-Soviet policy"—(February 3) quotes Georgi Arbatov, of the United States-Canada Institute in Moscow, as complaining that "the Chinese are trying to involve

the U.S. and the west in an anti-Soviet policy." Mr. Arbatov might ask himabout, when relations between the Soviet Union and the People's Republic of China started out so well. Ha might remember Soviet behaviour to China at the time of the offshore. islands crisis—when the United States was threatening China with nuclear weapons, and the Soviet Union averted its eyes until the crisis was over; ha might remember 1963, when the Soviet Union plumped for a (necessarily anti-Chinese) antiproliferation policy alongside the U.S. in the partial test ban, rather than a serious disarma-ment policy which involved a complete test ban, alongside China; ha might remember the Ussuri River episode in 1969, whan through its radio station,

Chinese nuclear installations.... These appallingly foolish actions mave now come bome to roost: Tha Same kind of folly con-inues, with Soviet bullying callng np loathing and contampt wherever it is exercised—just as

American bullying did in South
East Asia and elsewhere.
The Soviet Union has Tha Soviet Union bas taken ilmost every step to ensure hat its neighbours will fear It ind distrust it: thus calling up bat very encirclement it has ilways feared.

Cancelled

weaponry From the Co-ordinator, Cam-

paign Against Arms Trade

Sir,—Recent events in Iran, culminating in the suspension and possible cancellation of all military contracts, illustrate the dangers of using the arms trade as a political and economic tool. Politically, there is the very real risk of highly sophisticated weapons falling into the handa of Governments quite different from those to whom they were originally sold. Economically, these suspensions — combined with the American cancellation of the advanced Harrier deve-

There is a very real possibility that these suspensions and cancellations will be used as an excuse for a heightered sales new crossing — don't do things drive, trying to find new markets by halves, build two. Space around the world for British them well apart so as to spread weaponry. Instead, they should the approach networks. One provide an opportunity for

Protectionism is not the answer

From the Information Officer,.
World Development Movement Sir,—We strongly support Mr. Robert Franck's conclusion (February 2) that protectionism is not tha answer to the textile industry's troubles. As he points ont, developing countries are proving more competitive in this field and we believe they bave the right to specialise

in those few areas in which they can be best at. All the arguments about tha impact of Third World imports on jobs here bave been grossly overstated. Tha truth is-and a recent report prepared by the Foreign and Commonwealth Office is there to prove it—that competition from 23 newly industrialising countries, includ-ing Spain, Portugal, Yugoslavia, Greece. Turkey, Malta, Poland, Romania and Hungary, was res-ponsible for only 2 per cent of tha jobs lost in Britain between 1970 and 1977. An equal number of jobs was created in in-

dustries exporting to these The report also makes the point that Britain's main competitors are still Organisation for Economic Co-operation and Development countries. Tha newly industrialising countries have around a 10 per cent share of the UK's manufactured imports but the money quickly comes back in export orders. In 1975-77 over 30 per cent of the UK surplus trade in manufactures was with the newly industrialising countries. It is evident then, that trade in manufactures with the developing countries is favourable for

employment bere. It is high time that we cease blaming developing countries for Britain's unemployment problems. Energies would be better spent doing more of what Britain is good at, namely, chemicals, engineering products, capital equipment and

Maria Elena Hntado. Bedford Chambers, Covent Garden, WC2.

Wages not cause of inflation

From Mr. D. Wilkins Sir,-Mr. Frank · Blackaby (February 2) makes one despair of economists and particularly bouse purchasers or is it intent those of the National Institute. of the advanced Harrier deve-lopment—may cause severe Their assertions and forecasts are regularly and depressingly proved wrong year after year

depends on the proliferation of this fallacy. .

The fact is that our current industrial troubles are caused by the destruction by this Government, encouraged by the trade unions, of the market mechanism of the price of labour. The result can be seen in current gross distortions in differentials; the direct cause of the unrest. Wage increases are the result, not the cause,

The electorate is being fed the wage driven inflation fallacy to divert attention from the fundamental domestic cause of inflation - to use a down-toearth business term—overheads. That is to say Government

As long as fewer and fewer of us bave to provide wealth to support more and more bureaucrats, Government departments, loss-making companies, nationalised industries, Quangos, National Enterprise Boards and other unproductive and inefficient enterprises, the currency will continue to be devalued.

D. C. Wilkins, 42 St. Winefrides Road, Littlehampton, Sussex.

Stamp duty on homes

From Mr. A. Roper Sir.—Further to the comment in "Men and Matters" (January 12) and the letter from Mr. A. Newton, MP, and Mr. J. MacGregor, MP (January 12) and the many also be many 23) and it may also be men-tioned that according to Press

statements the National Federation of Building Trades Employees and other building industry organisations recom-mended in their memorandum to the Chancellor recently that starting point for stamp dnty on a honse purchase be raised from £15,000 to £25,000. Your report on the memoran-dum (January 17) did not make any mention of this recommend 1974 by Mr. Healey when the average new home cost £11,200 mpared with £18,400 today. The position is that house purchasers in all except the very lowest range are now involved in the very considerable additional expense of substantial stamp duty which they can ill afford and which can only be regarded as a punitive form of taxation. To take one example, on a purchase price of £26,000 the combined stamp duty and Land Registry fee payable to the Government would amount to £443.25. If the average new home costs £18,400 as suggested the combined stamp duty and Land Re_istry fee payable to the Government on this price is

likely to be £130.40. I would respectfully suggest that there now be a public clamour for the total abolition of all stamp duties and possibly also Land Registry fees, thus bringing into effect a consider able saving for house purchasers where their pockets are really affected. Is the Government really interested in belping on maintaining a punitive form of taxation, the administrative expenses of which are in any event probably disproportionate to the amount of revenue which

In the great tradition of merchant adventurers...

Sir Francis Drake didn't spend all his time sleeping in his hammock a thousand miles away. He drove many a hard bargain in the export markets of the day, using negotiating tactics which can best be described

as open and direct. His drive and energy have a modern, and more peaceful, parallel with the Ward group. Ward pursues trading opportunities in many distant markets for a uniquely diverse range of products and services. For example, Wardpower generating sets are providing power for water-well drilling in the Middle East.

In Zambia, a Ward company has provided a 36 tons, 38 feet diameter iron casting wheel for a copper refinery-one of the largest ever

manufactured in this country. Another Ward company is supplying a wide range of eye, face and head protectors for the developing

industries of Saudi Arabia. Drive and energy. Just two of the many attributes of this wide-ranging organisation, whose skill in using the trade winds would have commanded the deepest respect of the doughty Admiral.

INTERIM STATEMENT FOR THE YEAR ENDING 30th APRIL 1979

PROFITS AND DIVIDEND

The Group is trading prolitably and actively in all divisions although difficult conditions in certain areas of our business have caused the Group profit figures to date to be lower than these for the comparable period of last year. The Board cannot, at this stage, make an accurate forceast of the final outcome of the current year.

Factors relevant to the position are the industrial disturbances which affect all activities concerned with the movement and distribution of goods and commodities within the UK or through the ports and the consequential higher cost of finance. Adjustments will have to be made for the indigenisation of our Nigerian subsidiaries, which may have taken place by the end of the year, and the possible liquidation of our residual interests in Iran.

There are a number of major new developments in overseas territories on which the Projects Division has been working for some time which are now nearing completion, but the date when the contracts for these will be signed, with the Governments concerned, and exactly what impact they will have on this year's profits, is not yet clear.

The ondook for the future of the Group remains encouraging and the Board have declared an interim dividend of 2.25p, as compared with the equivalent rate for last year of 2.125p. Further the Board expect to be recommending in due course the maximum final dividend payable under the present dividend restraint legislation, which should amount to 3.42p per share, making a total for the year of 5.67p, as compared with the 5.125p total for last year. (The 1978 dividend rates have been adjusted to allow for the 1 for 1 scrip issue made in

But there was a marked lack \$3.34bn or \$11.62 a share.

Full year world-wide sales increased 15 per cent, from \$54.96bn to \$63.22bn. The company said that price increases

as the most pressing problem we face as a corporation and a nation." They complained that the company has been unable to programmes

With the belp of a 7.2 per recover fully its escalating costs, world'o largest automotive come cent increase in fourth quarter with the resut that GM's profit pony, reports a 5 per cent net income to \$1bn. GM's full margin, which had fallen from increase in net profits last year year profits totalled \$3.51bn or 10.3 per cent in 1965 to 6.1 per to a record \$3.5bn. \$12.24 a share, compared with cent in 1977, was only 5.5 per cent last year

The company's world-wide factory sales of cars and trucks totalled a record 9.48m units. 414,000 more than the year

Apart increases, which included a 10 per cent rise in hourly wage costs, earnings were also adversely affected by bigher costs for special tools and facilities associated with new model

Strong lift in Boeing earnings and payout

By Our New York Staff

BOEING COMPANY, the world's leading commercial aircraft manufacturer, reports a steep rise in 1978 earnings. bulging order book, a threefor two stock split and a 25 per cent, increase in quarterly

But a selling wave on the New York Stock Exchange wiped \$2; off the company's share price to \$74; Expecta-tions of a three or four year boom at Boeing have pushed the stock up from a low of \$25 last year, but its closing price gave Boeing a price/ earnings ratin of 9.8.

Fourth quarter earnings surged 92.8 per cent from \$55.8m or \$1.21 per share to \$107m or \$2.52 per share. Safes increased 43.6 per cent from \$1.13m tn \$1.62bn.

Full year earnings were up 79 per cent from \$180.3m or \$4.24 per share to \$322.9m or \$7.57 per share. Sales rose 36 per cent from \$4.11hn to

New aircraft orders totalled record 490 jetliners worth \$11bn, compared with 228 worth \$4.1bn the year before. this year are scheduled to approach \$8bn

Agencies add from New Yurk: In sharp contrast. another leading aerospace pro-ducts manufacturer, Grum-man Corpuration, reported a decline in fourth quarter net profits to \$3.9m or 44 cents compared with \$7.8m or g5 cents for the previous final quarter. Sales were down to \$350m from \$400.2m.

Net profits for the year declined in \$19.9m or \$2.19 per share from \$32.3m or \$3.53. Turnover increased to \$1.97bn from \$1.75bn.

Utd. Technologies

Howard C. Kauffmann, president and a director of Exxon, has been elected to the Board of directors of United Technologies Corporation, writes our Financial Staff. OIL INDUSTRY RESULTS

Controls may continue

BY DAVID LASCELLES IN NEW YORK

pass on, brought most producers

domestic oil prices.

lies in their other activities.

UNDER GLARING lighto at his in Alaska wos a big boon. latest news conference, President Carter was asked: "The fourth quarter profits there it greatly swelled pro-

are out for the big oil com- ducers' earnings since Alaskan panies. I won't mention any oil hoo opecial dispensation panies. I won't mention any names, but they reached 4g per from price controls. The bigcent, 72 per cent, 44 per cent, gest gainer was Sobio now and 134 per cent. Given the fact you've asked

the country to make sacrifices. to prepare for lean and austere years, I was wondering if you'd give us your reaction to those profits — when American workers are being asked to bold wage increases to 7 per cent?"
In a rambling reply, Mr.
Cartar evaded the question which was not surprising, since oil company profits are once again a controversial subject.

Actually, the question was unfair. The four companieo referred to (respectively Exxon, Texaco, Gulf and Sohio) did indeed enjoy a large jump in earnings in the final quarter of 1978, but

several othero did not. Sheli oils were flat, Indiana Standard'a were down 3 per cent, Marathon's were off 2 per cent and Occidental indicated its own would be disappointing, all apparently confirming that bere is no such thing as a in oil company

performance. Even so, with Mr. Carter facing a decision on the future of U.S. oil price controls, the economics of the oil industry are under close scrutiny—as the preos conference sbowed—and the final reports for 1978 are bound to bave a bearing on Mr. Carter'o decision.

What do they show? First, despite the rapidly rising cost of exploration and production, the industry can increase sales even faster, thanks to the leeway in current price controls and the National Energy Act, passed last autumn, which set in motion deregulation of natural gas

As Shell Oil's president, Mr. John Bonkout, carefully phrased it: "Higher prices for domestic production of crude oil and —coal, nuclear, minerals and natural gas more than offset the new ventures—all made a loss. higher costs associated with these operations, resulting in a beneficial effect on earnings." The achievement of full pro-

duction at the North Slope field

national austerity, it is bound to damage the oil industry's Apart from bringing the longawaited return on investment stridently voiced case for on increase in domestic oll prices. With Mr. Carter empowered

to lift price controls in May, two and a-balf years before they expire by law, the industry majority-owned by Britiab Pethas been pressing for an end to regulation on the grounds roleum whose earnings leapt from \$181.1m in 1977 to that present prices are too low to finance development of future sources of supply, which Second, the mild autumn created unseasonally high delie in hostile and remote areas. mand far petrol which, com-hined with the extra costs the oil companies were allowed to (The avarage domestic price is curreotly \$8.50 a barrel against

They also claim that present rules and controlo leave little incentliva to enbance produca surge in both real and dollar sales. (For some reason, the weather did not bring a parallel tion from existing wells. reduction in demand for heating oil, which became scarce and expensive.)

OPEC's \$13.50.)

The most dramstic evidence of this was Ashland Oil'o decision last June to pull out of exploration and production alto-Tha tightness of the refined products market is expected to gether because of its growing cost and complexity, and con-centrate on more profitable With President Carter things instead. Since Asbland's facing a decision on the deciaion, the Iranian crisis has injected further uncertainties, future of U.S. oil price controls, the economics of the which many oil companies warn oil industry are under close scrutiny. Apart from will affect earnings in 1979.

And even If prices are de regulated, the industry would be lucky to derive any direct attracting unwelcome publicity at a time of national benefit

austerity. the apparent Mr. Carter has promiced to health of the oil and gas impose some accompanying tax business is bound to measure to prevent the oil comdamage its stridently-voiced panies reaping windfall profits. Privately, many oil executives are resigned to not getting what case for an increase in they want, and are presumably adjusting their plans accord last for some time-years even

Furthermore, present controls -hecause of the environmental on refined products prices take constraints on refinery expanthe form of a formula, not a ceiling. In other words, refiners conditions aeem favourable for the oll industry's main lines of business. The pincb are not in a bind, but can pasa on recognised cost increases to their eustomers, a fact which-further weakens their case for The persistent weakness of the chemicals industry brought deregulation. losses or at best flat earnings.

Only a few days ago, the The notable exception was Exxon, whose chemical business Energy Department estimated that the price of petrol would increased profits by 27 per cent. rise at least 9 cents a gallon, or more than 10 per cent, over though the industry leader's other non-oil and gas ventures the next two years without any change in price controls. And, even with deregulation, the price would only go up a

However, the apparent health of the oil and gas business could be embarrassing. few cents more. Mr. Carter's main concern Apart from attracting unwell now is with keeping prices come publicity at a time of down, not pushing them up.

Dawe action likely on Moscow **Narodny**

By Philip Bowring in Hong Keng Following the effective dismissal in San Francisco on Monday of froud charges against Singapore entre-preneur Amos Dawe, it seems likely Mr. Dawe will now lounch further legal assaults on his adversaries, notably, the Soviet-owned and London-

based Moscow Narodny Bank, The Singapore branch of the Soviet bonk was the principal supplier of fundo to Mr. Dawe's Mosbert group, a South-East Asian diversified property, investment and financial concern which columned in 1975. The group is the columned in 1975. lapsed in 1975. The group, headquartered in Hong Kong but with most of its operations in Malaysio and Singa-pore, fell apart following the withdrawal of support by Moscow-Narodny, which had loaned it sums believed to

exceed \$50m. Mr. Dawe voluntarily sur-rendered to the California authorities last August to face charges arising from his attempted take-over in 1975 of three small California banks. Mr. Dawe alleged that Moscow Narodny reneged on commitments to him to fund his purchase of these banks.
is understood that Mr. Dawe's

lawyero will soon bring an oction in Singapore in an attempt to have a bankrupter judgment made last year, against Mr. Dawc nullified. Mr. Dawe is involved in a large number of suits against everal more similar cases in

Malaysia are expected. In London last November, Mr. Dawe sued in connection with the foreclosure by Moscow Narodny on shares in Consolidated Hotels, a Singapore botel company, and he is expected to allege conspiracy to defraud. Also in London Mr. Dawe is sning Moscow Narodny for alleged failure to honour a credit commitment with respect to the aborted California bank pur-

It is expected that an attempt & may be made to have the Con--solidated Hotels case shifted from London to Singapore.

Emhart ahead despite late weakness

aheod in 1978, despite a slackenlog in profit margins in the final quarter.

The year-end figures show an \$70.2m in net earnings, on sales of \$1.3bn against \$1.2bn in the previous year. Share earnings have risen from \$5.26 to \$5.93.

Emhort operates on a worldwide basis with substantial

Shoe Machinery, a U.S. group

then much larger than Embart But the fourth quarter showed oignificant slackening in profit margins. Net profits for the quarter were 13 per cent higher at \$19.4m, while sales at \$366.3m, obowed a rise of 17 per cent. Share earnings of \$1.62

compared with \$1.50 last time. The company said that in-coming orders of present are 14 interests in Britain. Its products per cent above those for the change translation.

EMHART CORPORATION, one raoge from glass bottling corresponding period but deof the top 200 companies in the machinery to security alarms clined to give specific figures. U.S. by the Fortune magozine and tanning equipment. Two At the year end, the order backlisting, has pushed net earnings years ago, it merged with United log stood at \$409m, some 29 per At the year end, the order backlog stood at \$409m, some 29 per cent higher than a year ago.

Emhart comments that the year end totalo take in a de-crease in net earnings of \$15.8m or \$1.30 a chare following adjustment of the LIFO accounting method.

But it also included a gain of \$5.3m or 43 cents a share against a loss of \$6.9m or 5g cents a share after foreign ex-

EUROPEAN MOTOR INDUSTRY

Daimler-Benz warns of changes

DAIMLER-BENZ, the West German quality car and commercial vehicle manufacturer. is expecting "satisfactory results" for 1978 with profits results for 1975 with profits running at the previous year's level. For 1977 the group reported a net of DM 445m (\$239,2m) which was well up on 1976's DM 392m.

The years outturn, according to a shareholders' circular published today, would have been even lietter had it not been for the metal workers' strike carly last year that cost the company 25,000 cars and \$,000 commercial vehicles in lost production. At the same time the group had to contend with increases in personnel costs and rising overheads.

Meanwhile, Professor Joachim Zahn, chairman of the group's executive board. at a private meeting in Frankfurt on Monday, warned the German Motor industry against excessive optimism.
The industry would have to
go through radical changes in
tha next few years, he said.

The challenge from Japan remained strong, he said, while even flarer competi-tion could come from the U.S. BY GUY HAWTIN IN FRANKFURT

in the near future. Tighter environmental legislation in America was forcing the U.S. manufacturers to invest heavily in new plant to turn

Daimler, he said, had "a better than average chance of meeting new market conditions—one advantage being experience in diesel technology. Of the cars produced by the group last year 44.7 per cent were diesel powered, compared with 41.3 per cent

Group turnover rose by 4.4 per cent—from DM 25.9bn to DM 27bn (\$14.54bn) — et

Daimler last year despite a decline in unit output. Strongest sales growth came from the group's overseas subsidiaries. The German parent concern's sales rose from DM 21.15bu to DM 21.95 bn.

Capital investment during 1978 totalled DM 1.3bn against DM 1.1bn. The hulk of it is earmarked for German plants. Domestie capital investment amounted to DM 1.1hn, comunder DM 900m in 1977. The main target of the

programme

capacity in the car sector. Considerable sums have also been allocated for improving product and manufacturing qualify on the commercial vehicle side.

The current year should see a substantial increase in group sales. In the car sector, the order book remains full and demand both at home and abroad continues strong.
Increased capacity has led to
group projections of an 8 to
10 per cent increase in output this year which will bring ear production up to 420,000

Motor Iberica waves the Spanish flag

FHE CONSOLIDATION of what remains of the national motor dustry in Spain into a truly competitive force is foreseen by Motor Iherica, tha Barcelona-based truck and tractor manufacturer. The passenger care and many have sending may have the contracts of the contr sased truck and tractor manu-lacturer. "The passenger car-ndustry in Spain may have missed its chance" but the riperations of Motor Iberica are till capeble of heing utilised is the nucleus for a major com-

in nercial vehicle industry. At present Motor Iberica is 16 per cent owned by the crowled Canadian company. Massey-Ferguson. As part of a programme of international reb renchment, Massey is apparently trying to disposa of its neestment (worth some \$50m) in Motor Iberica, and there is a strong possibility that the hareholding will eventually

German

Esso out

of red

Seat, the country's main car

manufacturer which is 35 per cent owned by the state holding company INI, is in the process of negotiating the transfer of a controlling shareholding to Flat which already holds 36 per cent of Seat. The rest of the csr industry is firmly in the grip of the multinationals.

In the commercial vehicle sector INI is considering the sale of its 67 per cent share holding in Enasa, the country's largest producer of medium and heavy duty trucks and buses. Third, It has had the technosomer that the past four years. Sales logy to carry out gradual imposed Pta 41hn in the year provements on its products, and ending last November, a 23 per claims to have developed cent advance on 1977, and gross technology independent of profits charged at Pta 1.25bn Massey-Ferguson.

Aside from Seat, which Pta 1.94bn oxpects losses of around last year. Pta 3hm for last year, Motor I Theriea is the only motor combeen achies its of cautious and approaches its

on capital, sive commercial policy. Second, it has concentrated on specific annual production capacity of ends of the market, such as 45,000 vans and trucks, 55,000 tractors, and 125,000 motors. In money terms it has tripled its soma 40 per cent.

Third, It has had the technology to carry out gradual im-

INI's 25 per cent stake in Mevosa, which produces light commercial vehicles and is already 43 per cent owned by Daimler-Benz, is also up for sale.

Aside from Seat, which produces light compared with Pta 1.11hn.

Despite the recession, the sent contribution to Motor Iberica seems to he through its foreign sales network, in exchange for Motor Iberica's cash-flow position has steadily improved, from nearly 600 dealers and service points throughout Spain. The Spanish company has a major present contribution to Motor Iberica's cash-flow position has steadily improved, from points throughout Spain. The Motor Therica'a success has heen achieved through a policy

pany which even approaches its of cautious expansion, halancing multinational competitors both internal with external sources in volume of output and return of finance, coupled to an aggres-

Spanish company has prudantly set about establishing its own foreign outlets, siting marketing subsidiaries in Europe as well

as Latin America. This will be crucial if Massey-Ferguson pulls out, since ex-ports account for ahout a sixth of Motor Iberica's sales.

Now that the plan for transferring Enasa Into multinational hands appears to have heen shelved, recent talks between INI and Motor Iberica are thought to have broached the possibility of consolidation Into one large commercial vehicle

Finmeccanica sales revenue up

BY PAUL BETTS IN ROME

FINMECCANICA THE mech-HAMBURG - Esso A.G., the anical and engineering subsidiary of the glant state holding West German unit of Exxon of company Istituto per la Ricostruzione Industriale (IRI), reported yesterday a 24.6 per cent increase in net sales revenue last year compared to 1977. Sales last year rose to L2.678bn (\$3.18bn) compared to 12,150bn the previous year with exports accounting for 42.6 per cent or 1.1,142bn of the total.

V en D to boost U.S. holding

By Charles Batchelor

HOLLAND'S largest retail chain, Vroom en Dreesmann, will take a substantially larger shareholding in the U.S. company Dillard Department Stores Inc. than was originally planned.

Ven D announced 12 months

ago that it would acquire 34 per cent of the Little Rock, Arkansas, company's capital in three equal annual instalments. However, V en D has recently acquired 500,000 shares from the Tandy family, the founders of Tandy Corporation, as well as the second tranche of 340,000 newly issued shares as agreed up the third tranche of shares next year it will hold 1.52m of the 2.95m shares in issue giving it a stake of 51 per cent.

Hagemeyer has profit setback

AMSTERDAM - Hagemeyer NV. the Dutch based international trading company, has indicated that its 1978 net profit will not be more than balf its 1977 earnings of FI 18.5m (\$9.2m).

The drop in earnings will have "some effect" on tha dividend payout for the year, the company said. In 1977, Hagemeyer paid FI 6 per share of F1 20 nominal.

Earnings in the 1978 fourth quarter wera "substantially lower" due to losses in the industrial sector in Belgium and the Netherlands.

Meanwhile the European Options Exchange will intro-duce new KLM Royal Dutch Airlines series from Fehruary 8. The series will be April, July and October with strike prices of FI 100. Agencies

Accountancy merger progress

BY MICHAEL LAFFERTY

TALKS among some of the largest accounting firms in and North America aimed at forming a major new international accounting group may well he complete by the end

This is the view of Mr. Lionel Kent, choirman of McLintock Main Lafrentz, one of the principal parties to the discussions. Mr. Kent spent the earlier part of this week holding talks in London with Thomson Mc-Lintock, the leading UK accounting firm which is one of the principal members of Me-

Lintock Main Lafrentz,
He is now in continental
Europe where he is meeting
senior parinors from Klynveld
Kraayanhof, the largest Dutch eccounting firm, and Deutsche

to find some way of bringing the two European firms within the McLintock Main Lafrentz organisation.

Other substantial European accounting firms may also he included in the latest talks, particularly since the Dutch and German accounting firms are strong believers in the idea of developing a major European accounting group to counter the iofluence of the U.S. dominated Big Eight firms. Among these are Fiduciare

de France, the largest French accounting firm. Fides of Switzerland is another firm which has been considered for luclusion. But it now seems

Treuhand, the second lergest that its ownership hy tha Swiss occounting firm in Germany. Credit Bank would have pre-The object of the discussions is sented independence problems sented independence problams for the North American firms, Mr. Kent says he is confident that the current talks will prove successful. At the very latest the matter should he con-

cluded by July. Asked whether the talks could lead to a merger in the U.S. betwacn Main Lafrentz and Hurdman and Cranstoun, the

U.S. firm which is currently linked to Klynvald Kraayenhof and Dautsche Treuhand, Mr. Kent admits this is a possibility. At stake could he the audit of Philips, the Dutch multinational which currently audited jointly hy Klynveld Kraayenhof and

Renter

By L Daniel in Tel Aviv ISRAEL Petrochemical Enterprises of Haifa said its gross profit rose to I£30.5m (\$1.7m) in the first half of 1978 from IE12.6m in the same period of 1977.

It thus exceeded the gross profit for the whole of 1977, which was I£26.8m. The company's report submitted to the Stock Exchange, does not shed light on results in the second half of the year, however, when heavy expenses were incurred in connection with the completion of the company's expanded polyethylene plant.

This has not yet heen put ioto operation as the plant has not received the larger unantities of ethylene schednled to arrive from the Haifa

Weeks defers U.S. flotation

MELBOURNE. - The Board of Weeks Petroleum bas. concloded the timing is not right for its proposed new issue and the listing of its shares in the U.S. and it has deferred the matter for later review.

As reported a year ago, the Bermnda - hased company planned to increase anthor-

\$7.5m and make a 12-for-one share consolidation helore publicly offering shares in the

Weeks, whose main asset is a royalty stake in the Bass Strait offshore oil/gas fields, also reported a higher 1978 after-tax profit of A\$4.39m against A\$3.1m.

Hong Kong to set SE merger deadline

HONG KONG—The Hong Kong Government will set a deadline for the voluntary merger of the colony's four stock exchanges after which it would introdoce legislation

it would introdoce legislation to force their amalgamation. Financial Secretary Mr. Philip Haddon-Cave is expected to set a deadline of January 1, 1980; for a voluntary merger of the Hong Kong, Far East, Kam Ngan and Kowloon stock exchanges during next week's legislative council session.

Talks on the amalgamation of the four exchanges bave been going on for some two years, but have come to a standstill in the past few months.

The Government has been pushing for the merger since early 1977, and Mr. Haddon-Cave has said it would consider legislation if there was no tangible evidence of progress on the matter.

But with the complete lack

of progress in recent months it has now decided to set a firm deadline after which it would force the merger.

The government has argued that a merger would benefit sharebolders and dealers as well as the regulatory authorities by bringing about a broader and less erratic market and eliminating differences in trading and listing practices on the four

Official inter-exchange trad-ing began in August, 1977, the working party set np by the exchanges made progress towards the goal.

In February last year the exchanges agreed to merge by 1980, with discussions centring on the smallest of the exchanges, the Kowloon and Kam Ngan markets, mov-ing on to the trading floors of the Far East and Hong Koog exchanges respectively. The principal stambling

block towards full unification, however, has been lack of a possible site for a single trad-ing floor, with neither the Far East or Hong Kong exchange's floors hig enough number of additional traders.

General Motors-Holden plans new Australian engine venture

BY JAMES FORTH IN SIDNEY

GENERAL MOTORS-HOLDEN plans an A\$210m (US\$239m) complex to produce fourcylinder engines as part of the
U.S. parent's global strategy to
produce a "world car." The
scheme envisages a plant with
scheme envisages a plant with
that studies had demonstrated
that studies had demonstrated that studies had demonstrated
that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that studies had demonstrated that stud capacity to turn ont 300,000 engines a year, but an annual production of 240,000 engines. About two-thirds of the ont-put would be armarked for export to affiliated General Motors plants overseas, mainly to Europe. The proposal is being studied by the Australian Government, but GMFI wants a decision by the end of the month. If approval has not heen obtained by then, the plant may be located elsewhere,

UK (Vauxhall) or continental Europe (Opel). First deficit

The proposal was announced the company's first deficit in its 30 years of operations in Australia. The result in both years was a loss of A\$8.4m after allowing for extraordinary items; a tax benefit of A\$3.7m in 1977 from stock valuation massive new investment re-

that an engine plant of the size

envisaged would be inter-nationally cost competitive, except for the burden of freight costs. The company believed the proposal represented a positive and constructive approach to the need to restructure the Australian motor industry in line with the economic realities of the domestic and global markets.

Mr. Chapman said that this restructuring would bave to take place gradually and proprohably at a GM plant in the gressively to permit the industry as a whole to make the necessary adjustments.

The proposal, however, is likely to draw some criticism along with the news that the from other manufacturers, because it involves changes to the company had incurred a trading loss of A\$1.2m (US\$1.4m).

This was a substantial improvement on the A\$11.7m trading loss incurred in 1977, ment would have to allow a content substantial scheme to work, the government of the content substantial scheme to work, the government would have to allow a content substantial s scheme to work, the govern-ment would have to allow a credit for the value of GMH exports towards the company's local content commitments. "In the absence of such approval, there would be no

adjustment and A\$7.2m pro- quired to establish the engine vision in the latest year for a module—mainly because of the donbtful export account relat- freight penalties." Mr. Chapman

petitive in terms of both vehicle design and price. Engines produced in the proposed plan would modern, fuel efficient, compact cars throughout the eighties; "
"We estimate that it would add about A\$1,000 to the retail price of such cars if we were

to attempt to produce them from facilities geared solely to Australian domestic volumes. He said GMH had consistently stressed the need for Australian vehicle makers to develop signi. ficant export markets

Sales at peak

The 1978 loss was incurred despite a rise in group sale from A\$726m tu a peak of A\$895m. Sales of units, including exports, rose by 12.1 pecent to 157,333, reflecting in creased penetration of a large total Australian vehicle market GMH achieved 26 per cent of total vehicle registrations in 1978, the highest full year mar. ket share for five years and the 26th consecutive year of market leadership.

S. AFRICAN METAL RE-TREATMENT

Ergo in the firing line

ecoconic justification for the

BY JIM JONES IN JOHANNESBURG

Jobannesburg over some of the given in Ergo's 1977 prospectus more ambitious gold/uranium were conservative, but so re-treatment projects started in general as to be little use to the past few years. It is a con-troversy made all the more intense by the apparent reluc-tance of the company involved, Anglo American Corporation, to give more than minimal details of its operations.

In the Orange Free State. Anglo's six gold mines are all participants in the Joint Metal-lurgical Scheme (JMS) which is re-treating slimes accumulated after earlier gold recovery to win residual amounts of gold, uranium and pyrite.

At the time of its inauguration, the scheme was bailed as one of the industry's greatest breakthroughs. Now, on the available evidence of the quarterly reports, it is in trouble. Uranium recoveries are apparently well below initial expectations, although Angle decies rumours that production is so far behind plan that sales contracts are baving

Meanwhile, flotation problems in the critical gold/pyrite circuits have resulted in such low gold recoveries that it is debatable whether the particlpating mines will earn enough to repay the important coo-sumer loans used to finance the operation. Of course they can

repay the loans, but perhaps not entirely from JMS profits. In the firing line now is the publicly quoted East Rand Gold and Uranium (Ergo) project which started re-treating some 380m tonnes of accumulated

CONTROVERSY is growing in East Rand. Initial estimates first 20 years of operations, Johannesburg over some of the given in Ergo's 1977 prospectus. Treating higher grade during more ambitious gold/uranium were conservative, but so first meant that, in the initial analysts trying to evaluate the

Ergo has been a stock market favourite since it was first quoted in 1977. This was based on the not unreasonable assumption that it dld not suffer from the risks attaching to normal gold mining operations—so much so that one U.S. broker suggested that the operation be rated by investors as a chemical

company.
As a result of unconfirmed information recently published, per cent of the target. in the South African Financial Mail, it is now being argued that

years, gold production would reach 7,000 kilograms an uranium 200 tonnes

Higher-grade slimes dams are being treated, but with recoveries thus far much lower than expected, Ergo's target of reaching full scheduled rereaching full scheduled re-covery by July 1978 is far from heing reached. In the nine months to end December uranium recovery rates averaged only 72 per cent of the recovery has yet to reach 500 "

Improvement on this performance is likely to be a drawn

recoveries of gold, uranium and pyrite are far below Anglo American's expectations and that there is no early solution to the problems in sight. Compared with public an-

nouncements that the project would treat slimes at an average annual rate of 18m tonnes, the table indicates that this is well helow initially expected levels. Anglo claimed that annual production would average 5,400 kilograms of gold, 150 tonnes

out affair, by which time the henefits of treating highergrade slime dams first will have disappeared.

Against this there is the argument that technical improvements will boost urantum recoveries beyond initially planned levels. But by turning down a 1977 proposal to increase annual uranium output to 300 tonnes at a cost of Rou-(\$9.2m), Anglo has indicated its wariness of additional expenditure for what could be of uranium and 530,000 tonnes

JRRENCIES, MONEY and GOLD

The dollar fluctuated nervously competitive with the rest of the n the foreign exchange market vesterday, but trading was narkot volume was less beavy han on Monday. One or two central banks may bave ntervened to support the dollar.

Out this was not noticeable in
the relatively quiet trading.
There were no few factors
influencing the market, but
tervousness about the situation n Iran continued to depress the J.S. currency.

The dollar eased to DM 1.8600 gainst the D-mark, from DM 1.8650 on Monday, and to wFr 1.6840 from SwFf 1.6900 in erms of the Swiss franc. The lighest level touched against the apanese yen was Y189.90, before the dollar eleged or Y199.90. the dollar closed et Y199.00, before the dollar closed et Y199.00, ompared with Y199.80. The collar's trade-weighted depreciation, as calculated by Morgan to 8.4 per cent from 8.1 per cent.

Sterling epened of \$1.9900, and oon fell to a low point of 1.9890, but then rose to \$1.9955 o the morning. After easing ack to \$1.9925 soon after lid-day, the pound rose to a text level of \$1.9970 in the fternoon, and closed at \$1.9945. .9955, a rise of 55 points on the

pound's trade-weighted on Bank of England rose to 63.4 from 63.3, gures, rose to 63.4 from 63.3, fter standing at 63.4 at noon, od 63.3 in early trading.

NEW YORK-The dollar was lightly firmer than in early uropean tradiog, after the ebarp all on Monday. The currency as beloed by the reletive calm a Iran and by profit taking, though there may have been ome support for the dollar by arious central banks, including be Federal Reserve.

TORONTO — The Canedian collar rose to 83.71 U.S. cents rom 83.60 cents in moderate rading. There seemed to be ittle reaction to the comments of the governor of the Bank of anada, when he said that the echnical position of the dollar as now very stroog, and that the anadian economy is now very

FRANKFURT—The Bundes bank did net intervene as the dollar fell to DM 1.8600 against the D-wark, from DM 1.8847 at the fixing. After falling to a low point of DM 1.8565 the dellar recovered slowly in very quiet and thin trading. Although there was no sign of support for the dollar by the German entherities yesterday morning, it

was suggested that the Swiss National Bank may have National Bank may nave intervened.

PARIS — The dollar improved in late trading, but tended to ease towards the close, after rising in the early afternoon on buying in New York. The U.S. currency finished at FFr 4.2770. Bank may have courrency finished at FFr 4.2770, compared with FFr 4.4825 at moon, and FFr 4.2700 in the morning. The late Monday rate was FFr 4.2800. The French franc was little changed against the D-mark and Swiss franc, but sterling was very firm. The pound was a FFr 4.2720 from

pound rose to FFr 8.5330 from FFr 8.5100. AMSTERDAM — The dollar rose to FI 2.0100 in late trading, from Fl 20080 at the fixing, and compared with Fl 20210 at Monday's fixing.

MILAN — The lira lost ground

against the yen and most Euro-pean currencies, but improved sgainst e generally weaker U.S. dellar. The D-mark rose to L450.91 from L450.11 at the fixing, and the Swiss franc was also firmer. The U.S. currency was fixed of L839.20, compared with L843.45 on Menday, with the Bank of Italy buying dollars at the fixing where the number of dellars traded totalied \$17.4bn. TOKYO — The dollar fell sharply, to close of Y198.95 against the yen, compared with Y201.777 on Monday. The decline reflected the dellar's earlier weakness in Europe and the U.S., while news that the Bank of while news that the Bank Japan is to completely lift restrictions on the reserve requirements

free yen deposits.
The U.S. currency opened et Y199.50, and drifted lower, until the Bank of Japan announcement

THE PROPERTY OF THE PROPERTY O Northern Ireland? Republic of Ireland Netherlands West

"My detailed case study of the 9 EEC countries puts Northern Ireland top for incentives for Industry."

Dr. M. J. de Meirleir, President of Plant Location International and Professor of Industrial Location and Development at the Flemish Brussels University (VUB), has advised on the location of over 550 industrial projects with an investment potential of more than £4,000.000.000.

The types of project in Dr. de Meirleir's study ranged from labour intensive to capital

The study isolated and compared the effect of every financial incentive made available by the nine countries in the EEC, and included Northern Ireland. The main report ran to 133 pages and the summary to 32 pages.

The conclusion was that 'overall Northern Ireland offers the best package of incentives, this without taking into account either the ready availability of venture capital on a

buy-back basis or the finance and support provided for joint business ventures.

We will gladly send you a copy of the summary and advise you how the incentives in Northern Ireland could relate to your own plans for relocation.

Phone Louis Ritchie at the Ulster Office, 01-493 0601. Or write to him at the Industrial Development Organisation for Northern Ireland, Ulster Office, 11 Berkeley Street, London W1X 6BU. Telex 21839.

NORTHERN IRELAND right for your company

Moscow Narodny's Far East

BY JAMES BARTHOLOMEW

vities in the Far East during dealing .A large proportion of Ferguson, said the estimate was the Seventies are emerging as one of the most bizarre financial/political adventures of the

The tale involving the bank, Russian-owned but hased in London, has received very little coverage io the British Press. No single dramatic event has canght the headlines and there has been a shortage of substantiated information. Nevarthe-less, it has gradually emerged, in dribs and drabs, and further disclosures are not far away.

The Russian-owned bank
made vast loans in the Far East in the early 1970s, many of which have now gone very sour indeed. Variously the courts of Singapore, Hong Koog, Loodon and California are, or are about to he, awash with suits brought by or against Moscow Narodny. The losses incurred by the bank run into huodreds of millions of dollars. It is like the secondary hanking crisis in the UK only with added international political signifi-

Trojan horse

Gradually more and more of the hare facts are becoming known through the multitudinous writs being issued throughout the world. But the interpretation of these facts remains difficult. Was Moscow Narodny a communist hank which became over-excited when lei loose in the canitalist word? Or was it comething more sinister, possibly a political device designed to enter the Far East in an apparently innocent way but with the hidden intention of increasing Russian infinence in the area—a latter day Trojan horse?

The Moscow Narodny Bank was registered in London in 1919, soon after the Russian Revolution: Its purpose was to finance trade with the USSR and provide a point of financial contact. In the 1860's it inited in the development of the Eurodollar market, a branch was opened in Beirut and. in 1971, another was opened Singapore.

The man put in to manage the Singspore branch was Teo Poh Kong, a Singaporean of Chinese origin who made his name with a local bank, the United Over-He started building up

property development companies. MNB soon became one date," he said.

of the higgest lending hanks in For political and fioancial its lending was to property and

finance, insurance, commodity trading transportation, ship-ping logging and plantations. It included more than 25 group companies with activities in Hong Kong, Singapore, Malaysia. Brunei, the U.S., Australia and Cheung, elsewhere. Some of these were quoted in Hong Kong and Singapore and together were capitalised at US\$100m at one It horrowed around US\$70m from MNB.
The bank withdrew its sup-

port for Mosbert after the Monetary Authority of Singapore, a Government agency, expressed conceru over MNB's lending to Mosbert and others. The alling group was put into the hands of the receiver.

Over the next two years, many other foreclosures followed. Aod hehind them came a mass of writs and counter-claims in London and the Far East. As the full extent of the branch's losses emerged, the bank introduced stricter controls from the head office io London, Lending from the branch was curtailed and Teo Pob Kong, the manager, Moscow Narodny has never

given any Indication of the total losses suffered by its Singapore branch. The figure is hidden British report and In the accounts of the company through the device of bank guarantees. One or more of MNR's shareholding banks has guaranteed the bad and doubtful debts of the Singapore branch. So the losses are effectively passed up to the Soviet state banks, out of the This has left the field open

for speculation-of which there has been a great deal. The highest estimate so far seems to be that of a British newspaper which reckooed the losses to be "about £400m." This would appear much too high, bearing in mind that the figure is almost the Moscow Narodny branch equal to the branch's hiebest disposing of it as fast as is of the Russian state extremely fast both in terms of ever leading figure. MNB's practicable is supported by the been put behind it.

"wildly exaggerated." "Some

Singapore, its loans and advan-reasons, some people have been ces at their beight exceeding trying to influence how this chain of events is interpreted. But in 1975, as the full impact Most consplcuously. certain of the world recession was belog customers on whom MNB forefelt, the first of MNB's major closed want to suggest that MNB customers found itself in difficulties. The Mosbert group was involved in property dealing, establish this then they hope they can successfully sue MNB

Undue haste

Mr. Edward Wong Wing usually known as Wong, is one such cus-MNB lent him U.S.\$44.5m, most of it in connection with the development of a luxury resort and recreational centre in Lantau Island, Hong Kong. Now that MNB has fore-closed on him, Wong is suing the bank for U.S.\$100m, claiming anticinated profits as well as the difference between what MNB sold the assets for and their "true" value.

Wong maintains that In his case MNB showed undue baste in foreclosing because it was embarrassed by publicity about the loans for the Hong Kong project. He alieges that Russia did not want to be seen to be trespassing on China's door-

otep. In China Itself, the Press has declared that MNB was being used to increase the political clout of Russia in South East Asia. They have even gone so far as to suggest that MNB lent to enterprises with a prior intention of foreclosing on them to ohtain their assels. The Far Eastern Press has willingly contemplated this idea and pointed to the land which is currently owned by MNB as a result of foreclosures. The Far Eastern Economic Review last July said that Moscow Narodny controlled more than 1m square feet of land in Singapore alone.

The trouble with this theory is that the foreclosures have brought a great deal of adverse publicity on MNB. The status of its Russlan owners has been damaged rather than augmented. The ownership of land has brought MNB no influence and the bank's claim that it is

MOSCOW Narodny Bank's acti- lending and foreign exchange company secretary, Mr. Nicholas fact that several sales have

The true explanation may simply be that Teo Poh Kong, the manager of the branch, overstepped the mark in the confident atmosphere of the early 1970s, as many other

bankers did all over the world: Further elucidation may come from the court cases which are in the pipeline. For several years after the collapse of Mosbert, its bead, Mr. Ames Dawe, hid out to the Far East. He claims he was attacked by KGB agents and on arrival in San Francisco last September asked for police protection and offered to tell all he knew about MNB, end both Moscow's and

Singapore's attitude to it. Meanwhile, Mr. Dawe is embarking on a legal war with MNB. His San Francisco lawyers are orchestrating a worldwide series of writs against the Russian bank. Two he followed by more in Andrew already issued in London are California, London and Australia. Dawe's main complaint is against MNB's treatment of him in regard to the Mosbert Group. He bas made a general claim for assets which, be says belonged to him personally and which were put into the Mosbert Group. Their value is said, by Breen and Parks Law Corporation, his lawyers, to be up to

\$100m. The same lawyers have also complained that MNB has "abnormal" control over the official receiver of the Mosbert Group. The Official Receiver should represent all the creditors and shareholders without nreference, the lawyers say. The Official Receiver is in fact someone who has acted as MNB's legal adviser. He is Mr. Dennis Lee, brother of Mr. Lee Kuan Yew, Singapore's Prime Minister.

Perhaps we will never know the real motivation behind MNB's adventure in the car East, But whether MNB was primarily moved by political. commercial considerations, of one thing we can be sure.
The enterprise was a disaster. In commercial terms it was a pathetic failure and in pobtical terms a source of acute embar-rassment to the Russian state:

Most banks would be bankrupt after suffering the sort of losses experienced by MNB. It only survives because the strength of the Russian state banks has

Burroughs wins a big TSB award

CONTINUING its successful Other display units will be progress through the Trustee used throughout the day to Savings Bank area, Burroughs send important information has won the award from TSB immediately to the main South East.

Equipment ordered includes two large central computers plns over 800 visual display keyboard units and represents a very considerable extension of the bank's customer and management data information network in London, south eastern counties and the Channel Islands. The main computing centre is at Crawley, Sussex and implementation of the extension programme will continue throughout the current year and

installed or ordered by the Savings Banks during the past 12 months. Largest of these is the £10m order from TSB Computer Services for terminals. Three other medium to large scale computers are in the list. into 1980. Displays will be placed on branch counters and allow cashiers to obtain immediate inscale computers are in the list. Burrougha is at Heathrow House, Bath Road, Cranford; formation on the balances of over 3m accounts held by Hounslow, Middlesex TW5 9QL. Telephone 01-759 6522.

• INSTRUMENTS Measuring made simple

YET ANOTHER instrument User actions consist of no design has taken advantage of more than connecting the comprocessor, this time a new election a cable connected quicktronic component measuring bridge from Wayne Kerr. Durban Road, Bognor Regis, West Sussex PO22 9RL (02433 ~ 25811).

The front panel of the instrument presents no more than a five-digit liquid crystal display (with measured units identified) and 11 push-buttons. Nevertheless, the bridge, designated B605, can measure inductance, capacitance, resistance, Q-factor and its reciprocal, and covers all values likely to be encountered in electronic and electrical engineering; the capacitance range for example, extends to 160 millifarads.

All measurements are referred to a single quality standard the desires of the user, not with resistor, resulting in a basic making adjustments that allow accuracy of 0.1 per cent; read-the instrument to do its jobings appear within 300 milli-these have all been taken over

aluminium - based recording PLASTICS paper which has extremely high Alternative contrast and increased sensi-

tivity.
Used with the company's ZSG3 unit, the paper takes traces from signals picked up within a selected frequency band by a receiving system at speeds up to a maximum of 20 cm per second.

Traces are in the form of closely spaced borizontal lines, producing a continuous record in the direction of the time axis for the duration of the transmission.

Operation of the unit is easy through its simple controls and the paper can be inserted and removed without difficulty.

pressed by a heavy crop last board said. season and hesitancy among Last sea marmers who are fearful of with seed European Community pressures hectare. on the British market.

Marketing Board estimates of teed price this year. But there planting intentions, expects out- are other factors at work. put of maincrop potatoes to The Ministry is not expected match demand this year, to announce the guaranteed growers have been slow to buy price until March or April. By

almost 30 per cent lower than at the same time in the previous year. Hard weather and the hautiers' strike had also Last year's seed potato crop was 19 per cent higher than in

The Potato Marketing Board said the lower prices had held down estimated production costs for the new season. This year total costs for potato production, including cultivation, fertiliser, sprays, storage and ing Dutch and F. grading, are expected to be incomes directly.

THE PRICE of seed potatoes £1,491 a hectare. Of this total has fallen sharply this year, ds- seed will account for £141, the Last season costs were £1,406,

The modest rise in costs 'Although the Ministry of suggests there will be only a Agriculture, relying on Potato small increase in the guaran-

Merchants said yesterday that at the end of December ship ments of seed from the main growing areas in the main growing areas in the main mational han on important the main growing areas in the main mational han on important the main mational mation in the main mation and mation in the main mation in the mat It is even possible that tha

first stages of a Common Market regulation on potato trade may be in operation.

The court ruling and the regulation hold the key to the future of the market here, and the Ministry is unhappy about setting a guaranteed price for 12 months if within that period the ban on imports may have

to be lifted.

If that happened the UK taxpayer could end up subsidis-ing Dutch and French growers

UK sugar growers face £2m loss

BY A CORRESPONDENT

MIDLANDS growers are facing a loss of both factories." almost £2m because of frost Mr. Bob Wright, the National damage to their crops.

The British Sugar Corporation has rovealed that an estimated 97,000 tonnes of beet has been lost in the counties of Worcestershire, Herefordshire,
Shropshire and Staffordshire.

When the Corporation closed its Allscott plant at Telford ahead of schedule last week, 55,000 tonnes was still unpro-cessed. The Kidderminster factory came to a premature standstill yesterday with 42,000 tonnes in the ground or rotting

A Corporation spokesman at In a summary of its sugar and Peterborough said: "We have sweetener report, scheduled for processed about 590,000 tonnes release on February 13, the Deat the two factories since the campaign started. But we have heen limping along recently tion at about 90m tonnes com-

SUGAR heet alternative but to closs down

Farmers' Union's Midland Information Officer has described the losses as a disaster for growers. He said: "This is a crisis. Tho farming industry just cannot stand losses of this magnitude, They are bound to have an immediate and long-term impact on cash flows,"

In Washington, meanwhile, the U.S. Agriculture Department said world sugar stocks at the end of the 1978-79 season are forecast at about 30m tonnes, or about one-third of annual world consumption, re-

ports Reuter. In a summary of its sugar and partment repeated its earlier estimate of world sugar producbecause of a shortage of beet pared, to the previous years that for processing. We had no record 92m tonne total.

Farm land up £1,000 a hectare

THE PRICE of farmland with vacant possession in England rose £1,000 a bectare last year. In the last three months of 1978 values jumped £200, according to figures released by the with seed accounting for £161 a

Ministry of Agriculture.
The sale of 8,300 hectares monitored by the Ministry advisory service (ADAS) and the Agricultural Mortgage Corporation during October, Novomber and December yielded an average of £3,648 a hectare com-parad with the £3,448 average on 13,900 hectares sold in the

revious three months. The further increase came as commentators on the land market forecast an end to the steady rise which has more than rise which has more than doubled the average price in England in the past two years. In January, 1977, the average price recorded by the Ministry was £1,812 a bectare.

The Washington, a Bill has been introduced in the U.S. Senata which would prohibit foreign investors and most large, non-agricultural corporations. tions from huying U.S. farm-land. Called the Family Farm Antitrust Act, it would prohibit acquisition or control of agricultural land by corporation or individuals with more than \$15m in non-farm husiness assets, and by foreign corpora-tions, governments and non-resident aliens.

Farm council approves

drainage plan

By Margaret Van Hattem in EEC AGRICULTURE Ministeres

yesterday passed 8 minor change to a scheme to buy np surplus fruit for processing, and con-firmed their approval of a £5.4m drainage project on the Ulster-ireland border, The schome was approved in principle last year.

Apart from this, their two
days of discussion produced no results and appeared unlikely to do so. Most of the talk centred on the difficulties of phasing out monetary compensatory

However, it appears France is still determined to force through some commitment to getting rid of MCAs and Germany is equally determined to resist this.

Ministers returned late in tha evening to the Commission's proposals for immediate 5 per cen "green" devaluation for the UK. France and Italy.

during the day... Traders said the reaction was long overdne, and were only surprised that it had not heppened earlier. However it was noted that the gap between the cash and three months prica remains narrow and new huying interest was ettracted at the lower level, although price movements were extremely

steady tone of the New York markat, following the news that two U.S. producers—Copper

COPPER PRICES fell aharply Range and Duval-had raised on the London Metal Exchange their domestic prices by 5 yesterday in the first major cents to a new high of 87 cents

The fall in copper hit other Values plunged in early deal- metal markets, notably lead ings, continuing the downward where the cash price dropped trend started on Monday night by £22 to £529 a tonne after in New York. But the market falling even lower in early later rallied as new buying in- dealings. Aluminium prices terest came in encouraged by were down too, but zinc held

night £33.5 lower at £959.5 a then climbed strongly to close tonne. The three-months quotation was £31.75 down at £969.75. standard grade three-months after falling to £945 at one stage quotation declined to £7,030 in pre-market trading, hat finally closed £52.5 up on the day at £7,225 a tonne.

The sharp recovery was attributed to sustained trade buying interest that came in at the lower price levels. At the same time another squeeze on nierest was ettracted at the nearby supplies, especially of ower level; although price high-grade tin, appears to be novements were extremely developing. The high-grada cash price jumped by £135 to £7,405 a tonne, and standard grade was up by £85 at £7,320 widening the premium over the

Alcan raises world aluminium price

BY OUR COMMODITIES EDITOR

A RISE in its world export price is reported to be putting pres for primary aluminium ingots, from 56 to 59 cents a lb, has been announced in Montreal by Alcan Aluminium.

The increase raises prices, outside North America, to \$1,300 a tonne, cif major world ports, except for Latin America and West Africa where the price goes up to \$1,335 The company said the new export price does not apply in the Canadian or U.S. markets, nor where prices are well established by domestic conditions, such 2s Japan.

A spokesman in London said the rise would not have an immediate effect on the UK listed price of £710 a tonne. British needs for aluminium ingots are now largely met by domestic production, he added. Increased demand for alu-

sure on supplies and prices. Values on the London Metal Exchange, for example, have risen strongly recently in the wake of copper. In New York, Alcoa reported

that its first quarter shipments will depend more on how much it can produce than on demand. This week a report by Chase Econometric Associates, a sub-sidiary of Chase Manhattan Bank, forecast 2 shortage of

aluminium by 1982,
Entitled "The Developing
Supply Crisis," the report said
that aluminium production
capacity was locked in for the next four years and will be outgrown by increased demand.

As a result prices and profita-hility in the aluminium market will soar, the report predicts, but will head hack towards overminium, like other base metals, supply in 1985...

TIMBER TRADE

The battle against oak wilt disease

the fungus which causes oak those in the U.S. in 1942 had little idea that he was starting a is that many European oaks on chain of evenis that would later passing maturity shed their involve the EEC, the Scotch leaves naturally from the ends whisky distillers, French cognac distillers, Spanish sberry headed in the terminology of and the timber of most European hlenders importers

countries.

What is more the call last week by the Timber Growers Organisation for imports of U.S. oak to be hanned hecause of the threat from the disease seems to have brought about an unlikely alliance hotween tho English landed gentry and

French Government officials.
Oak wilt disease is at present central and eastern hand in the The symptoms are very liks Dutch etm disease; tho foliage wilts and turns brown and may then be shed from the ends of the hranches in the upper crown of the tree.

But there is an important prevalent after a dry season difference. Dutch elm diseaso and can be mistakon for the is spread by a single species of symptoms of the disease. beetle, which is a vory efficient voctor, and it therefore travols fast. With oak wilt disease it has been ostablished in the U.S. that the fungus can he spread by several species of beatle as well as by squirrels and birds. None of these vectors are very efficient: the number of affected trees is small and the spread of the disease is slow.

Scientists in Europe, how- in the country of origin, that ever, are fully aware that if the moisture content must be tha disease should ever cross below 20 per cent or the wood unilateral action

Another complicating factor timber foresters.

> THE GOVERNMENT should act to ban the import of pos-sibly infected oak wood from disease risk to Britain'a oaks, an MP said yesterday.

> vetive member for St Maryle-bone, said there was a very real danger thet Britain's oaks could be ravaged out of exis-tence. He is to demand action in Parliament this week in a series of Commons questions to Mr. Peter Shore, Environmont Secretary.

barriers against oak wilt. Tho Importation of Wood and Bark (Prohibition) Order 1977 lays down regulations for the import or all of its hark or any part of the rounded surface of the tissuos immediately below the

""New time" dualings may take
place from 0.30 am two business days

Increased inflationary and interest rate pressures in stock markets which are gloomily reflecting several other adverse Monday's reactionary tendency. Cilt-edged securities were additionally affected by the rise in the eligible diabilities of the banking sector in January.
Only Olls and South African

Golds resisted the trend, the former responding to suggestions of increased revenue in the light of their competitiveness in a world of shrinking oil supplies and the latter extending their hugancy on gold price hopes; the butlion price yesterday tended to consolidate its recent

Reports of the Government's confidence in reaching agree-ment with union leaders on an economic and industrial package nullified in opening sentiment hy the water workers' rejection of a 16 per cent pay offer and the bleak prospect at BL Cars. Sellers were soon operating in all sectors of equities and by 11 am the FT Industrial Ordinary share index was down 5.4. Shortly afterwards, a rally

developed and appeared to he holding but the announcement of the la(est banking statistics brought fresh uncertainty and the index closed at the day's lowest with a loss of 5.9 for a three-day fall 13.7 to 4548. In contrast, the oil majors and concerns with North Sea interests settled with gains extending to 14p, British Petrolenm rising that much to 950p. Falls in other index constituents gonerally ranged to 6p.
Illustrating the more wide-

spread malaise, especially in secondary equities, falls commanded an increased majority of 13-to-two over rises in all F.T. quoted industrials, while the number of hargains marked rose to 5.568, the highest since September 15 last.

For British Funds, however, there was no relief. A steadier tendency prevailed for much of the session but this gave way following receipt of the January hanking figures. Marginal falls at the longer end were then extended to 1 and the shorts rescinded small gains to close a

shade easier on halance. After openiog easier at 93 per cent on a combination of Wall

Street and sterling influences,

the investment currency Stores with Gussies A closing 4 premium proceeded to edge off at 292p. Duil spots in secon-upwards in fairly subdued dary issues included Status trading and closed st 941 per trading and closed st 94g per cent for a loss of 1 on the day. Yesterday's S.E. conversion factor remained at 0.6704. The volume of husines in

Tradod Traded Options yesterday Improved considerably with 935 contracts completed compared with the previous day's 706 and last week's daily average of 688. Most of the interest centred factors (including the threat of around four stocks with BP the an all-out strike at BL Cars) most active with 194 deals done ensured a continuation yesterday followed by Cons Goldfields. 129. most active with 194 deals done followed by Cons Goldfields, 129, Shell. 120 and RTZ, 105.

In recent issues. Caledonian Holdings, in receipt of at least two bids for all or part of the company, moved up 3 to 2 peak of 93p pending developments.

Banks down again

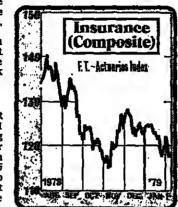

Continuing suggestions that the major clearing banks will soon raise their base lending rates undermined the big four which drifted lower in thin trading Barclays relinquished 5 more to 370p as did Midland, to 350p, while Lloyds and NatWest ended a like amount down at the common level of 280p. Elsewhere. Cuinness Peat gave up 5 more to 105p, still in reaction to the disappointing interim statement. Hire Purchases remained friendless on dearer monsy

In dull Insurances, Christopher Moran fell 3 making a three day relapse of 15 to 36p following a report that the company is being investigated over alleged currency arregularities. Sun Alliance fell 8 more to 488p and Sedgwick Forbes gave up 7 to 398p, while Hambro Life, 397p, and Pearl, 230p, lost 6 apiece. Buildings reflected the generally dull trend with Bine Circle, 256p, Tunnel B, 288p, and Tarmac, 162p all around 5 lower. Costain issues weakened further, the ordinary and deferred by 4 to 156p and 116p respectively. Despite the higher interim profits, Crouch Group softened a penny to 66p, and Vibroplant, on second thoughts about the mid-term results, relinquished 5 to 212p after early progress to 220p. Following the 68p per share agreed cash hid from Central Manufacturing, a penny off at 574p, dealings were resumed in G. R. Francis at 66p before a close of 67p which compares with the suspension price of 64p.

With stock on offer in increasing amounts, ICI and Fisons cheapened 3 apiece to 350p and 300p respectively. Among other Chemicals, Leigh Interests dropped 7 to 108p on persistent small offerings.

Stores dull

Discount which declined 7 to 230p and J. Hepworth 6 lower at 69p. Morris and Blakey Wallpapers A, firm of late on hld hopes, declined 6 to 108p, while falls of 5 were seen in Currys, 157p, and William Mowat, 65p. Further consideration of the disappointing interim performance prompted 2 fall of 2 to 16 p in

Excalibur Jewellery. Against the trend, Customagle hardened 2 tn

Electricals sustained another fairly widespread setback, but losses in most cases were fairly modest compared with the previous day. Disappointment with the interim statement, however, prompted marked duliness in Unitech which fell away to close cheaper at 170p. Muirhead reacted 6 to 223p and losses of 5 were recorded in Chloride, 90p, H. Wigfall, 250p, and Ferranti, 358p. Among the leaders, GEC remained on offer and eased afresh to 315p before closing 5 off on halance at 317p. There gave up 6 further to 338p, while the acquisition of United Artists of America failed to

henefit EMI, 4 cheaper at 129p.

Light offerings and lack of support made for renewed dullness in the Engineering leaders. Still reflecting a reported broker's circular, Hawker closed 6 cheaper at 198p for a two-day loss of 16. GKN, 234p, and Tubes, 350p, eased 4 apiece. Scattered seiling became evident in secondary issues. Recent high flier Williams and James gave np 7 to 140p and Mining Supplies eased 5 more to 128p awaiting today's interim figures. Fading hid hopes prompted seiling of Averys which lost 6 to 211p. British Aluminium reacted 12 to 870p, while falls of 5 were marked against Edbro, 169p, and

Dull from the outset Foods attempted to rally but usually closed at the day's lowest. In the leaders, J. Sainsbury eased 5 to 233p. Elsewhere, recently firm Morgan Edwards shed 4 to 86p. ahead of today's interim results, Hillards gave up a like amount to 228p. In a limited market, Sidney C. Banks relinthe previous day's rise of 5 at 92p.

Stormgard wanted

Economic and political worries Oils feature continued to weigh heavily on the miscellaneous Industrial leaders which drifted down in thin trading. Beecham lost 9 to 603p and Glaxe relinquished 5 to a 1978-79 low of 470p. Bowater also ended 5 off, at 179p, and Rock Organisation absenced 4 Rank Organisation cheapened 4 to 238p. Elsewhere, Stormgard to 238p. Elsewhere, Stormgard stood out with a gain of 6, making a two-day jump of 11 to 18p on speculative huying in a thin market. Reflecting their North Sea oll interests, huyers came for Cawoods, 154p, and LC. Gas, 386p, hringing improvements of 4 and 11 respectively. came for Cawoods, 154p, and LC. Gas, 385p, hringing improvements of 4 and 11 respectively.

Ranimex added 13 to 100p and J. Crean 0 to 221p, while M.Y. Sop despite reporting doubled profits and dividend at the speculative favourite Aeronautical and General Instructural and General Instructural and General Instructural and General Instructural Save np 3 to 125p on profit-taking, while De La Roe fell 11 to 342p and Portals shares with the market. Small cheapened 7 to 225p. Alpioce Holdings tonched 88p on profit-taking before rallying late to taking before rallying late to subsided in Robert H. Lowe, 7 close only a penny easier on the day at 94p and Hallam Sleigh and Cheston softened a penny to 38p following the mid-term South African Golds continued for the subsided in Robert H. Lowe, 7 close only a penny to 38p following the mid-term South African Golds continued to the subsided in Robert H. Lowe, 7 close t

36p following the mid-term figures.

Motor sectors generally closed easier following a scrappy two-way husiness. In Distributors, losses of around 4 were seen in Heron, 108p, Harold Perry, 114p, Henlys, 121pp, and Tate of Leeds, 69. In contrast, renewed speculative interest left Clanfield Lawrence a penny harder at 56p, ERF 1000, and Fedens, 43p.

South African Golds continued to make good progress despite a narrowily fluctuating performance by the bullion price, which was finally 50 cents off at \$244.125 per ounce.

ACTIVE

No.

Denomina-ERF, 100p, and Fedens, 43p, hoth slipped 3. Ahead of today's half-time results, Dowty eased a

penny to 262p.
International Thomson provided an isolated firm spot among dull Newspaper issues, rising 24 to a peak of 314p, on hopes that the company with its sizeable North Sea oil interests will benefit from the mooted rise in oil prices. Following the late announcement that Rood Intl. £1
Rossminster Holdings is offering Coos. Gold Fields 25p Rossminster Holdings is offering 100p per share for the outstanding equity, Jacksons Bourne End ICI rose 24 to equal the offer price. Turn Stores dull

marked against Edbro, 169p, and Matthew Hall, 214p. Further Dull conditions prevailed in Profit taking left Whessoe 3 announcement that Olympia and reproduced today in Stock Erchange dealings.

came under modest pressur

South African Financials all lost ground with the notable exceptions of UC Investments and Union Corporation. Considera-tion of the sharply increased dividend and profits lifted the former 11 to 276p after a 1978-79 high of 280p, while Union Corporation put on 4 to 354p, after a high of 355p.

A reaction in base-metal prices

In the London Financials, Rio Tinto-Zinc relinquished 6 to 278p.

Charter 3 to 149p.
Overseas hase-metal miners showed Roan Consolidated 10 off at 100p. Australians generally lost ground hut Bougainville hardened a penny to 161p, after 2 high of 163p following the sharply increased dividend and higher profits.

However, renewed American bnying in the afternoon saw prices advance airesh to close at, or around, the day's best

sellers and, in a thin market, shed 3 to 17p.

Oils feature

The mooted increase in oil prices following reports of an impending cut back in Saudi Arabian crude supplies encouraged a steady demand for oil ahares which found stock in short supply. British Petroleum moved up 14 more to 950p and Shell advanced 12 to 602p.

Assisted by favourable Press index put on 1.6 to 123.2.

Verdict poses problem for Pakistan leader

Bhutto death sentence confirmed

BY CHRIS SHERWELL IN ISLAMABAD

PAKISTAN'S Sopreme Court yesterday presented General Zla-Ul Haq, - the country's military ruler, with a political and legal dilemma when it confirmed by a 4—3 majority Mr. Zuifikar Ali Bbntto, the the death sentence against country's deposed Prime

The verdict stunned people in court because the split was much closer than expected. Reaction in the country at large was subdued in the face of massive security precan-tions by the martial law anthorities, and demonstrations were small.

The four judges from the dominant Punjab province upheld conviction and sentence on ail charges. The remaining three, all non-Punjabis, acquitted him on all

One of Mr. Bhntto's lawyers ommented: "It's Punjabi

One of Pakistan's funda-

and constitutional friction since the loss of Bangladesh bas been the balance of power between the country's four provinces. The decision might revive old differences and lead to further trouble.

Mr. Bbntto took the deci-

sion calmly and courageously, his lawyers said last night. But he is said to have des-cribed the division of the bench along provincial lines as disastrous for the country. Mr. Bbntto's wife, Begum Nusrat Bhutto, escaped from house arrest to go to Rawal-pindi district jail, where ber busband is in the death cell. She was manhandled into a jeep and taken home, where

had managed to spend 30 minutes with Mr. Bbntto in his cell. Mr. Bhutto's lawyers are to submit a review petition ask-ing for a reconsideration af the verdict. The petition will challenge the judges' appre-

abe is virtually under lock

and key-but not before abe

interpretation of the law. After lengthy arguments yes-terday, the court effectively gave the defence seven days to file the petition, the same allowed for any mercy petition_

General Zia-Ul Haq is obliged to consider only a mercy petition from Mr. Bbutto, aithough anybody may submit one and General Zla has power to commute the sentence. Mr. Bhutto. is 51, has always said that he would not plead for mercy. His senior counsel, bowever, said yesterday that

General Zia sbould exercise his power immediately. General Zia's record on mercy petitions offers little bope: be has turned all down since be came to power by ousting Mr. Bbutto. The legal complication in yesterday's verdict is that there is no reliable precedent for an execution's going ahead on the basis of a split decision.

Writing the judgment, majority Anwar-ul-Haq, Chief Justice, said the presecution bad established its case. Mr. established its case. Mr. Bhutto had misused the instruments of state power in employing the Fedaral Security Force for a political vendetta, and used his power

to stifle investigation The case against Mr. Bhutto was not politically motivated and the Lahore trial court was not biased, as Mr. Bhutto contended. On the contrary, Mr. Bhutto was biased against the court.

The three dissenting judges, in 650-page judgments, argue that Mr. Bbntto and Mr. Mian Mohammed Abbas, who allegedly arranged the crime, should be acquitted. They uphold conviction and sentence against the other three accused: Mr. Ghulam Mustafa, Mr. Arshad Iqual and Mr. Rana Iftikhar

Our Foreign Staff adds: Mr.

James Callaghan, told the Commons yesterday that he had appealed for clemency for Mr. Bhutto and made "Official representations" to General Zia. The Govern-ment, however, has stopped short of breaking off dip-lomatic relations and Dr. David Owen, Foreign Secretary, rejected an appeal from Mr. David Steel, the Liberal Leader, to recall the British Ambassador to Pakistan.

Kurt United Nations Secretary-General, asked that Mr. Bbutto ba spared on bumaniappeal for clemency. Several heads of Govern-

ment bave also appealed.
Mr. Bulent Ecevit, the
Turkish Premier, has offered
to let Mr. Boutto live in exile in Turkey if General Zia com-mutes the sentence.

Bbutto, Page 10

Mineworkers' union to study new Coal Board pay offer

BY DAVID CHURCHILL

National Coal Board's 3.5 per it to meet the pay claim. cent pay offer.

But the offer, made after five union's national executive is hours of talks at the board's likely to consider demands for London headquarters yesterday, industrial action in support of is still nowbere near the rises of up to 40 per cent sought by

Mr. Mick McGabey, yesterday's pay talks in the month, he is expected to push absence through illness of Mr. his Scottish Area executive's Joe Gormley, union president, said that the two sides "were support of the pay claim. "Such a campaign could take fully more than the sum on offer the form of an overtime ban, will be needed to satisfy us." ing bad considered the board's require a ballot of the union's

World wheat price talks close to breakdown

BY BRIJ KHINDARIA IN GENEVA

NEGOTIATIONS for a new ments were between the U.S. to control world prices are close to breaking down over differences between the U.S. and almost all of its trading partners.

If no solution is found in the two remaining days of the Geneva conference, most parti-cipating countries are expected to decide that a new agreement ls unobtainable. The only alternative would be

to renew the existing wheat agreement, which does not include controls over prices and The objective of a new inter-national wheat agreement

national wheat agreement would be to stabilise world market prices by regulating standing, wheat would be available supplies. Reserve stocks would be huilt up when \$140 a tonne to take up half supplies were abundant, as at present, and this would prevent allowance. The second half prices from falling too low.

A European Community total of between 22m and 30m official said the main disagree tonnes.

international wheat agreement and developing countries. The most difficult issue is the price at from reserve stocks built up by removing surplus supplies to boost prices. The U.S. is insisting on a price of \$215 a tonne while developing nations would

prefer \$155. The community has suggested a compromise of \$195 hut the U.S. has rejused While the U.S. and the EEC have broadly decided on the lower price point at which surplus wheat would be bought to add to reserve stocks, Canada—a

major exporter-has yet to he persuaded to agree. Under the U.S.-EEC under-

used to keep prices from rising The U.S. is also adamsnt that too high in the event of a short it will hold only 5m tonnes as reserve stocks out of a world

The EEC officials said the U.S. offer did not reflect its domi nance in the world wheat export market. With 30m tonnes of exports, the U.S. accounted for balf the international trade in

The U.S. bad asked the EEC to hold 4m tonnes in stocks instead of the 2.8m that the Community had offered. The unscceptable, the official added Develoning country negotia-ding more aggressively for tors sald they would be very dis-funds which bas pushed them appointed if the wheat talks

broke down, The developing countries are keen that the new arrangement should have an adequate buffer which means that borrowers stock mechanism and an agreed will be switching to the clearsystem of maximum and mini- ing hanks for finance. This can mum price levels to handle only excerbate the latter's wheat market fluctuations. :

to he under severe pressure reserve assets came under presthe filed if the price falls from domestic farm lobbies. Sure special deposits were foreign assets with the related Chrysler UK plants and labour the stocks could also be to \$125.

The corset is bulging

THE LEX COLUMN

If they ware not before, flashing inside the Bank of Eng-land and the City's banking parlours following yeaterday'a banking figures. In the January banking month eligible liabilities rose by 2.2 per cent and the interest bearing element (Ibels), which show bow well the banks are fitting inside the corset, rose by a whopping 4.7 per cent. To put this in perspective the banks' Ibels rose by 2.7 per cent in the previous 11 months.

As always the authorities are counselling caution. There was so much money flowing in different directions during the period under scrutiny that it is dangerous to draw conclusions about longer term trends. The figures have been inflated partly by currency inflows and the impact of the November tax rebates.

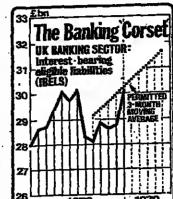

However, there seems reason to believe that the full money supply figures, due on Thursday week, are going to be anything but dismal. There is a strongly unfavourable seasonal adjustment during January which adds £950m to sterling M3, and even assuming that some of the distortions in the money market do not show through, the money supply is likely to have grown by between 2 and 3 per cent last month. In the three months since October, the latest base month for the money stock, sterling M3 has probably been growing at an unnualised rate of around 15 per cent, well above the 8-12 per

cent official target range.
For the banks, which until now have been running rings round tha corset, the latest figures are equally disturbing. To maintain their lending they bave allowed their reserve asset ratios to come under pressure and they have had to start bldcloser to the corset ceiling.

Since the end of the banking month interest rates have risen hy nearly a point and a half wheat market fluctuations.

The U.S. delegation is thought corset. The last time the banks' they did before) that the

ket was surprisingly steady in the face of yesterday's news. Yields at the long end range to 141 per cent,—though only 141 per cent for the leng tap and the market looks to be searching for another level at which a further chunk of inatitutional money might go in.

Certainly the authorities will want to sell some more public sector debt in the current banking month and they still have two weeks in which to add some gilt-edged sales to the recent surge in sales of National Savings Certificates, thanks to the changeover from the 14th to the 18the issues. Several times in the past year a rise in MLR bas been the trigger for the reopening of taps at lower prices. But this time a straight rise in interest rates may not be enough—the market will want promises that the overused monetary weapon is at last to receive some fiscal support.

Marine Midland

The decision in the Marine Midland tax case could remove a nasty cloud which for the past five years has been overhanging consortium banks and other banks with foreign currency mean that Marine Midland will he allowed to cancel out the

chances are that the Revenue will appeal against the decision. Peugeot-Citroen

Peugeot-Citroen's share price dropped below FFr 400 yester-day, and the 18 per cent fall from the high levels reached last autumn puts the shares among the most conspicuous casualties of the Paris Bourse's present bout of nervousness. Last week the group produced satisfactory preliminary figures for 1978, with the Citroen side contributing rather more to growth than Automobiles Pe geot. But the excitment that accompanied the takeover of Chrysler Europe has subsided and some of the French invest-ment institutions seem to be having second thoughts about

Iran has had a lot to do with this change of heart. Not only is Peugeot directly involved ing to produce the Peugeot 305 under licence, but the suspension of Chrysler UK's sales ef knocked down kits to Iran has led to lay-offs in Coventry and may have brought the British company losses in the second half of 1978 to well over £20m. Peugeot'a earlier estimate of FFr 100m losses from Chrysler looks decidedly optimistic.

Oil supply problems might also damage the French carmarket's buoyancy. Already the poor weather has had a depressing effect, and sales of the 305 and Horizon models appear to have reached a plateau. At the same time the group is taking on the excess capacity of. Chrysler UK and the new plants: being huilt, partly with govern-ment grants, in high unemploy-

ment areas in France.
At the very least the group will have to bring Chrysler. France back into profit quickly enough to offset any losses. British business might still be making in 1980. During that year full consolidation of Chrysler Europe will begin and the denominated loan capital 1.8m new Peugeot shares ceded operating in London. In to Chrysler Corp will rank for simplest terms it appears to dividend, so that UK losses to Chrysler Corp will rank for dividend, so that UK losses could make a nasty dent in earnings per share. Productivity is sterling translation gains on reported to be improving at the foreign assets with the related Chrysler UK plants and labour the Chrysler takeover-Peugeol ling. But it is too early yet to repeating its success with Cit-
